Table of Contents

Glossary
Charles J. Krebs 2

1. Introduction to the Science of Ecology
Charles J. Krebs 14

2. Evolution and Ecology
Charles J. Krebs 28

3. Behavioral Ecology
Charles J. Krebs 42

4. Analyzing Geographic Distributions
Charles J. Krebs 60

5. Factors That Limit Distributions I: Biotic
Charles J. Krebs 69

6. Factors That Limit Distributions II: Abiotic
Charles J. Krebs 89

7. Distribution and Abundance
Charles J. Krebs 109

8. Population Parameters and Demographic Techniques
Charles J. Krebs 121

9. Population Growth
Charles J. Krebs 150

10. Species Interactions I: Competition
Charles J. Krebs 173

11. Species Interactions II: Predation
Charles J. Krebs 198

12. Species Interactions III: Herbivory and Mutualism
Charles J. Krebs 220

13. Species Interactions IV: Disease and Parasitism
Charles J. Krebs 246

14. Regulation of Population Size
Charles J. Krebs 270

15. Applied Problems I: Harvesting Populations
Charles J. Krebs 291

16. Applied Problems II: Pest Control
Charles J. Krebs 313

17. Applied Problems III: Conservation Biology
Charles J. Krebs 337

18. Community Structure in Space: Biodiversity
Charles J. Krebs 363

19. Community Structure in Time: Succession
Charles J. Krebs 388

20. Community Dynamics I: Predation and Competition in Equilibrial Communities
Charles J. Krebs 415

21. Community Dynamics II: Disturbance and Nonequilibrium Communities
Charles J. Krebs 439

22. Ecosystem Metabolism I: Primary Production
Charles J. Krebs 465

23. Ecosystem Metabolism II: Secondary Production
Charles J. Krebs 489

24. Ecosystem Metabolism III: Nutrient Cycles
Charles J. Krebs 512

25. Ecosystem Dynamics under Changing Climates
Charles J. Krebs 536

26. Ecosystem Health and Human Impacts
Charles J. Krebs 555

Appendix: A Primer on Population Genetics
Charles J. Krebs 579

Appendix: Instantaneous and Finite Rates
Charles J. Krebs 581

Appendix: Species Diversity Measures of *Heterogeneity*
Charles J. Krebs 584

Bibliography
Charles J. Krebs 587
