

Contents

1. Introduction	1
1. Introduction	1
2. Market analysis of recycled materials	22
3. Conclusions	23
References	23
2. Environmental impacts of recycling	27
1. Introduction	27
2. Toxic materials and sources	28
3. Heavy metals	29
4. Heavy metals and their toxicity mechanisms	30
5. Toxic compounds	36
6. Handling of toxic materials	36
7. Storing toxic materials	39
8. Transporting toxic materials	40
9. Reusing toxic materials	42
10. Conclusions	44
References	44
3. Wet and dry recycling processes	49
1. Introduction	49
2. Dry recycling processes	51
3. Wet recycling processes	60

4. Conclusions	66
References	66

4. Recycling and reusing of papers	69
1. Introduction	69
2. Paper recycling facts	73
3. Processing of recycled paper	75
4. Properties of fibers from recovered paper	76
5. Paper aging and degradation	78
6. Hazardous substance in recycled paper	79
7. Conclusions	80
References	81

5. Recycling and reusing of construction materials	85
1. Introduction	85
2. Waste materials in construction	87
3. Construction waste recycling	90
4. Construction waste minimization	100
5. Conclusions	101
References	102

6. Recycling and reusing of glasses and ceramics	105
1. Introduction	105
2. Glass recycling facts	106
3. Glass recycling statistics	107
4. Glass and ceramic recycling: challenges and opportunities	107
5. Processing of recycled glasses and ceramics	110

6.	Advantages and disadvantages of recycling glass and ceramics	113
7.	Advanced uses of recycled glasses and ceramics	115
8.	Conclusions	116
	References	116
7.	Recycling and reusing of polymers and plastics	119
1.	Introduction	119
2.	Hierarchy of waste management	121
3.	Mechanical and chemical recycling	123
4.	Applications of recycled thermoplastics	136
5.	Conclusions	137
	References	138
8.	Recycling and reusing of thermoplastic and thermoset composites	141
1.	Introduction	141
2.	Recycling techniques for thermoset and thermoplastic	142
3.	Literature review	145
4.	Recent recycling results and discussion	153
5.	Conclusions	159
	References	160
9.	Recycling and reusing of metals and alloys	163
1.	Introduction	163
2.	Processes for recycling scrap ferrous materials	167
3.	Relationship between recycling and environment	174
4.	New establishments	175

5. Conclusions	176
References	177
10. Recycling and reusing of nonferrous metals	181
1. Introduction	181
2. Technology for recycling nonferrous metals	183
3. Benefit of recycling and reusing nonferrous metals	184
4. Recycling strategy of some nonferrous metals	188
5. Conclusions	193
References	194
11. Recycling of electronic wastes	197
1. Introduction	197
2. Human toxicity of hazardous substances in e-waste	200
3. Environmental impacts of e-waste through treatment processes	201
4. Landfill disposal	201
5. Recycling of e-waste	202
6. Mechanical recycling techniques	204
7. Electromechanical separation process	205
8. Chemical recycling techniques	207
9. Thermal recycling processes	208
10. Conclusions	209
References	209
12. Recycling and reusing of used lubricating oils	213
1. Introduction	213
2. Recycling of used oil	222

3. Conclusions	231
References	232
13. Recycling and reusing of aircraft	233
1. Introduction	233
2. Recent progress in aircraft recycling	235
3. Aircraft Fleet Recycling Association	237
4. Process of advanced management of end-of-life aircraft	239
5. Aircraft materials and parts	241
6. Economy and social impacts	248
7. Challenges for cost-effective recycling	250
8. Impacts from different perspectives	251
9. Conclusions	252
References	253
14. Applications of nanotechnology in recycling	255
1. Introduction	255
2. Safety concerns of nanotechnology and recycling	260
3. Recycling of nanomaterials	265
4. Conclusions	271
References	271
Further reading	274
15. Treatment of radioactive waste	275
1. Introduction	275
2. Types of nuclear wastes	276
3. Effects of radioactive waste	278

4.	Fundamental principles of radioactive waste management	280
5.	Treatment of radioactive waste	284
6.	Treatment of radioactive organic liquid	286
7.	Treatment of solid waste	288
8.	Electrochemical treatment of radioactive waste	288
9.	Conclusions	292
	References	293
