

Contents

<i>Contributing Authors</i>	vii
<i>Preface</i>	ix
1. Introduction: Unlocking the Stratigraphical Record <i>Peter Doyle and Matthew R. Bennett</i>	1
PART I ESTABLISHING THE SEQUENCE	
2. Lithostratigraphy: Principles and Practice <i>Beris M. Cox and Michael G. Sumbler</i>	11
3. Remote Sensing and Lithostratigraphy <i>M. Andrew Bussell</i>	29
4. Field Interpretation of Complex Tectonic Areas <i>Paula J. Carey</i>	81
5. Evolutionary Concepts in Biostratigraphy <i>Paul N. Pearson</i>	123
6. Event Stratigraphy: Recognition and Interpretation of Sedimentary Event Horizons <i>Gerhard Einsele</i>	145
7. Cyclostratigraphy <i>Andrew S. Gale</i>	195
8. Strontium Isotope Stratigraphy <i>John M. McArthur</i>	221
9. Borehole Data and Geophysical Log Stratigraphy <i>Alf Whittaker</i>	243

10. Principles of Seismic Stratigraphy <i>Alf Whittaker</i>	275
11. Sequence Stratigraphy <i>Stephen J. Vincent, David I. M. Macdonald and Peter Gutteridge</i>	299
12. Stratigraphical Applications of Radiogenic Isotope Geochemistry <i>Malcolm J. Hole</i>	351
13. Chronostratigraphy (Global Standard Stratigraphy): A Personal Perspective <i>Charles H. Holland</i>	383

PART II INTERPRETING THE RECORD

14. Interpreting the Record: Facies Analysis <i>Duncan Pirrie</i>	395
15. Interpreting Sea Level <i>Anthony Hallam</i>	421
16. Interpreting Palaeoenvironments from Fossils <i>Peter Doyle and Matthew R. Bennett</i>	441
17. Interpreting Palaeoclimates <i>Jane E. Francis</i>	471
18. Interpreting Orogenic Belts: Principles and Examples <i>David A. T. Harper</i>	491

<i>Index</i>	525
