<b>1</b>	<b>Data Acquisition and Data Storage Methods in Strategic Planning</b>	<b>9</b>
1.1	Predictive Modelling and Knowledge Discovery in Strategic Planning . . . . .	10
1.2	Common Data Acquisition Problems . . . . .	11
1.2.1	Technological Data . . . . .	12
1.2.2	Economical Data . . . . .	14
1.3	Conclusions . . . . .	15
<b>2</b>	<b>System Contamination and Immunity – Mathematical Foundation</b>	<b>17</b>
2.1	Finite Non Autonomous Systems . . . . .	18
2.1.1	Definition (Finite autonomous system) . . . . .	18
2.1.2	Comment . . . . .	18
2.1.3	Definition (Finite Non Autonomous systems with contamination) . . . . .	18
2.1.4	Comment . . . . .	19
2.2	System transitions . . . . .	20
2.2.1	Definition (Spontaneous system transition) . . . . .	20
2.2.2	Comment . . . . .	20
2.2.3	Definition (Managed Transition with the Management of the Class $\mathcal{L}$ ) . . . . .	20
2.2.4	Comment . . . . .	21

## CONTENTS

---

2.2.5	Definition (The Target Set of the Status $q_i$ ) . . . . .	21
2.2.6	Comment . . . . .	21
2.3	System Contamination . . . . .	22
2.3.1	Definition (Non Contaminate Statuses Set) . . . . .	22
2.3.2	Comment . . . . .	22
2.3.3	Definition (Contamination Status) . . . . .	22
2.3.4	Comment . . . . .	22
2.3.5	Definition (Statuses Set Contaminated by Contamination $k$ ) . . . . .	22
2.3.6	Comment . . . . .	23
2.4	System Immunity . . . . .	23
2.4.1	Definition (The Spontaneous System Immunity) . . . . .	23
2.4.2	Comment . . . . .	23
2.4.3	Theorem . . . . .	23
2.4.4	Proof . . . . .	24
2.4.5	Comment . . . . .	24
2.4.6	Definition (Managed Immunity) . . . . .	24
2.4.7	Comment . . . . .	24
2.4.8	Theorem . . . . .	25
2.4.9	Proof . . . . .	25
2.4.10	Comment . . . . .	25
2.5	The methods of immunity determination . . . . .	25
2.5.1	Comment . . . . .	25
2.5.2	Definition (Status Graph of the System with the Management of the Class $\mathcal{L}$ ) . . . . .	26
2.5.3	Comment . . . . .	26
2.5.4	Comment . . . . .	26
2.5.5	Definition (Target Subgraph of the Status $q$ ) . . . . .	27
2.5.6	Comment . . . . .	27
2.5.7	Theorem . . . . .	27
2.5.8	Proof . . . . .	27
2.5.9	Note . . . . .	27
2.5.10	Comment . . . . .	28
2.5.11	Definition (Random Managed Immunity) . . . . .	29
2.5.12	Comment . . . . .	29

---

2.5.13	Comment . . . . .	29
2.5.14	Comment (Algorithmic Detection of Managed and Random Managed Immunity . . . . .	30
<b>3</b>	<b>Pedestrian dynamics model based on cellular automa- ton</b>	<b>31</b>
3.1	Simulation of pedestrian dynamics . . . . .	31
3.1.1	Cellular automaton (CA) . . . . .	32
3.1.2	Pedestrian dynamics cellular automaton . . .	33
3.1.3	Pedestrian dynamics cellular automaton prob- ability rule . . . . .	35
3.1.4	Conflicts resolution . . . . .	39
3.2	Adding Strict Global Rule . . . . .	40
<b>4</b>	<b>Influence of information on system with repeating subsidy programs</b>	<b>43</b>
4.1	Problem description . . . . .	43
4.2	Method . . . . .	45
4.3	Model . . . . .	45
4.4	Results from simulations . . . . .	47
4.5	Conclusions . . . . .	47
<b>5</b>	<b>Artificial Data Generation for Testing of Missing Values Imputation Methods</b>	<b>51</b>
5.1	Introduction . . . . .	51
5.2	The Missing Values Problem . . . . .	52
5.3	Strategies for Dealing with Missing Data . . . . .	53
5.4	Testing Procedure of Missing Values Imputation Al- gorithm . . . . .	53
5.5	Artificial and Real Datasets for Testing of Missing Values Imputation Methods . . . . .	54
5.6	Generating artificial Data Sets . . . . .	55
5.6.1	Possibilities of Generating Artificial Datasets Using Rapidminer . . . . .	56
5.6.2	Generate Nominal Data operator . . . . .	56

## CONTENTS

---

5.6.3	Generate Data Operator . . . . .	57
5.6.4	Generate Direct Mailing Data . . . . .	57
5.6.5	Generate Sales Data . . . . .	57
5.6.6	Other Operators for Generating Data . . . . .	58
5.7	Missing Values Mechanisms . . . . .	58
5.7.1	Missing Completely at Random (MCAR) . . . . .	58
5.7.2	Missing at Random (MAR) . . . . .	58
5.7.3	Not Missing at Random (NMAR) . . . . .	59
5.8	Generating Missing Values with MCAR Mechanism Using Rapidminer . . . . .	59
5.9	Summary . . . . .	63
<b>6</b>	<b>IS possible use NoSQL in Business Intelligence?</b>	<b>65</b>
6.1	Business intelligence (BI) . . . . .	67
6.2	Reporting . . . . .	68
6.3	DBMS . . . . .	69
6.4	RDBMS . . . . .	70
6.5	NoSQL . . . . .	70
6.6	CAP Theorem . . . . .	70
6.7	NoSQL clasification . . . . .	71
6.7.1	Columnar Data Stores . . . . .	71
6.7.2	Document Stores . . . . .	72
6.7.3	Graph Databases . . . . .	72
6.7.4	Key/Value Stores: . . . . .	73
6.8	Primar APP → NoSQL DB → Reporting . . . . .	75
6.9	Primar APP → SQL DB → NoSQL DM → Reporting	76
