List of Contributors	vii
Acknowledgments	xi
Dedication	xiii
Preface	xv
Abbreviations	xvii

SECTION 1 Introduction

1 Biochemistry and Clinical Medicine: Introduction and Overview	1
<i>John W. Baynes and Marek H. Dominiczak</i>	

SECTION 2 Molecules and Cells

2 Amino Acids and Proteins	9
<i>Ryoji Nagai</i>	
3 Carbohydrates and Lipids	25
<i>John W. Baynes</i>	
4 Membranes and Transport	37
<i>Masatomo Maeda</i>	

SECTION 3 Metabolism

5 Oxygen Transport	49
<i>John W. Baynes and Norma Frizzell</i>	
6 Catalytic Proteins - Enzymes	65
<i>Junichi Fujii</i>	
7 Vitamins and Minerals	79
<i>Marek H. Dominiczak</i>	
8 Bioenergetics and Oxidative Metabolism	95
<i>Norma Frizzell</i>	
9 Glycolysis and the Pentose Phosphate Pathway	115
<i>John W. Baynes</i>	
10 The Tricarboxylic Acid Cycle	129
<i>Norma Frizzell</i>	

11 Fatty Acid and Triglyceride Catabolism	143
--	------------

John W. Baynes

12 Biosynthesis and Storage of Carbohydrate	153
--	------------

John W. Baynes

13 Biosynthesis and Storage of Fatty Acids	171
---	------------

Fredrik Karpe and Iain Broom

14 Biosynthesis of Cholesterol and Steroids	181
--	------------

Marek H. Dominiczak

15 Biosynthesis and Degradation of Amino Acids	197
---	------------

Allen B. Rawitch and John W. Baynes

16 Biosynthesis and Degradation of Nucleotides	213
---	------------

Alejandro Gugliucci and Teresita Menini

17 Complex Carbohydrates: Glycoproteins	225
--	------------

Koichi Honke

18 Complex Lipids	243
--------------------------	------------

Koichi Honke

19 The Extracellular Matrix	255
------------------------------------	------------

Wayne E. Carver

SECTION 4 Molecular Basis of Inheritance

20 Deoxyribonucleic Acid	269
---------------------------------	------------

Alejandro Gugliucci and Teresita Menini

21 Ribonucleic Acid	289
----------------------------	------------

Robert W. Thornburg

22 Protein Synthesis and Turnover	303
--	------------

Edel M. Hyland

**23 Regulation of Gene Expression:
Basic Mechanisms 317**

Edel M. Hyland

**24 Genomics, Proteomics and
Metabolomics 333**

Andrew R. Pitt and Walter Kolch

**SECTION 5
Signalling and Growth**

**25 Membrane Receptors and Signal
Transduction 359**

Ian P. Salt and Sophie J. Bradley

26 Neurotransmitters 375

Simon Pope and Simon J. R. Heales

27 Biochemical Endocrinology 391

David Church, Robert Semple and Marek H. Dominiczak

**28 Cellular Homeostasis: Cell Growth
and Cancer 423**

*Alison M. Michie, Verica Paunovic, and Margaret
M. Harnett*

29 Aging 443

John W. Baynes

**SECTION 6
Fuels Nutrients and Minerals**

**30 Digestion and Absorption of
Nutrients: The Gastrointestinal
Tract 455**

Marek H. Dominiczak and Matthew Priest

**31 Glucose Homeostasis and
Fuel Metabolism: Diabetes
Mellitus 471**

Marek H. Dominiczak

32 Nutrients and Diets 501

Marek H. Dominiczak and Jennifer Logue

**33 Lipoprotein Metabolism and
Atherogenesis 519**

Marek H. Dominiczak

**SECTION 7
Specialized Tissues and Their Function**

34 Role of Liver in Metabolism 539

Alan F. Jones and Marek H. Dominiczak

**35 Water and Electrolytes
Homeostasis 555**

Marek H. Dominiczak

**36 The Lung and the Regulation
of Hydrogen Ion Concentration
(Acid–Base Balance) 573**

Marek H. Dominiczak and Mirosława Szczepańska-Konkel

**37 Muscle: Energy Metabolism,
Contraction, and Exercise 585**

Matthew C. Kostek

**38 Bone Metabolism and Calcium
Homeostasis 599**

William Fraser and Marek H. Dominiczak

39 Neurochemistry 613

Marek H. Dominiczak

**SECTION 8
Blood and Immunity. Clinical Biochemistry**

40 Blood and Plasma Proteins 625

Marek H. Dominiczak

41 Hemostasis and Thrombosis 635

Catherine N. Bagot

**42 Oxidative Stress and
Inflammation 651**

John W. Baynes

**43 The Immune Response: Innate and
Adaptive Immunity 663**

Georgia Perona-Wright and J. Alastair Gracie

**Appendix 1: Selected Clinical Laboratory
Reference Ranges 683**

Yee Ping Teoh and Marek H. Dominiczak

Index 693
