

# Contents

## SECTION I

### Fuel Metabolism 1

- 1 Metabolic Fuels and Dietary Components 3
- 2 The Fed or Absorptive State 25
- 3 Fasting 36

## SECTION II

### Chemical and Biologic Foundations of Biochemistry 49

- 4 Water, Acids, Bases, and Buffers 51
- 5 Structures of the Major Compounds of the Body 67
- 6 Amino Acids in Proteins 87
- 7 Structure–Function Relationships in Proteins 107
- 8 Enzymes as Catalysts 136
- 9 Regulation of Enzymes 159
- 10 Cell Structure and Signaling by Chemical Messengers 180
- 11 Structure of the Nucleic Acids 212

## SECTION III

### Gene Expression and the Synthesis of Proteins 231

- 12 Synthesis of DNA 233
- 13 Transcription: Synthesis of RNA 256
- 14 Translation: Synthesis of Proteins 279
- 15 Regulation of Gene Expression 299
- 16 Use of Recombinant DNA Techniques in Medicine 324
- 17 The Molecular Biology of Cancer 352
- 18 An Introduction to Human Genetics 380

## SECTION IV

### Carbohydrate Metabolism, Fuel Oxidation, and the Generation of Adenosine Triphosphate 407

- 19 Basic Concepts in the Regulation of Fuel Metabolism by Insulin, Glucagon, and Other Hormones 414

- 20** Cellular Bioenergetics: Adenosine Triphosphate and O<sub>2</sub> 433
- 21** Digestion, Absorption, and Transport of Carbohydrates 455
- 22** Generation of Adenosine Triphosphate from Glucose, Fructose, and Galactose: Glycolysis 475
- 23** Tricarboxylic Acid Cycle 499
- 24** Oxidative Phosphorylation and Mitochondrial Function 522
- 25** Oxygen Toxicity and Free-Radical Injury 546
- 26** Formation and Degradation of Glycogen 568
- 27** Pentose Phosphate Pathway and the Synthesis of Glycosides, Lactose, Glycoproteins, and Glycolipids 587
- 28** Gluconeogenesis and Maintenance of Blood Glucose Levels 612

## SECTION V

### Lipid Metabolism 637

- 29** Digestion and Transport of Dietary Lipids 640
- 30** Oxidation of Fatty Acids and Ketone Bodies 654
- 31** Synthesis of Fatty Acids, Triacylglycerols, and the Major Membrane Lipids 679
- 32** Cholesterol Absorption, Synthesis, Metabolism, and Fate 716
- 33** Metabolism of Ethanol 755
- 34** Integration of Carbohydrate and Lipid Metabolism 773

## SECTION VI

### Nitrogen Metabolism 791

- 35** Protein Digestion and Amino Acid Absorption 794
- 36** Fate of Amino Acid Nitrogen: Urea Cycle 808
- 37** Synthesis and Degradation of Amino Acids 827
- 38** Tetrahydrofolate, Vitamin B<sub>12</sub>, and S-Adenosylmethionine 849
- 39** Purine and Pyrimidine Metabolism 867
- 40** Intertissue Relationships in the Metabolism of Amino Acids 885

## SECTION VII

### Tissue Metabolism 907

- 41** Actions of Hormones That Regulate Fuel Metabolism 909
- 42** The Biochemistry of Erythrocytes and Other Blood Cells 934
- 43** Blood Plasma Proteins, Coagulation, and Fibrinolysis 960
- 44** Liver Metabolism 978
- 45** Metabolism of Muscle at Rest and during Exercise 1001
- 46** Metabolism of the Nervous System 1022
- 47** The Extracellular Matrix and Connective Tissue 1048
