|  |            |
|--|------------|
| <b>1 Ab Initio Investigation of Anisotropic Magnetism and Magnetization Blocking in Metal Complexes .....</b>  | <b>1</b>   |
| Liviu F. Chibotaru   |            |
| <b>2 Analytical Derivations for the Description of Magnetic Anisotropy in Transition Metal Complexes .....</b> | <b>63</b>  |
| Rémi Maurice, Nicolas Suaud, and Nathalie Guihéry  |            |
| <b>3 Calculations of Magnetic Exchange in Multinuclear Compounds .....</b>                                     | <b>111</b> |
| Giang Truong Nguyen and Liviu Ungur  |            |
| <b>4 Exact Diagonalization Techniques for Quantum Spin Systems .....</b>                                       | <b>155</b> |
| Jürgen Schnack   |            |
| <b>5 Modeling Magnetic Properties of Actinide Complexes .....</b>  | <b>179</b> |
| Hélène Bolvin  |            |
| <b>6 Spin-Phonon Relaxation in Magnetic Molecules: Theory, Predictions and Insights .....</b>                  | <b>219</b> |
| Alessandro Lunghi  |            |
| <b>7 Ab Initio Modelling of Lanthanide-Based Molecular Magnets: Where to from Here? .....</b>                  | <b>291</b> |
| Sourav Dey, Tanu Sharma, Arup Sarkar, and Gopalan Rajaraman  |            |
| <b>8 Molecular Magnets on Surfaces: In Silico Recipes for a Successful Marriage .....</b>                      | <b>395</b> |
| Matteo Briganti and Federico Totti   |            |
| <b>9 Theoretical Approaches for Electron Transport Through Magnetic Molecules .....</b>                        | <b>445</b> |
| Eliseo Ruiz and Daniel Aravena   |            |
| <b>Index .....</b>   | <b>495</b> |
