

# Contents

Preface ix

## 1 INTRODUCTION: STRUCTURE AND PHYSIOLOGICAL CONTROL SYSTEMS 1

### Exercise 1.1 Microscopic Examination of Cells 2

- A. The Inverted Image 2
- B. The Metric System: Estimating the Size of Microscopic Objects 3
- C. Microscopic Examination of Cheek Cells 5
- D. Cell Structure and Cell Division 5

### Exercise 1.2 Microscopic Examination of Tissues and Organs 13

- A. Epithelial Tissue 13
- B. Connective Tissues 16
- C. Muscle Tissue 18
- D. Nervous Tissue 18
- E. An Organ: The Skin 20

### Exercise 1.3 Homeostasis and Negative Feedback 25

- A. Negative Feedback Control of Water Bath Temperature 26
- B. Resting Pulse Rate: Negative Feedback Control and Normal Range 26

## 2 CELL FUNCTION AND BIOCHEMICAL MEASUREMENTS 33

### Exercise 2.1 Measurements of Plasma Glucose, Cholesterol, and Protein 34

- A. Carbohydrates: Measurement of Plasma Glucose Concentration 37
- B. Lipids: Measurement of Plasma Cholesterol Concentration 38
- C. Proteins: Measurement of Plasma Protein Concentration 39

### Exercise 2.2 Thin-Layer Chromatography of Amino Acids 49

### Exercise 2.3 Electrophoresis of Serum Proteins 53

### Exercise 2.4 Measurements of Enzyme Activity 59

- A. Catalase in Liver 61
- B. Measurement of Alkaline Phosphatase in Serum 61
- C. Measurement of Lactate Dehydrogenase in Serum 61

### Exercise 2.5 Genetic Control of Metabolism 67

- A. Phenylketonuria 69
- B. Alkaptonuria 69
- C. Cystinuria 69

### Exercise 2.6 Diffusion, Osmosis, and Tonicity 73

- A. Solubility of Compounds in Polar and Nonpolar Solvents 74
- B. Osmosis across an Artificial Semipermeable Membrane 74
- C. Concentration and Tonicity 76

## 3 THE NERVOUS SYSTEM AND SENSORY PHYSIOLOGY 83

### Exercise 3.1 Recording the Nerve Action Potential 84

### Exercise 3.2 Electroencephalogram (EEG) 93

### Exercise 3.3 Reflex Arc 101

- A. Tests for Spinal Nerve Stretch Reflexes 101
- B. A Cutaneous Reflex: The Plantar Reflex and Babinski's Sign 103

### Exercise 3.4 Cutaneous Receptors and Referred Pain 107

- A. Mapping the Temperature and Touch Receptors of the Skin 107
- B. The Two-Point Threshold in Touch Perception 109
- C. Adaptation of Temperature Receptors 110
- D. Referred Pain 110

### Exercise 3.5 Eyes and Vision 117

- A. Refraction: Test for Visual Acuity and Astigmatism 117
- B. Accommodation 119

- C. Extrinsic Muscles of the Eye and Nystagmus 120
- D. Pupillary Reflex 120
- E. Examination of the Eye with an Ophthalmoscope 121
- F. The Blind Spot 122
- G. The Afterimage 123
- H. Color Vision and Color Blindness 124

**Exercise 3.6 Ears: Cochlea and Hearing 127**

- A. Conduction of Sound Waves through Bone: Rinne's and Weber's Tests 127
- B. Binaural Localization of Sound 129

**Exercise 3.7 Ears: Vestibular Apparatus—Balance and Equilibrium 133**

**Exercise 3.8 Taste Perception 139**

# 4

## THE ENDOCRINE SYSTEM 145

**Exercise 4.1 Histology of the Endocrine Glands 148**

- A. Ovary 149
- B. Testis 150
- C. Pancreatic Islets (of Langerhans) 151
- D. Adrenal Gland 151
- E. Thyroid 152
- F. Pituitary Gland 153

**Exercise 4.2 Thin-Layer Chromatography of Steroid Hormones 159**

- A. Steroid Hormones 159
- B. Thin-Layer Chromatography 162

**Exercise 4.3 Insulin Shock 167**

# 5

## SKELETAL MUSCLES 171

**Exercise 5.1 Neural Control of Muscle Contraction 173**

- A. Frog Muscle Preparation and Stimulation 175
- B. Stimulation of a Motor Nerve 178

**Exercise 5.2 Summation, Tetanus, and Fatigue 183**

- A. Twitch, Summation, Tetanus, and Fatigue in the Gastrocnemius Muscle of the Frog 184
- B. Twitch, Summation, and Tetanus in Human Muscle 184

**Exercise 5.3 Electromyogram (EMG) 191**

- A. Electromyogram Recording 193
- B. Biofeedback and the Electromyograph 194

# 6

## BLOOD GAS TRANSPORT, IMMUNITY, AND CLOTTING FUNCTIONS 201

**Exercise 6.1 Red Blood Cell Count, Hemoglobin and Oxygen Transport 203**

- A. Red Blood Cell Count 204
- B. Hematocrit 206
- C. Hemoglobin Concentration 206
- D. Calculation of Mean Corpuscular Volume (MCV) and Mean Corpuscular Hemoglobin Concentration (MCHC) 207

**Exercise 6.2 White Blood Cell Count, Differential, and Immunity 213**

- A. Total White Blood Cell Count 214
- B. Differential White Blood Cell Count 215

**Exercise 6.3 Blood Types 221**

- A. The Rh Factor 221
- B. The ABO Antigen System 223

**Exercise 6.4 Blood Clotting System 227**

- A. Test for Prothrombin Time 229
- B. Test for Activated Partial Thromboplastin Time (APTT) 229

# 7

## THE CARDIOVASCULAR SYSTEM 233

**Exercise 7.1 Effects of Drugs on the Frog Heart 235**

- A. Effect of Calcium Ions on the Heart 237
- B. Effect of Digitalis on the Heart 238
- C. Effect of Pilocarpine on the Heart 238
- D. Effect of Atropine on the Heart 238
- E. Effect of Potassium Ions on the Heart 239
- F. Effect of Epinephrine on the Heart 239
- G. Effect of Caffeine on the Heart 239
- H. Effect of Nicotine on the Heart 240

**Exercise 7.2 Electrocardiogram (ECG) 245**

**Exercise 7.3 Effects of Exercise on the Electrocardiogram 257**

**Exercise 7.4 Mean Electrical Axis of the Ventricles 261**

**Exercise 7.5 Heart Sounds 267**

- A. Auscultation of Heart Sounds with the Stethoscope 267
- B. Correlation of the Phonocardiogram with the Electrocardiogram 268

**Exercise 7.6 Measurements of Blood Pressure 275**

**Exercise 7.7 Cardiovascular System and Physical Fitness 281**

# 8

## RESPIRATION AND METABOLISM 287

### Exercise 8.1 Measurements of Pulmonary Function 288

- A. Measurement of Simple Lung Volumes and Capacities 292
- B. Measurement of Forced Expiratory Volume 298

### Exercise 8.2 Effect of Exercise on the Respiratory System 305

### Exercise 8.3 Oxyhemoglobin Saturation 311

### Exercise 8.4 Respiration and Acid-Base Balance 319

- A. Ability of Buffers to Stabilize the pH of Solutions 320
- B. Effect of Exercise on the Rate of CO<sub>2</sub> Production 322
- C. Role of Carbon Dioxide in the Regulation of Ventilation 322

# 9

## RENAL FUNCTION AND HOMEOSTASIS 327

### Exercise 9.1 Renal Regulation of Fluid and Electrolyte Balance 329

### Exercise 9.2 Renal Plasma Clearance of Urea 335

### Exercise 9.3 Clinical Examination of Urine 341

- A. Test for Proteinuria 341
- B. Test for Glycosuria 342
- C. Test for Ketonuria 342
- D. Test for Hemoglobinuria 342
- E. Test for Bilirubinuria 343
- F. Microscopic Examination of Urine Sediment 343

# 10

## DIGESTION AND NUTRITION 351

### Exercise 10.1 Histology of the Gastrointestinal Tract, Liver, and Pancreas 353

- A. Esophagus and Stomach 353
- B. Small Intestine and Large Intestine 355

- C. Liver 357
- D. Pancreas 358

### Exercise 10.2 Digestion of Carbohydrate, Protein, and Fat 363

- A. Digestion of Carbohydrate (Starch) by Salivary Amylase 363
- B. Digestion of Protein (Egg Albumin) by Pepsin 364
- C. Digestion of Triglycerides by Pancreatic Juice and Bile 366

### Exercise 10.3 Nutrition Assessment, BMR, and Body Composition 375

- A. Body Composition Analysis 375
- B. Energy Intake and the Three-Day Dietary Record 377
- C. Energy Output: Estimates of the BMR and Activity 378

# 11

## REPRODUCTIVE SYSTEM 387

### Exercise 11.1 Ovarian Cycle as Studied Using a Vaginal Smear of the Rat 389

### Exercise 11.2 Human Chorionic Gonadotropin and the Pregnancy Test 395

### Exercise 11.3 Patterns of Heredity 401

- A. Sickle-Cell Anemia 402
- B. Inheritance of PTC Taste 402
- C. Sex-Linked Traits: Inheritance of Color Blindness 402

## Appendix 1

Basic Chemistry 407

## Appendix 2

Sources of Equipment and Solutions 411

## Appendix 3

Multimedia Correlations to the Laboratory Exercises 413

Credits 415

Index 417
