Preface to the Second Edition	xi
Preface to the First Edition	xiii
1 The Discrete Case: Multinomial Bayesian Networks	1
1.1 Introductory Example: Train-Use Survey	1
1.2 Graphical Representation	2
1.3 Probabilistic Representation	6
1.4 Estimating the Parameters: Conditional Probability Tables	10
1.5 Learning the DAG Structure: Tests and Scores	13
1.5.1 Conditional Independence Tests	14
1.5.2 Network Scores	17
1.6 Using Discrete Bayesian Networks	19
1.6.1 Using the DAG Structure	20
1.6.2 Using the Conditional Probability Tables	22
1.6.2.1 Exact Inference	22
1.6.2.2 Approximate Inference	26
1.7 Plotting Discrete Bayesian Networks	28
1.7.1 Plotting DAGs	28
1.7.2 Plotting Conditional Probability Distributions	30
1.8 Further Reading	33
2 The Continuous Case: Gaussian Bayesian Networks	37
2.1 Introductory Example: Crop Analysis	37
2.2 Graphical Representation	38
2.3 Probabilistic Representation	42
2.4 Estimating the Parameters: Correlation Coefficients	45
2.5 Learning the DAG Structure: Tests and Scores	48
2.5.1 Conditional Independence Tests	48
2.5.2 Network Scores	51
2.6 Using Gaussian Bayesian Networks	52
2.6.1 Exact Inference	52
2.6.2 Approximate Inference	54
2.7 Plotting Gaussian Bayesian Networks	56

2.7.1	Plotting DAGs	56
2.7.2	Plotting Conditional Probability Distributions	58
2.8	More Properties	61
2.9	Further Reading	62
3	The Mixed Case: Conditional Gaussian Bayesian Networks	63
3.1	Introductory Example: Healthcare Costs	63
3.2	Graphical and Probabilistic Representation	64
3.3	Estimating the Parameters: Mixtures of Regressions	69
3.4	Learning the DAG Structure: Tests and Scores	73
3.5	Using Conditional Gaussian Bayesian Networks	74
3.6	Further Reading	77
4	Time Series: Dynamic Bayesian Networks	79
4.1	Introductory Example: Domotics	79
4.2	Graphical Representation	81
4.3	Probabilistic Representation	82
4.4	Learning a Dynamic Bayesian Network	84
4.5	Using Dynamic Bayesian Networks	86
4.6	Plotting Dynamic Bayesian Networks	87
4.7	Further Reading	88
5	More Complex Cases: General Bayesian Networks	91
5.1	Introductory Example: A&E Waiting Times	91
5.2	Graphical and Probabilistic Representation	93
5.3	Building the Model in Stan	96
5.3.1	Generating Data	97
5.3.2	Exploring the Variables	98
5.4	Estimating the Parameters in Stan	99
5.5	Further Reading	102
6	Theory and Algorithms for Bayesian Networks	105
6.1	Conditional Independence and Graphical Separation	105
6.2	Bayesian Networks	107
6.3	Markov Blankets	111
6.4	Moral Graphs	114
6.5	Bayesian Network Learning	117
6.5.1	Structure Learning	121
6.5.1.1	Constraint-Based Algorithms	122
6.5.1.2	Score-Based Algorithms	127
6.5.1.3	Hybrid Algorithms	130
6.5.2	Parameter Learning	133

6.6	Bayesian Network Inference	133
6.6.1	Probabilistic Reasoning and Evidence	134
6.6.2	Algorithms for Belief Updating	136
6.6.2.1	Exact Inference Algorithms	136
6.6.2.2	Approximate Inference Algorithms	141
6.7	Causal Bayesian Networks	145
6.8	Evaluating a Bayesian Network	148
6.9	Further Reading	152
7	Software for Bayesian Networks	155
7.1	An Overview of R Packages	155
7.1.1	The deal Package	157
7.1.2	The catnet Package	159
7.1.3	The pcalg Package	161
7.1.4	The abn Package	162
7.2	Stan and BUGS Software Packages	164
7.2.1	Stan: A Feature Overview	165
7.2.2	Inference Based on MCMC Sampling	166
7.3	Other Software Packages	167
7.3.1	BayesiaLab	167
7.3.2	Hugin	168
7.3.3	GeNIe	168
8	Real-World Applications of Bayesian Networks	171
8.1	Learning Protein-Signalling Networks	171
8.1.1	A Gaussian Bayesian Network	173
8.1.2	Discretising Gene Expressions	174
8.1.3	Model Averaging	177
8.1.4	Choosing the Significance Threshold	181
8.1.5	Handling Interventional Data	183
8.1.6	Querying the Network	187
8.2	Predicting the Body Composition	190
8.2.1	Aim of the Study	191
8.2.2	Designing the Predictive Approach	192
8.2.2.1	Assessing the Quality of a Predictor	192
8.2.2.2	The Saturated BN	193
8.2.2.3	Convenient BNs	194
8.2.3	Looking for Candidate BNs	196
8.3	Further Reading	203

A Graph Theory	205
A.1 Graphs, Nodes and Arcs	205
A.2 The Structure of a Graph	206
A.3 Further Reading	208
B Probability Distributions	209
B.1 General Features	209
B.2 Marginal and Conditional Distributions	210
B.3 Discrete Distributions	212
B.3.1 Binomial Distribution	212
B.3.2 Multinomial Distribution	213
B.3.3 Other Common Distributions	213
B.3.3.1 Bernoulli Distribution	213
B.3.3.2 Poisson Distribution	213
B.4 Continuous Distributions	214
B.4.1 Normal Distribution	214
B.4.2 Multivariate Normal Distribution	214
B.4.3 Other Common Distributions	215
B.4.3.1 Chi-Square Distribution	215
B.4.3.2 Student's t Distribution	216
B.4.3.3 Beta Distribution	216
B.4.3.4 Dirichlet Distribution	217
B.5 Conjugate Distributions	217
B.6 Further Reading	218
C A Note about Bayesian Networks	219
C.1 Bayesian Networks and Bayesian Statistics	219
Glossary	221
Solutions	227
Bibliography	251
Index	257
