1 Introduction

Robert Coe

Aim of the book	1
The structure of the book	1
Chapter features	2
What's new in the third edition?	2

PART I INTRODUCTION TO RESEARCH METHODS AND METHODOLOGIES IN EDUCATION

2 The nature of educational research

Robert Coe

Introduction	5
Dimensions of difference: paradigms?	5
What is a paradigm?	6
Reconciling the different views	7
Different aims for educational research	8
Other ways of classifying different types of educational research	9
Characteristics of research	10
How is educational research different from other kinds of research?	11
Research quality	12
Questions for further investigation	13
Suggested further reading	13
References	13

3 Finding your theoretical position	15
<i>Michael Waring</i>	
Introduction	15
Ontology, epistemology, methodology and methods	15
The nature of paradigms: making sense of reality	17
Conclusion	20
Questions for further investigation	20
Suggested further reading	20
References	21
PART II BASIC PRINCIPLES AND PRACTICE IN CONDUCTING RESEARCH	23
4 Design of empirical research	25
<i>Larry V. Hedges</i>	
Introduction	25
Problem formulation	25
Logic of enquiry	26
Varieties of research designs	26
Validity considerations	30
Questions for further investigation	32
Suggested further reading	32
References	32
5 Planning your research	33
<i>Laura Day Ashley</i>	
Why is planning important?	33
Starting to plan early on	33
Managing your time and resources	39
The research proposal or plan	40
Planning as an ongoing activity	41
Questions for further investigation	42
Suggested further reading	42
References	42
6 Inference and interpretation in research	43
<i>Robert Coe</i>	
Introduction	43
Confusion over 'validity'	43
Interpretation claims	45
Transfer claims	50
Questions for further investigation	55
Suggested further reading	55
References	55

7 Research ethics

Martyn Hammersley

- Introduction
- What is ethics?
- What is *research* ethics?
- Ethical principles
- Ethics in practice
- Ethical regulation and ethics committees
- Conclusion
- Questions for further investigation
- Suggested further reading
- References

8 Disseminating your research

Mike McLinden

- Introduction
- What is the purpose of dissemination?
- Dissemination viewed through the lens of integrated scholarship
- How to complete your dissemination plan
- Research case study
- Conclusion
- Questions for further investigation
- Suggested further reading
- References

PART III RESEARCH DESIGNS

9 Action research

Carol Munn-Giddings

- What is action research?
- Research design
- Example: stress in the workplace
- Conclusion
- Research essentials
- Questions for further investigation
- Suggested further reading
- References

10 Naturalistic research

Rob Walker

- Naturalistic enquiry
- A brief history
- Issues in naturalistic enquiry

Methods of naturalistic enquiry	56
Classic and exemplary cases	56
Is there a future for naturalistic research?	56
Research essentials	56
Questions for further investigation	57
Suggested further reading	58
References	64
Ethnographic research	64
Classical theory	65
Definition and brief history	66
Research question and paradigmatic location	66
Becoming an ethnographer	66
Role conflict and ethical dilemmas	68
Methods, data collection and analysis	68
Conclusion	68
Research essentials	68
Questions for further investigation	69
Suggested further reading	71
References	77
Visual methodologies	80
Classical theory	80
Introduction	81
Mapping the terrain of visual methodology	81
Applying the methods: the Friday Agreement Project	83
Conclusion	85
Research essentials	85
Questions for further investigation	85
Suggested further reading	87
References	88
Grounded theory	89
Method theory	90
Introduction	90
Classification of grounded theory	90
Locating yourself as a grounded theorist	91
What is grounded theory?	93
The basic method: data collection and analysis	93
Theoretical sampling	93
The heart of the matter: coding	93
Writing a grounded theory	93
Challenges of grounded theory	95
Conclusion	95
Research essentials	95

Methods of naturalistic enquiry	96
Classic and exemplary cases	97
Is there a future for naturalistic research?	97
Research essentials	98
Questions for further investigation	98
Suggested further reading	99
References	99
11 Ethnographic research	102
<i>Ghazala Bhatti</i>	
Definition and brief history	
Research question and paradigmatic location	
Becoming an ethnographer	
Role conflict and ethical dilemmas	
Methods, data collection and analysis	
Conclusion	
Research essentials	
Questions for further investigation	
Suggested further reading	
References	
12 Visual methodologies	110
<i>Claudia Mitchell</i>	
Introduction	
Mapping the terrain of visual methodologies	
Applying the methods: the Friday Absenteeism Project	
Conclusion	
Research essentials	
Questions for further investigation	
Suggested further reading	
References	
13 Grounded theory	119
<i>Michael Waring</i>	
Introduction	
(Re)interpretations of grounded theory	
Locating yourself as a grounded theorist	
What is grounded theory?	
The helix model: a framework for enquiry	
Theoretical sensitivity	
The heart of the matter – coding	
Writing a grounded theory	
Criticisms of grounded theory	
Conclusion	

Questions for further investigation	131
Suggested further reading	132
References	132
14 Case study research	135
<i>Laura Day Ashley</i>	
What is case study research?	135
Types of case study and selection of cases	135
Case study research and validity	136
Example: multiple case study of private school outreach in India	137
Other examples of case study research	140
Research essentials	141
Questions for further investigation	141
Suggested further reading	142
References	142
15 Secondary data	144
<i>Emma Smith</i>	
Introduction	144
What is secondary data analysis?	144
The promises of secondary data analysis	145
Sources of secondary data	145
The role of 'big data' in education research	146
Using secondary data to provide a context for small-scale research	147
Using secondary data to monitor trends over time	148
Conclusion	150
Research essentials	150
Questions for further investigation	151
Suggested further reading	151
References	152
16 Longitudinal research	153
<i>Anna Vignoles</i>	
Longitudinal data and research designs	153
Data	153
Longitudinal research designs	154
Applications of longitudinal research	157
Conclusion	159
Research essentials	159
Questions for further investigation	160
Suggested further reading	160
References	161

17	Statistical and correlational techniques	162
	<i>Stephen Gorard</i>	
	Introduction	162
	Statistical and correlational research	162
	An example: correlational research	163
	Research essentials	167
	Questions for further investigation	168
	Suggested further reading	169
	References	169
18	Impact evaluation	170
	<i>Steve Higgins</i>	
	Introduction	170
	Impact evaluation in education	170
	The 'Embedding ICT' impact evaluation	172
	Evaluation design, aims and methods	172
	Results of the evaluation	173
	Challenges for interpretation from the evaluation design	175
	Conclusion	175
	Research essentials	176
	Questions for further investigation	176
	Suggested further reading	177
	References	177
19	Interventions: Experiments	179
	<i>Peter Tymms</i>	
	Introduction	179
	The kinds of research questions which interventions seek to address	179
	Paradigmatic location	180
	Individual random assignment	182
	Clusters randomly assigned	182
	Methods of data collection and analysis	182
	Research essentials	183
	Questions for further investigation	184
	Suggested further reading	184
	References	185
20	Mixing methods in education research	186
	<i>Gert Biesta</i>	
	Introduction	186
	The nature of mixed-methods research	187
	Different mixed designs	188

Research essentials	190
Questions for further investigation	191
Suggested further reading	191
References	192

21 Systematic reviews 194

Carole Torgerson, Jill Hall and Kate Lewis-Light

Overview	194
Introduction	194
Undertaking a systematic review	196
Conclusion	206
Research essentials	206
Questions for further investigation	207
Suggested further reading	207
References	208

22 Computational research methods and data science 209

Christian Bokhove

Introduction	209
What are data science and computational research methods?	210
What types of research questions can these methods answer?	211
What are the major issues when preparing for, and carrying out, this type of research?	214
Case study: analysing inspection reports	215
Conclusion	217
Research essentials	217
Questions for further investigation	217
Suggested further reading	217
References	217

PART IV DATA COLLECTION TOOLS 219

23 Methods for observing classroom interactions 221

Drew H. Gitomer

Introduction	221
Research questions addressed through classroom observation	222
Conducting observations for a research study	224
Analysing the data	226
Using observation scores to address research questions	227
Case study	227
Conclusion	228
Research essentials	228
Questions for further investigation	229
Suggested further reading	229
References	230

24 In-depth interviews	232
<i>Carolyn L. Mears</i>	
Introduction	232
Interviewing: it's more than questions and answers	232
Conducting the interview	234
Standards	236
Conclusion	236
Research essentials	237
Questions for further investigation	238
Suggested further reading	238
References	239
25 Focus groups and group interviews	240
<i>Anita Gibbs</i>	
Introduction	240
Strengths and weaknesses of focus groups	240
How to set up and run a focus group	241
Ethical dilemmas	243
Cultural challenges	243
Online focus groups	244
Exemplars	244
Conclusion	245
Research essentials	245
Questions for further investigation	246
Suggested further reading	246
References	247
26 Internet-based methods	248
<i>Rhona Sharpe and Greg Benfield</i>	
Introduction	248
Using online research methods to investigate learners' experiences	250
Challenges in learner experience research	253
Conclusion	255
Research essentials	255
Questions for further investigation	256
Suggested further reading	256
References	256
27 Doing social media research	259
<i>Eve Stirling</i>	
Introduction	259
'Big data and deep data': social media methods	260
Social media places: a social media site as a space and a place	260
Learners' use of social media spaces	260

Using Facebook to research first-year transition at a UK university	261
Acknowledging and recording the temporal nature of social media	263
A note on copyright	263
Developments in data capture: NCapture	264
Conclusion	264
Research essentials	264
Questions for further investigation	265
Suggested further reading	265
References	265
28 Documentary methods	268
<i>Gary McCulloch</i>	
Introduction	268
Personal documents	270
The public record	271
Archival documents	272
Conclusion	273
Research essentials	273
Questions for further investigation	273
Suggested further reading	274
References	274
Online resources	276
29 Questionnaires	277
<i>Peter Tymms</i>	
Introduction	277
Purposes	277
Formats	278
Wording	280
Administration	281
Length of questionnaires	281
Response rates	282
Scales	283
Conclusion and links to other methodology	285
Research essentials	285
Questions for further investigation	286
Suggested further reading	286
References	287
PART V ANALYSIS METHODS	289
30 Using software in qualitative data analysis	291
<i>Graham R. Gibbs</i>	
Introduction	291
To use CAQDAS or not	292
Setting up the project in NVivo	292

Sources	292
Units of analysis	293
Security	294
Coding	294
Coding crisis	295
Searching	296
Using Query with coded text and attributes	297
Teamwork	297
Resources	298
Research essentials	298
Questions for further investigation	299
Suggested further reading	299
References	299
31 Statistical analysis tools	300
<i>Paul Connolly</i>	
Introduction	300
The quantitative dataset	300
Statistical analysis with Excel	302
Statistical analysis with SPSS	304
Statistical analysis in Stata	307
Statistical analysis with MLwiN	309
Conclusion	310
Research essentials	311
Questions for further investigation	312
Suggested further reading	312
References	312
32 Discourse analysis	314
<i>Elaine Vaughan</i>	
Introduction	314
Approaches to discourse analysis	315
Discourse analysis and teacher language: data and analysis	320
Research essentials	323
Questions for further investigation	324
Suggested further reading	324
References	325
33 Media analysis	328
<i>Michael Atkinson</i>	
Introduction	328
Conducting media analysis	329
Critiques	333
Conclusion	334
Research essentials	334

Questions for further investigation	335
Suggested further reading	335
References	336
34 Biographical research	337
<i>Michael Tedder</i>	
Introduction	337
The appeal of biographical research	338
Conducting biographical research	339
Analysing and writing up biographical research	340
Exemplary studies	341
Conclusion	343
Research essentials	344
Questions for further investigation	345
Suggested further reading	346
References	346
35 Statistical hypothesis tests	348
<i>Michael Borenstein</i>	
Introduction	348
Motivational example	348
Significance tests	348
NHST: the wrong framework for educational research	350
Effect size estimation	351
Effect size estimation addresses the question of interest	352
NHST lends itself to mistakes of interpretation	352
In context	353
Why does it work at all?	353
Effect sizes and research synthesis	353
Effect sizes and replication	354
Statistical notes	354
Conclusion	354
Research essentials	355
Questions for further investigation	355
Suggested further reading	355
References	356
36 Analysis of variance (ANOVA)	358
<i>Wendy Chan</i>	
Introduction	358
Study designs	358
Assumptions	359
Methodology	359
Additional considerations	363
Case study	364

Conclusion	365
Research essentials	365
Questions for further investigation	366
Suggested further reading	366
References	366
37 Multiple linear regression	368
<i>Stephen Gorard</i>	
Introduction	368
Correlation and simple regression	368
Multiple regression	371
Basic assumptions	372
Cautions and interpretations	373
Conclusion	374
Research essentials	375
Questions for further investigation	375
Suggested further reading	376
References	376
38 Multilevel analysis	378
<i>Michael Seltzer and Jordan Rickles</i>	
Introduction	378
An illustration of multilevel modelling via analyses of the data from a multi-site evaluation of the Transition Mathematics curriculum	379
Additional applications and examples	386
Conclusion	388
Research essentials	389
Questions for further investigation	389
Suggested further reading	390
References	390
39 Effect size	393
<i>Robert Coe</i>	
Introduction	393
Why do we need 'effect size'?	393
How is it calculated?	395
How can effect sizes be interpreted?	396
What is the margin for error in estimating effect sizes?	398
What other factors can influence effect size?	399
Are there alternative measures of effect size?	400
Conclusion	401
Research essentials	401
Questions for further investigation	402
Suggested further reading	402
References	402

40 Meta-analysis **404**
Larry V. Hedges

Introduction 404
 Why is meta-analysis necessary? 404
 Effect sizes 405
 Procedures in meta-analysis 406
 Combining effect size estimates across studies 407
 Assessing heterogeneity 407
 Fixed versus random effects 408
 Analysis of variance and regression analyses in meta-analysis 408
 Publication bias 409
 Example 409
 Conclusion 410
 Research essentials 410
 Questions for further investigation 411
 Suggested further reading 411
 References 411
 Software for meta-analysis 412
