

Contents

1	Introduction: History, Assumptions, and Approaches	1
1.1	What Is Ecophysiology?	1
1.2	The Roots of Ecophysiology	1
1.3	Physiological Ecology and the Distribution of Organisms	2
1.4	Time Scale of Plant Response to Environment	5
1.5	Conceptual and Experimental Approaches	7
1.6	New Directions in Ecophysiology	8
1.7	The Structure of the Book	8
	References	9
2	Photosynthesis, Respiration, and Long-Distance Transport:	
	Photosynthesis	11
2.1	Introduction	11
2.2	General Characteristics of the Photosynthetic Apparatus . . .	11
2.2.1	The 'Light' and 'Dark' Reactions of Photosynthesis	11
2.2.2	Supply and Demand of CO ₂ in the Photosynthetic Process	18
2.3	Response of Photosynthesis to Light	28
2.3.1	The Light Climate Under a Leaf Canopy	28
2.3.2	Physiological, Biochemical, and Anatomical Differences Between Sun and Shade Leaves	29
2.3.3	Effects of Excess Irradiance	39
2.3.4	Responses to Variable Irradiance	47
2.4	Partitioning of the Products of Photosynthesis and Regulation by Feedback	51
2.4.1	Partitioning Within the Cell	51
2.4.2	Short-Term Regulation of Photosynthetic Rate by Feedback	52
2.4.3	Sugar-induced Repression of Genes Encoding Calvin-Benson-Cycle Enzymes	56
2.4.4	Ecological Impacts Mediated by Source-Sink Interactions	56
2.4.5	Petiole and Stem Photosynthesis	59

2.5	Responses to Availability of Water	59
2.5.1	Regulation of Stomatal Opening	59
2.5.2	The A_n-C_c Curve as Affected by Water Stress . . .	61
2.5.3	Carbon-Isotope Fractionation in Relation to Water-Use Efficiency	61
2.5.4	Other Sources of Variation in Carbon-Isotope Ratios in C_3 Plants	64
2.6	Effects of Soil Nutrient Supply on Photosynthesis	65
2.6.1	The Photosynthesis-Nitrogen Relationship	65
2.6.2	Interactions of Nitrogen, Light, and Water	66
2.6.3	Photosynthesis, Nitrogen, and Leaf Life Span . . .	67
2.7	Photosynthesis and Leaf Temperature: Effects and Adaptations	67
2.7.1	Effects of High Temperatures on Photosynthesis . . .	67
2.7.2	Effects of Low Temperatures on Photosynthesis . . .	70
2.8	Effects of Air Pollutants on Photosynthesis	71
2.9	C_4 Plants	72
2.9.1	Introduction	72
2.9.2	Biochemical and Anatomical Aspects	73
2.9.3	Intercellular and Intracellular Transport of Metabolites of the C_4 Pathway	76
2.9.4	Photosynthetic Efficiency and Performance at High and Low Temperatures	76
2.9.5	C_3-C_4 Intermediates	80
2.9.6	Evolution and Distribution of C_4 Species	82
2.9.7	Carbon-Isotope Composition of C_4 Species	84
2.9.8	Growth Rates of C_4 Species	84
2.10	CAM Plants	85
2.10.1	Introduction	85
2.10.2	Physiological, Biochemical, and Anatomical Aspects	86
2.10.3	Water-Use Efficiency	91
2.10.4	Incomplete and Facultative CAM Plants	91
2.10.5	Distribution and Habitat of CAM Species	93
2.10.6	Carbon-Isotope Composition of CAM Species . . .	93
2.11	Specialized Mechanisms Associated with Photosynthetic Carbon Acquisition in Aquatic Plants	93
2.11.1	Introduction	93
2.11.2	The CO_2 Supply in Water	94
2.11.3	The Use of Bicarbonate by Aquatic Macrophytes	95
2.11.4	The Use of CO_2 from the Sediment	96
2.11.5	Crassulacean Acid Metabolism (CAM) in Aquatic Plants	97
2.11.6	Carbon-Isotope Composition of Aquatic Plants . . .	97
2.11.7	The Role of Aquatic Plants in Carbonate Sedimentation	99

2.12	Effects of the Rising CO ₂ Concentration in the Atmosphere	100
2.12.1	Acclimation of Photosynthesis to Elevated CO ₂ Concentrations	102
2.12.2	Effects of Elevated CO ₂ on Transpiration - Differential Effects on C ₃ , C ₄ , and CAM Plants	103
2.13	Summary: What Can We Gain from Basic Principles and Rates of Single-Leaf Photosynthesis?	103
	References	104
3	Photosynthesis, Respiration, and Long-Distance Transport:	
	Respiration	115
3.1	Introduction	115
3.2	General Characteristics of the Respiratory System	115
3.2.1	The Respiratory Quotient	115
3.2.2	Glycolysis, the Pentose Phosphate Pathway, and the Tricarboxylic (TCA) Cycle	117
3.2.3	Mitochondrial Metabolism	118
3.2.4	A Summary of the Major Points of Control of Plant Respiration	121
3.2.5	ATP Production in Isolated Mitochondria and <i>in Vivo</i>	123
3.2.6	Regulation of Electron Transport <i>via</i> the Cytochrome and the Alternative Paths	125
3.3	The Ecophysiological Function of the Alternative Path	128
3.3.1	Heat Production	128
3.3.2	Can We Really Measure the Activity of the Alternative Path?	130
3.3.3	The Alternative Path as an Energy Overflow	133
3.3.4	NADH Oxidation in the Presence of a High Energy Charge	133
3.3.5	NADH Oxidation to Oxidize Excess Redox Equivalents from the Chloroplast	135
3.3.6	Continuation of Respiration When the Activity of the Cytochrome Path Is Restricted	136
3.3.7	A Summary of the Various Ecophysiological Roles of the Alternative Oxidase	136
3.4	Environmental Effects on Respiratory Processes	137
3.4.1	Flooded, Hypoxic, and Anoxic Soils	137
3.4.2	Salinity and Water Stress	140
3.4.3	Nutrient Supply	141
3.4.4	Irradiance	142
3.4.5	Temperature	146
3.4.6	Low pH and High Aluminum Concentrations	149
3.4.7	Partial Pressures of CO ₂	150
3.4.8	Effects of Nematodes and Plant Pathogens	151

3.4.9	Leaf Dark Respiration as Affected by Photosynthesis	152
3.5	The Role of Respiration in Plant Carbon Balance	153
3.5.1	Carbon Balance	153
3.5.2	Respiration Associated with Growth, Maintenance, and Ion Uptake	155
3.6	Plant Respiration: Why Should It Concern Us from an Ecological Point of View?	164
