Introduction xv

## PART ONE Fundamentals 1

### CHAPTER ONE Getting Started 3

1.1 Modules and Functions 4	1.2 The printf() Function 7	1.3 Programming Style 13	1.4 Common Programming Errors 17	1.5 Chapter Summary 18
-----------------------------	-----------------------------	--------------------------	----------------------------------	------------------------

### CHAPTER TWO Data Types, Declarations, and Displays 19

2.1 Data Types 20	Integer Values 20	Floating Point and Double Precision Numbers 21	Scientific Notation 21	Character Type 22	Escape Sequences 23
-------------------	-------------------	--	------------------------	-------------------	---------------------

2.2 Using and Using Addresses 23	2.3 Common Programming Errors 23	2.4 Chapter Summary 23	2.5 Appendix A: Data Types 23	2.6 Appendix B: Operators 23	2.7 Appendix C: Functions 23	2.8 Appendix D: Declarations 23	2.9 Appendix E: Numerical Results 23	2.10 Appendix F: Floating-Point Arithmetic 23	2.11 Appendix G: Input/Output 23	2.12 Appendix H: Memory 23	2.13 Appendix I: Data Structures 23	2.14 Appendix J: Functions 23	2.15 Appendix K: Numerical Results 23	2.16 Appendix L: Operators 23	2.17 Appendix M: Data Types 23	2.18 Appendix N: Operators 23	2.19 Appendix O: Functions 23	2.20 Appendix P: Numerical Results 23	2.21 Appendix Q: Data Structures 23	2.22 Appendix R: Debugging 23	2.23 Appendix S: Floating-Point Arithmetic 23	2.24 Appendix T: Memory 23	2.25 Appendix U: Data Types 23	2.26 Appendix V: Operators 23	2.27 Appendix W: Functions 23	2.28 Appendix X: Data Structures 23	2.29 Appendix Y: Debugging 23	2.30 Appendix Z: Numerical Results 23
----------------------------------	----------------------------------	------------------------	-------------------------------	------------------------------	------------------------------	---------------------------------	--------------------------------------	---	----------------------------------	----------------------------	-------------------------------------	-------------------------------	---------------------------------------	-------------------------------	--------------------------------	-------------------------------	-------------------------------	---------------------------------------	-------------------------------------	-------------------------------	---	----------------------------	--------------------------------	-------------------------------	-------------------------------	-------------------------------------	-------------------------------	---------------------------------------

- 2.2 Arithmetic Operators 25
  - Integer Division 26
  - A Unary Operator (Negation) 26
  - Operator Precedence and Associativity 26
- 2.3 Displaying Numerical Results 30
  - Formatted Output 32
  - Other Number Bases 34
- 2.4 Variables and Declarations 40
  - Declaration Statements as Definition Statements 46
- 2.5 Integer Qualifiers 51
  - Determining Storage Size 53
- 2.6 Common Programming Errors 54
- 2.7 Chapter Summary 55
- 2.8 Chapter Supplement: Bits, Bytes, Addresses, and Number Codes 56
  - Words and Addresses 57
  - Two's Complement Numbers 57

## CHAPTER THREE Assignments, Addresses, and Interactive Input 59

- 3.1 Assignment 60
  - Assignment Variations 64
  - Accumulating 65
  - Counting 66
- 3.2 Addresses 70
  - Storing Addresses 73
  - Using Addresses 74
  - Declaring Pointers 75
- 3.3 The `scanf()` Function 80
- 3.4 `scanf()` with Buffered Input 87
- 3.5 Named Constants 91
- 3.6 Common Programming Errors 95
- 3.7 Chapter Summary 96

## PART TWO Flow Of Control 99

---

### CHAPTER FOUR Selection 101

- 4.1 Relational Expressions 102
  - Logical Operators 104
- 4.2 The `if-else` Statement 107
  - Compound Statements 109
  - One-Way Selection 111
- 4.3 Nested `if` Statements 114
  - The `if-else` Chain 115
- 4.4 The `switch` Statement 121
- 4.5 Common Programming Errors 126
- 4.6 Chapter Summary 128

## CHAPTER FIVE Repetition 129

- 5.1 The while Statement 130
- 5.2 scanf() Within a while Loop 137
  - Sentinels 144
  - break and continue Statements 145
  - The Null Statement 146
- 5.3 The for Statement 148
  - scanf() Within a for Loop 154
  - Nested Loops 154
- 5.4 The do Statement 160
  - Validity Checks 162
- 5.5 Common Programming Errors 163
- 5.6 Chapter Summary 164

## PART THREE Modularity 165

### CHAPTER SIX Program Development 167

- 6.1 Analysis, Design, and Testing Phases 169
  - Analysis 172
  - Design 174
  - Testing 175
- 6.2 Algorithms 179
- 6.3 Other Program Considerations 182
- 6.4 Common Programming Errors 185
- 6.5 Chapter Summary 185

### CHAPTER SEVEN Writing Your Own Functions 187

- 7.1 Function and Argument Declarations 188
- 7.2 Returning Values 195
  - More on Returning Values (void Type) 201
- 7.3 Standard Library Functions 204
  - Input/Output Library Functions 205
  - Mathematical Library Functions 205
  - String Library Functions 208
  - Miscellaneous Routines 208
- 7.4 Variable Scope 211
  - Misuse of Globals 214
- 7.5 Variable Storage Class 217
  - Local Variable Storage Classes 218
  - Global Variable Storage Classes 221
- 7.6 Passing Addresses 225
  - Passing, Storing, and Using Addresses 226
- 7.7 Common Programming Errors 233
- 7.8 Chapter Summary 234

## PART FOUR Complex Data Types 237

---

### CHAPTER EIGHT Arrays 239

- 8.1 Single-Dimensional Arrays 240
  - Input and Output of Array Values 244
- 8.2 Array Initialization 247
- 8.3 Passing Arrays 250
- 8.4 Two-Dimensional Arrays 255
  - Larger-Dimensional Arrays 260
- 8.5 Common Programming Errors 261
- 8.6 Chapter Summary 262

### CHAPTER NINE Arrays, Addresses, and Pointers 263

- 9.1 Array Names as Pointers 264
- 9.2 Pointer Arithmetic 270
  - Pointer Initialization 274
- 9.3 Passing and Using Array Addresses 275
  - Advanced Pointer Notation 279
- 9.4 Common Programming Errors 283
- 9.5 Chapter Summary 286

### CHAPTER TEN Character Strings 287

- 10.1 String Fundamentals 288
  - String Input and Output 288
  - String Processing 290
  - Character-by-Character Input 292
- 10.2 Pointers and Library Functions 296
  - Library Functions 301
- 10.3 String Definitions and Pointer Arrays 304
  - Pointer Arrays 307
- 10.4 Formatting Strings 311
  - In-Memory String Conversions 312
  - Format Strings 313
- 10.5 Common Programming Errors 314
- 10.6 Chapter Summary 315

### CHAPTER ELEVEN Structures 317

- 11.1 Single Structures 318
- 11.2 Arrays of Structures 324
- 11.3 Passing and Returning Structures 328
  - Returning Structures 332
- 11.4 Linked Lists 335
- 11.5 Dynamic Storage Allocation 343
- 11.6 Unions 350
- 11.7 Common Programming Errors 353
- 11.8 Chapter Summary 354

---

## PART FIVE Additional Topics 355

---

### CHAPTER TWELVE Data Files 357

- 12.1 Declaring, Opening, and Closing Files 358
  - Opening a File 359
  - Closing a File 362
- 12.2 Reading and Writing Files 363
  - Standard Device Files 367
  - Other Devices 369
- 12.3 Random File Access 371
- 12.4 Passing and Returning File Names 374
- 12.5 Common Programming Errors 377
- 12.6 Chapter Summary 378
- 12.7 Chapter Supplement: Control Codes 379

### CHAPTER THIRTEEN Bit Operations 383

- 13.1 The AND Operator 384
- 13.2 The Inclusive OR Operator 386
- 13.3 The Exclusive OR Operator 387
- 13.4 The Complement Operator 388
- 13.5 Different-Size Data Items 389
- 13.6 The Shift Operators 390
- 13.7 Chapter Summary 393

### CHAPTER FOURTEEN Additional Capabilities 395

- 14.1 Expressions Revisited 396
  - Casts 398
  - Conditional Expressions 400
- 14.2 User-Specified Data Types 402
  - Enumerated Data Types 402
  - The `typedef` Statement 405
- 14.3 Defining Macros 406
- 14.4 Command Line Arguments 410
- 14.5 The `goto` Statement 416
- 14.6 Chapter Summary 417

### Appendixes 419

- A. Operator Precedence Table 420
- B. ASCII Character Codes 421
- C. Input, Output, and Standard Error Redirection 422

### Index 425
