<i>About the author</i>	x
<i>New to this edition</i>	xi
<i>Preface</i>	xii
<i>Acknowledgements</i>	xiii
1 Introduction to quantitative research	1
2 Experimental and quasi-experimental research	11
3 Designing non-experimental studies	28
4 Validity, reliability and generalisability	53
5 Introduction to IBM SPSS Statistics and the data set	69
6 Univariate statistics	74
7 Bivariate analysis: comparing two groups	91
8 Bivariate analysis: looking at the relationship between two variables	113
9 Multivariate analysis: using regression models to look at the relationship between several predictors and one dependent variable	126
10 Using analysis of variance to compare more than two groups	156
11 Developing scales and measures: item and factor analysis	173
12 One step beyond: introduction to multilevel modelling and structural equation modelling	197
