| Preface | page xi | |
| Contributors | xiv | |
| 1 | <i>Life-history strategies</i> | 1 |
| | T.H. Fleming | |
| 1.1 | Introduction | 1 |
| 1.2 | Evolution and life-history strategies | 2 |
| 1.2.1 | Individual selection | 3 |
| 1.2.2 | Kin selection | 3 |
| 1.2.3 | Group selection | 4 |
| 1.3 | Demographic components of life-history strategies | 5 |
| 1.3.1 | Theoretical considerations | 6 |
| 1.3.2 | Empirical data | 15 |
| 1.4 | Energetic components of life-history strategies | 27 |
| 1.4.1 | The evolution of food habits and food niche breadth | 27 |
| 1.4.2 | The evolution of energy metabolism: homeothermy v. heterothermy | 31 |
| 1.5 | Behavioural components of life-history strategies | 35 |
| 1.5.1 | The evolution of habitat selection | 36 |
| 1.5.2 | The evolution of social organization | 42 |
| 1.6 | Summary | 51 |
| 1.7 | Acknowledgements | 52 |
| 1.8 | References | 52 |
| 2 | <i>Population processes in small mammals</i> | 63 |
| | H.N. Southern | |
| 2.1 | Introduction | 63 |
| 2.2 | Distribution | 66 |
| 2.2.1 | 'Macrodistribution' | 66 |

| | | |
|-------|--|-----|
| 2.2.2 | 'Microdistribution' | 75 |
| 2.3 | Abundance | 86 |
| 2.3.1 | Density | 86 |
| 2.3.2 | 'Income and expenditure' | 92 |
| 3 | <i>The stability and instability of small mammal populations</i> | 103 |
| | H.N. Southern | |
| 3.1 | Introduction | 103 |
| 3.2 | The regulation of small mammal populations | 104 |
| 3.2.1 | Theoretical background | 105 |
| 3.3 | Case studies of change in small mammal populations | 113 |
| 3.3.1 | Change in numbers of mice and voles in Wytham Woods over 30 years | 113 |
| 3.3.2 | Regulation of wood mice in Wytham Woods 1948–66 | 115 |
| 3.3.3 | The story of the house mouse (<i>Mus musculus</i>) | 117 |
| 3.3.4 | Cyclic species | 119 |
| 3.4 | Conclusions | 127 |
| 3.5 | References to Chapters 2 and 3 | 127 |
| 4 | <i>Community structure and functional role of small mammals in ecosystems</i> | 135 |
| | G.F. Hayward and J. Phillipson | |
| 4.1 | Introduction | 135 |
| 4.2 | Characterization of 'small mammals' as a single state variable | 135 |
| 4.3 | Characterization of 'small mammals' as different state variables | 138 |
| 4.4 | The structure of small mammal faunas | 138 |
| 4.4.1 | Taxonomic composition | 139 |
| 4.4.2 | Species diversity | 139 |
| 4.4.3 | Relative abundance | 142 |
| 4.4.4 | Biomass and density | 144 |
| 4.4.5 | Ecological diversity | 145 |
| 4.5 | Some ecological characteristics of small mammals | 150 |
| 4.6 | Evaluation of transfer functions which link the component 'small mammals' to other system variables | 153 |
| 4.6.1 | Consumption: its direct impact and the functional relationships between vegetation and primary consumers | 155 |

| | | |
|-------|--|-----|
| 4.6.2 | Consumption: its indirect impact and the functional relationships between primary consumers and primary producers | 159 |
| 4.6.3 | Activities other than consumption: their impact and the functional relationships between primary consumers and abiotic state variables | 169 |
| 4.6.4 | Small mammals as secondary consumers: their impact and functional relationships with other consumer state variables | 174 |
| 4.6.5 | Small mammals as prey items: their impact and functional relationships with other consumer state variables | 175 |
| 4.7 | Energy budgets | 176 |
| 4.7.1 | Assimilation and digestion | 177 |
| 4.7.2 | Production | 178 |
| 4.7.3 | Respiration | 183 |
| 4.7.4 | Energy budget models | 188 |
| 4.7.5 | Energy budgets in an ecosystem context | 193 |
| 4.8 | The role of small mammals in ecosystems | 195 |
| 4.9 | References | 200 |
| 5 | <i>Ecological importance of small mammals as reservoirs of disease</i> F.E.G. Cox | 213 |
| 5.1 | Introduction | 213 |
| 5.2 | Zoonoses involving small mammals | 214 |
| 5.2.1 | Bacterial zoonoses | 215 |
| 5.2.2 | Rickettsial zoonoses | 218 |
| 5.2.3 | Viral zoonoses | 219 |
| 5.2.4 | Fungal zoonoses | 222 |
| 5.2.5 | Protozoal zoonoses | 223 |
| 5.2.6 | Helminth zoonoses | 224 |
| 5.3 | Epidemiology of human diseases involving small mammals | 225 |
| 5.3.1 | Foci of infection | 225 |
| 5.3.2 | Spread of infections from foci | 226 |
| 5.3.3 | Models of the spread of disease | 227 |
| 5.4 | The importance of small mammals as reservoirs of disease | 227 |
| 5.4.1 | Overall assessment | 227 |
| 5.4.2 | Problems of assessing the role of small mammals as reservoirs of disease | 230 |
| 5.5 | The control of diseases with small mammal reservoirs | 231 |
| 5.6 | Conclusions | 236 |
| 5.7 | References | 236 |

| | | |
|-------|---|-----|
| 6 | <i>Importance of small mammals as pests in agriculture and stored products</i> | 239 |
| | A. Myllymäki | |
| 6.1 | Introduction | 239 |
| 6.2 | Main types of small mammal problems | 240 |
| 6.2.1 | Damage by <i>Microtus arvalis</i> and subsidiary microtines to field crops of temperate regions | 240 |
| 6.2.2 | Major threats to cultivated trees: debarkers, root-cutters and seed depredators | 244 |
| 6.2.3 | Pests emerging from the soil: hamsters, ground squirrels, gerbils, pocket gophers and moles | 247 |
| 6.2.4 | Murid rodents: depredators of cereals and other subsistence crops | 249 |
| 6.2.5 | Rodent damage to tropical cash crops | 252 |
| 6.2.6 | Rodent damage to stored products and structure | 253 |
| 6.3 | Principal means of combating small mammal damage | 256 |
| 6.3.1 | Introduction to control problematics | 256 |
| 6.3.2 | Habitat manipulation and related methods as intentional rodent control measures | 257 |
| 6.3.3 | Exclusion methods and rodent deterrents | 261 |
| 6.3.4 | Reductional control methods | 264 |
| 6.4 | Towards integrated control programmes | 268 |
| 6.4.1 | Introduction | 268 |
| 6.4.2 | Identification of the problem and the pest | 269 |
| 6.4.3 | Determination of the control thresholds | 269 |
| 6.4.4 | Selection of control measures | 271 |
| 6.4.5 | Follow-up of the efficacy of control operations | 272 |
| 6.4.6 | Need for international co-ordination of efforts | 272 |
| 6.5 | References | 273 |
| 7 | <i>Ecology of bats</i> | 281 |
| | J. Gaisler | |
| 7.1 | Habitat | 281 |
| 7.1.1 | Structural and functional requirements | 281 |
| 7.1.2 | Ecological factors: control through ambient influence | 282 |
| 7.1.3 | Foraging strategies | 283 |
| 7.1.4 | Daytime shelters during the active life | 287 |
| 7.1.5 | Hibernation | 293 |

| | | |
|-------|--|-----|
| 7.2 | Diet | 301 |
| 7.2.1 | Food specializations | 301 |
| 7.2.2 | Water intake | 304 |
| 7.2.3 | The position of bats in food chains | 304 |
| 7.3 | Reproduction | 305 |
| 7.3.1 | Sexual cycles | 305 |
| 7.3.2 | Effect of reproduction | 309 |
| 7.4 | Population | 311 |
| 7.4.1 | Population size | 311 |
| 7.4.2 | Population structure | 315 |
| 7.4.3 | Population changes | 318 |
| 7.5 | Community | 325 |
| 7.6 | Relations | 330 |
| 7.6.1 | The role of bats in ecosystems | 330 |
| 7.6.2 | Bats and man | 332 |
| 7.7 | Acknowledgements | 334 |
| 7.8 | References | 334 |
| 8 | <i>Ecology of small marsupials</i> C.H. Tyndale-Biscoe | 343 |
| 8.1 | Introduction | 343 |
| 8.1.1 | Distinctive features of marsupial reproduction | 346 |
| 8.2 | Breeding strategies of polytocous marsupials | 348 |
| 8.2.1 | American opossums | 348 |
| 8.2.2 | Australian bandicoots | 350 |
| 8.3 | Semelparity – an unique strategy | 351 |
| 8.3.1 | Life-history of <i>Antechinus</i> species | 351 |
| 8.3.2 | Cause of synchronous death of males | 355 |
| 8.3.3 | Significance of semelparity | 358 |
| 8.3.4 | Response to fire | 359 |
| 8.4 | Contrasting strategies of arboreal leaf eating marsupials | 359 |
| 8.4.1 | Ringtail possum and greater glider | 360 |
| 8.4.2 | Brush possum and bobuck | 363 |
| 8.4.3 | Concept of forest dependent species | 364 |
| 8.4.4 | Response to forestry practices | 365 |
| 8.5 | The ecology of invasion – the brush possum in New Zealand | 366 |
| 8.5.1 | Introduction and establishment | 368 |
| 8.5.2 | Effects on indigenous forest | 368 |
| 8.5.3 | Forest influence on the possum population | 371 |
| 8.5.4 | Possums, cattle and tuberculosis | 372 |

| | | |
|-----|--|-----|
| 8.6 | The ecology of extinction – small marsupials of the inland plains of Australia | 375 |
| 8.7 | Acknowledgements | 376 |
| 8.8 | References | 376 |
