SECTION 1 Functionalized nanomaterials (FNMs) and the Environment

1. Functionalized polymeric nanomaterials for environmental remediation 3

Adnan Khan, Sahinur Rahman, Sumeet Malik, Nisar Ali, Yong Yang, Cao Zhou,
Ye Wenjie, Muhammad Bilal

1.1 Introduction 3

1.2 Miscellaneous materials being used as sorbents 5

1.3 Polymer-functionalized NMs 6

1.4 Conducting polymers-functionalized NMs as sorbents for contaminants removal 7

1.5 Molecularly Imprinted Polymers (MMIPs) as sorbents for contaminants removal 8

1.6 Other functionalized NMs and NMs composites 14

1.7 Conclusion 20

Acknowledgment 20

Conflict of Interest 20

References 20

2. Functionalized nanomaterials and the environment 29

Sirajunnisa Abdul Razack, Surendhiran Duraiarasan, Geethalakshmi Ramakrishnan,
Chaudhery Mustansar Hussain

2.1 Introduction 29

2.2 Nanomaterials 30

2.3 Functional nanomaterials 31

2.4 Functional nanomaterials in environment 34

2.5 Negative impacts of functional nanomaterials in environment 43

2.6 Conclusion and future prospects of FNMs 46

References 48

SECTION 2 Functionalized nanomaterials (FNMs) manufacturing

3. Graphene-functionalized carbon/glass fiber reinforced polymer nanocomposites: fabrication and characterization for manufacturing applications 57

Jogendra Kumar, Rajesh Kumar Verma, Prateek Khare

3.1 Introduction 57

3.2 Graphene oxide 63

3.3 Polymer nanocomposite reinforced by GO-fiber (carbon/glass) composite 68

3.4 Potential application of GO—fiber polymer nanocomposites	72
3.5 Conclusion and future scope	73
Acknowledgment	74
Important Websites	74
References	74

SECTION 3 Functionalized nanomaterials (FNMs) & Their Exposures Settings

4. NanoSolveIT integration of tools for assessment of human and environmental exposure to nanomaterials	81
Nikolaos Cheimarios, Sam Harrison, Alexander C.Ø Jensen, Pantelis Karatzas, Andreas Tsoumanis, Philip Doganis, Periklis Tsiros, David A. Winkler, Stephen Lofts, Keld A. Jensen, Haralambos Sarimveis, Antreas Afantitis, Iseult Lynch, Georgia Melagraki	
4.1 Introduction	81
4.2 Implementation of the multibox model for assessment of occupational exposure to NMs	83
4.3 Environmental modeling with NanoSolveIT using the NanoFASE water-soil-organism model	92
4.4 Case studies—links to associated training materials	103
4.5 Discussion	108
4.6 Conclusions	111
Acknowledgments	111
Important Websites	111
Appendix—Moda Templates for the Nanosolveit Human and Environmental Exposure Models	112
References	117
5. Toxicity of functionalized nanoparticles: current trends and emerging challenges	121
Himani Medhi, Priyadarshi Roy Chowdhury, Krishna G. Bhattacharyya, Chaudhery Mustansar Hussain	
5.1 Introduction	121
5.2 Candidates for NPs	124
5.3 Functionalization of NPs	127
5.4 Functionalized NPs for biomedical applications	132
5.5 Functionalized NPs in forensic applications	135
5.6 Functionalized NPs in environmental application	135
5.7 Toxicity of functionalized NPs	141
5.8 Emerging challenges in nanotechnology	147
5.9 Conclusions	149
References	149

SECTION 4 Environmental Fate, Transport, and Human Health Hazards of Functionalized nanomaterials (FNMs)

6. Fate and disposition of functionalized nanomaterial <i>in vivo</i>: implication in human health risk assessment	165
Manisha Bhatneria, C. Yahavi, Anushka Pandey, Shiv Singh, Sheelendra Pratap Singh	
6.1 Introduction	165
6.2 Biological disposition of nanomaterials	167
6.3 Biological interaction of nanomaterials	181
6.4 Tools to extrapolate disposition of nanomaterials across different species	186
6.5 Concluding remarks	190
Conflict of interest	191
Acknowledgements	191
References	191

SECTION 5 Bioavailability of Functionalized nanomaterials (FNMs) in Terrestrial Environments

7. Functionalized nanomaterials (FNMs) in terrestrial environments: a critical review from bioavailability perspective	199
Surendhiran Duraiarasan, Sirajunnisa Abdul Razack, Geethalakshmi Ramakrishnan, Lin Lin, Haying Cui, Chaudhery Mustansar Hussain	
7.1 Introduction	199
7.2 Bioavailability and influence of FNMs on terrestrial ecosystems	200
7.3 Implications of FNMs on terrestrial environment	207
7.4 Conclusion and future prospects	210
References	210

SECTION 6 Occupational Health Hazards of Functionalized nanomaterials (FNMs)

8. Occupational health hazards of functionalized nanomaterials (FNMs)	221
Ayushi Gautam, Vineet Kumar, Praveen Guleria	
8.1 Introduction	221
8.2 Health hazards of FNMs	223
8.3 Carbon-based FNM	224
8.4 Metal- and metal oxide-based FNMs	225
8.5 Polymeric FNMs: dendrimers	226
8.6 Risk assessment and management of FNM health hazards	226
8.7 Conclusion	228
Acknowledgments	229
References	229

SECTION 7 Life Cycle Environmental Implications of Functionalized nanomaterials (FNMs)

9. On risks and benefits of nanotechnology: the case of medical applications 235

Di Sia Paolo

9.1 Introduction 235

9.2 Nanotoxicology and responsible development for nanotechnology 237

9.3 Magnetic NPs 237

9.4 Theranostics: medical applications, diagnosis, treatment 241

9.5 On drug delivery and toxicity 244

9.6 Conclusions 247

References 248

10. Life cycle environmental implications of functionalized nanomaterials 251

Surendhiran Duraiarasan, Sirajunnisa Abdul Razack, Geethalakshmi Ramakrishnan,
Chaudhery Mustansar Hussain

10.1 Introduction 251

10.2 Necessitate of functionalizing nanomaterials 252

10.3 Implication of functional nanomaterials on the environment 254

10.4 LCA of functionalized NPs 262

10.5 Conclusion 262

References 263

SECTION 8 Monitoring and Sampling of Functionalized nanomaterials (FNMs)

11. Monitoring and sampling of functionalized nanomaterials (FNMs) 267

Gustavo Marques da Costa, Chaudhery Mustansar Hussain

11.1 Introduction 267

11.2 Sampling of functionalized nanoparticles 269

11.3 Monitoring of FNMs 273

11.4 Final considerations 276

Websites 277

References 277

SECTION 9 Risk Assessment & Risk management of Functionalized nanomaterials (FNMs)

12. Evaluation of the risk and benefit of using functionalized nanomaterials as contrast agents in image-guided radiotherapy: a Monte Carlo study on the imaging dose and contrast enhancement 281

James Chun Lam Chow

12.1 Introduction 281

12.2 Radiotherapy 283

12.3	Risk and benefit prediction in nanoparticle-enhanced image-guided radiotherapy using kV-CBCT	290
12.4	Risk and benefit evaluation in nanoparticle-enhanced image-guided radiotherapy using kV-CBCT	294
12.5	Conclusion	304
	Acknowledgment	304
	References	305
13.	Risk assessment and risk management of functionalized nanomaterials	309
	Bensu Karahalil	
13.1	Introduction	309
13.2	Risk assessment	312
13.3	Some issues to be addressed for risk assessment of nanomaterials	313
13.4	Exposure routes	314
13.5	Distribution	315
13.6	<i>In-vitro</i> approaches	315
13.7	Hazard consideration	315
13.8	Limited or lack of data should be completed with the followings	316
13.9	Conclusion for the risk assessment	316
13.10	Research needs	317
13.11	Nanomaterial characterization	317
13.12	Human exposure determination	317
13.13	Identification of human hazards	318
13.14	Environmental exposure	318
13.15	Environmental hazards	318
	References	319
 SECTION 10 Modern Policy & Decision making about Functionalized nanomaterials (FNMs)		
14.	Modern policy & decision-making process in the sphere of nanotechnology	323
	Surendhiran Duraiarasan, Sirajunnisa Abdul Razack, Geethalakshmi Ramakrishnan, Chaudhery Mustansar Hussain	
14.1	Introduction	323
14.2	Necessity for regulation of nanotechnology	324
14.3	Nanopolicy at international level	325
14.4	Nano ethics and publics	332
14.5	Conclusions	334
	References	334

SECTION 11 Future: Green & Sustainable Functionalized nanomaterials (FNMs)		
15. Carbohydrate-derived functionalized nanomaterials for drug delivery and environment remediation		339
Manita Das, Falguni Shukla, Sonal Thakore		
15.1 Introduction		339
15.2 Types of carbohydrate derivatives		339
15.3 Types of hybrid materials		341
15.4 Carbohydrates for designing sustainable materials in drug delivery		344
15.5 Carbohydrates for designing sustainable materials in environmental remediation		352
15.6 Conclusion		360
Websites		361
References		361
16. The economic contributions of nanotechnology to green and sustainable growth		365
Pragnesh N Dave, Shalini Chaturvedi		
16.1 Introduction		365
16.2 Nanoeconomics		366
16.3 Green and sustainable growth through economics contributions of nanotechnology		368
16.4 Nanotechnology: definition, uses, and applications		369
16.5 Biomedical applications		375
16.6 Nanotechnology in agricultural and food production		375
16.7 Summary		378
References		379
