

## Content

Preface.....	5
1 Introduction.....	7
1.1 Global Derivatives Markets and Derivatives Classification.....	8
1.2 Derivatives Classification.....	11
1.3 Valuation of Derivatives.....	16
1.4 Hedging, Speculation, and Arbitrage with Derivatives.....	18
2 Forwards and Futures.....	23
2.1 Pricing of Forwards.....	23
2.2 Futures.....	32
3 Interest Rate Derivatives.....	50
3.1 Interest Rates.....	50
3.2 Interest Rate Forwards and Futures.....	58
3.3 Swaps.....	72
4 Option Markets, Valuation, and Hedging.....	84
4.1 Options Mechanics and Elementary Properties.....	84
4.2 Valuation of Options.....	99
4.3 Greek Letters and Hedging of Options.....	144
5 Market Risk Measurement and Management.....	156
5.1 Risk Management Responsibilities and Organization.....	156
5.2 Classical Market Risk Measures.....	160
5.3 Value at Risk.....	174
5.4 Risk-return optimization, economic, and regulatory capital.....	199
5.5 Counterparty Credit Risk.....	211
6 Stochastic Interest Rates and the Standard Market Model.....	227
6.1 Price of risk, numeraire, and the equivalent martingale measure.....	227
6.2 Black's Standard Market Model.....	241
6.3 Valuation of caps and floors, bond options, and swaptions.....	246
6.4 Quantos and convexity adjustments.....	257

7	Interest Rate Models .....	266
7.1	Short-Rate Models.....	266
7.2	Term-Structure Models.....	282
8	Exotic Options, Volatility Smile, and Alternative Stochastic Models .....	295
8.1	Exotic Options .....	295
8.2	Volatility smile .....	306
8.3	Alternative Stochastic Models.....	310
8.4	Stochastic volatility modeling and estimation.....	318
	Appendix: Infinitesimals and the Elementary Stochastic Calculus .....	347
	Literature .....	356
	Index.....	363
