

## PAPERS

- 93 **Design and optimization of squirrel cage geometries in aircraft engines toward robust whole engine dynamics**  
Chatzisavvas I., Arsenyev I., Grahnert R.
- 105 **A fundamental investigation of the interaction and impact of controlled torque ripples on gear mesh dynamics**  
Dave S., Neufond J., Nordmann R., Rinderknecht S.
- 121 **Oscillatory convection in viscoelastic ferrofluid layer: Linear and non-linear stability analyses**  
Dhiman J. S., Sood S.
- 141 **Adapting the control of the magnetic bearings of a highly flexible and gyroscopic rotor to the excitations by the motor**  
Franz D., Schüßler B., Rinderknecht S.
- 153 **Compressor cascade correlations modelling at design points using artificial neural networks**  
Kovář P., Fürst J.
- 169 **Numerical investigations on high-speed turbo-compressor rotor systems with air ring bearings: Nonlinear vibration behavior and optimization**  
Zeise P., Schweizer B.
