## CHAPTER 1

7

General introduction

## CHAPTER 2

27

Pre-formulation design of sustained-release GnRHa-Loaded PLGA microspheres and associated formulations for controlling reproduction in aquaculture

## CHAPTER 3

41

Efficacy of poly (lactic-co-glycolic acid) microparticles as a gonadotropin-releasing hormone analogue delivery system to stimulate ovulation of peled *Coregonus peled*

## CHAPTER 4

51

Spawning performance and sex steroid levels in female pikeperch *Sander lucioperca* treated with poly(lactic-co-glycolic acid) microparticles

## CHAPTER 5

65

Effects of gonadotropin-releasing hormone agonist administered in microparticles on sperm quality and quantity, and plasma sex steroid levels in northern pike

## CHAPTER 6

75

Induction of spermiation in sterlet *Acipenser ruthenus* by PLGA microparticle delivery with sustained alarelin release

## CHAPTER 7

91

The effect of hormonal treatment on selected sperm quality parameters and sex steroids in tropical cyprinid bala shark *Balantiocheilos melanopterus*

## CHAPTER 8

105
