Preface xi

1 Introduction to Cancer Biology	1
<i>Lea A. Harrington, David W. Cescon, Richard P. Hill, and Ian F. Tannock</i>	
2 Methods of Molecular Analysis	5
<i>Paul C. Boutros, Lea Harrington, and Thomas Kislinger</i>	
3 Epigenetics	51
<i>Kyaw Lwin Aung, Stanley Zhou, and Mathieu Lupien</i>	
4 Cancer Epidemiology	69
<i>Matthew T. Warkentin, Lidija Latifovic, Geoffrey Liu, and Rayjean J. Hung</i>	
5 Carcinogenesis	97
<i>Denis M. Grant</i>	
6 Cellular Signaling	113
<i>Lea A. Harrington</i>	
7 Oncogenes and Tumor-Suppressor Genes	139
<i>Previn Dutt and Vuk Stambolic</i>	
8 Cell Proliferation and Death	163
<i>Kelsie L. Thu, David W. Cescon, and Razqallah Hakem</i>	
9 Genomic Stability and DNA Repair	193
<i>Gaillaume Laflamme, Yahya Benslimane, and Damien D'Amours</i>	
10 Tumor Progression and Metastasis	223
<i>Virginie Defamie and Rama Khokha</i>	
11 Angiogenesis	247
<i>Janusz Rak and Urban Emmenegger</i>	
12 Tumor Growth, Microenvironment, Metabolism, and Hypoxia	275
<i>Neesha Dhani, Richard P. Hill, and Ian F. Tannock</i>	

13 Cancer Heterogeneity	305
<i>Craig Gedye</i>	
14 Imaging in Oncology	329
<i>Mattea L. Welch and David A. Jaffray</i>	
15 Molecular and Cellular Basis of Radiotherapy	349
<i>Marianne Koritzinsky and Scott V. Bratman</i>	
16 Tumor and Normal Tissue Response to Radiotherapy	369
<i>Scott V. Bratman and Marianne Koritzinsky</i>	
17 Discovery and Evaluation of Anticancer Drugs	403
<i>Kyaw Lwin Aung, David W. Cescon, and Aaron D. Schimmer</i>	
18 Anticancer Chemotherapy, Pharmacology, and Mechanisms of Resistance	429
<i>Eric Chen and Ian F. Tannock</i>	
19 Molecular Targeted Therapies	461
<i>Zachary Veitch and Philippe L. Bedard</i>	
20 Hormones and Cancer	487
<i>Nathan Lack and Etienne Leygue</i>	
21 The Immune System and Immunotherapy	515
<i>Samuel D. Saibil, Ben X. Wang, and Marcus O. Butler</i>	
22 Guide to Clinical Studies	547
<i>Eitan Amir</i>	
Index	573
