

# CONTENTS

## **PART I PHYSICAL ACTIVITY, HEALTH, AND THE HUMAN BODY 1**

### **Chapter 1 Physical Activity Components and Health 3**

- Health and fitness defined 4
- Components of health-related fitness 6
- Exercise guidelines for improving health 16

### **Chapter 2 How the Body Adapts to Exercise 21**

- Effects of exercise on the body 21
- Influence of genetics on aerobic fitness 29
- Influence of gender on aerobic fitness 30
- Influence of age on aerobic fitness 31
- Detraining 33

## **PART II PHYSICAL ACTIVITY, DISEASE, AND DISABILITY 37**

### **Chapter 3 Coronary Heart Disease 39**

- What gives me the greatest risk of developing coronary heart disease? 42
- How does exercise prevent coronary heart disease? 45
- How much exercise is necessary to lower my risk of heart disease? 47
- If I have atherosclerosis, will exercise cure it? 48
- If I have coronary heart disease, will exercise cure it? 50
- Is there a risk of dying of a heart attack during exercise? 52

### **Chapter 4 Cancer 57**

- Can I avoid getting cancer if I exercise every day? Is exercise more effective at preventing some cancers than others? 60

- You've said that regular exercise lowers the risk of getting colon, prostate, breast, and female reproductive cancers. How? 62
- Can exercise help treat cancer once it is formed? 71

## **Chapter 5    Stroke** **75**

---

- If I exercise, am I less likely to have a stroke than if I don't exercise? 78
- If physical inactivity isn't a primary risk factor for stroke, why do you say exercise can help prevent strokes? 79
- If I exercise more intensely, does the risk of stroke go down more? 81
- Are the benefits of exercise in reducing stroke risk the same for women as for men? 83

## **Chapter 6    Diabetes** **85**

---

- If I exercise, will my chances of developing diabetes be lowered? 92
- My doctor said that because of my weight and poor diet I'm at risk for developing diabetes. What role does physical activity play in this whole mix? 95
- How does exercise affect my insulin and blood glucose levels? 96
- Of what value is regular exercise for the person with insulin-dependent diabetes? 96
- Are there potential risks for the individual with insulin-dependent diabetes who initiates an exercise program? 97
- Can I compete in sports if I have insulin-dependent diabetes? 99
- What does exercise do for people with noninsulin-dependent diabetes? 100
- Is there a "best" exercise program for people with diabetes? 101

## **Chapter 7    Osteoporosis** **105**

---

- Which is the best sporting activity I can undertake to reduce my risk of getting osteoporosis? 111
- How old is too old to benefit from exercise as a way to stop osteoporosis? 113
- I'm taking estrogen to prevent bone loss. If I exercise, can I stop taking the estrogen? 114

- What type of exercise program is most effective in treating osteoporosis? 115

## **Chapter 8 Arthritis 119**

---

- Can I exercise if I have arthritis? 124
- Can regular exercise keep my arthritis from getting worse? 126
- I've played sports and exercised for years. Has that increased my chances of getting arthritis? 128

## **Chapter 9 Low Back Pain 133**

---

- Is there a way to predict if I'm at risk for developing low back pain? 137
- I never scored very well on the fitness tests I took in school, including the strength and flexibility tests. Is it true that those predict future low back pain? 139
- Is it dangerous to exercise if I have a bad back? 139
- Will exercise help my back get better? 140

## **Chapter 10 Asthma 145**

---

- It seems logical to assume that exercise would trigger asthma attacks. Is that true? 150
- Can exercise-induced asthma be prevented or controlled? 151

## **Chapter 11 Infection and the Immune System 155**

---

- How does exercise affect my chances of getting a cold? 157
- Is there anything I can do to reduce the risk of infection when I'm training hard? 160
- Should I keep exercising if I am sick? 161
- Can HIV be transmitted during sports? 163
- Could exercise delay the development of AIDS in a person who is HIV positive? 166

## **Chapter 12 Cigarette Smoking 169**

---

- Does smoking affect how hard I can exercise? 173
- Will a regular exercise program help me quit smoking? 175
- Will I gain weight if I stop smoking? 176

- What benefits can I expect from exercising while quitting smoking? 177

## **Chapter 13 Blood Cholesterol 181**

---

- Does exercise specifically improve cholesterol levels, or do cholesterol levels improve as an indirect result of the weight loss and dietary changes that usually accompany an exercise program? 187
- Does exercise affect the cholesterol levels of men and women in the same way? 189
- How long do the benefits of exercise on cholesterol levels last? 190

## **Chapter 14 High Blood Pressure 193**

---

- If I exercise regularly, can I prevent high blood pressure or cure it if I have it? 198
- How long do I have to exercise before I see an improvement in my resting blood pressure? 200
- What type of exercise works best in lowering blood pressure? 200
- How does regular exercise lower the blood pressure? 201
- Is it safe for people with high blood pressure to exercise? 201

## **Chapter 15 Nutritional Habits 205**

---

- What does exercise have to do with the kind of food I eat? 211
- Should the diets of exercisers be any different from the diets of people who don't exercise? 213
- I've heard that bodybuilders and other athletes should eat more protein to build their muscles. Is that true? 215

## **Chapter 16 Sleep 217**

---

- Does exercise make people sleep better? 222
- Does sleep loss impair the ability to exercise? 224

## **Chapter 17 Weight Management 227**

---

- Can regular exercise prevent weight gain during adulthood? 232

- If I exercise while I diet, will I lose weight faster? 234
- Will exercise cause my body to burn calories for a long time after an exercise session? 237
- I know that my resting metabolism (RMR) gets lower when I diet. Will exercise help my RMR stay higher? 238
- I don't want to lose muscle weight or water weight when I diet. Will exercise help me avoid that? 239
- What are the chief benefits of exercise for weight loss? 239
- I've recently lost weight. How important is exercise in keeping the weight off? 240

## **Chapter 18 Stress Management 245**

---

- Do physically active and fit people have better psychological well-being than their sedentary peers? 250
- Can physically fit and active people handle stress better than those who are inactive? 252
- Does regular exercise improve psychological well-being and mood? 254
- Can regular exercise alleviate or prevent depression? 255
- Will I feel less tense if I exercise regularly? 257
- Can regular exercise improve self-esteem? 258
- Does regular exercise improve mental alertness and function? 259
- How does physical activity improve psychological health? 259

## **PART III PHYSICAL ACTIVITY AND THE LIFE CYCLE 263**

### **Chapter 19 Children and Youth 265**

---

- Should teenagers follow the same activity guidelines recommended for adults? 268
- Do children and youths respond to aerobic exercise programs similarly to adults? 268
- Is it safe for children and youths to lift weights? 269
- Should teenagers have a medical exam before participating in competitive sports? 270
- Does regular physical activity help children and youths avoid obesity? 271

- Are children who exercise at less risk of developing disease? 272
- Are active youths less likely to smoke and drink alcohol than inactive youths? 273
- Will an active child be an active adult? 274

## **Chapter 20 Special Issues for Women 277**

---

- Can women get as fit as men? 279
- Do women and men get the same health benefits from exercise? 280
- Can too much exercise be harmful to women? 281
- Is exercise safe for a pregnant woman and her baby? 283
- Do different phases of the menstrual cycle affect a woman's ability to exercise? 285
- Can exercise help relieve the symptoms of menopause? 286

## **Chapter 21 The Elderly 289**

---

- Is exercise as effective in helping older people stay lean as it is for younger people? 291
- Will a weight-training program help older people gain strength? 292
- Can aerobic training improve heart and lung fitness even in old age? 293
- Are there any special guidelines for aerobic exercise programs for elderly people? 295
- Do active people live longer? 295

## **Chapter 22 The Benefits of Regular Exercise 301**

---

- Index ..... 311
- About the Author ..... 317
