

CONTENTS

Preface	VII
Introduction	IX
Chapter 1 Using Python in labeling and field calculations	1
Tutorial 1-1 Python introduction and formatting labels	2
Tutorial 1-2 Decision making in the Label Expression dialog box	10
Tutorial 1-3 Using Python in the Field Calculator	17
Tutorial 1-4 Decision making in the Field Calculator	24
Tutorial 1-5 Working with Python date formats	31
Chapter 2 Writing stand-alone Python scripts	39
Special introduction: Working with Python	40
Tutorial 2-1 Creating describe objects	46
Tutorial 2-2 Scripting geoprocessing tasks	53
Tutorial 2-3 Coding for multiple geoprocessing tasks	62
Tutorial 2-4 Using while statements	69
Tutorial 2-5 Using lists and for statements	78
Tutorial 2-6 Building script tools	86
Tutorial 2-7 Using cursors	101
Tutorial 2-8 Combining loops	113
Tutorial 2-9 Creating custom toolbars	120
Chapter 3 The ArcPy mapping module	129
Tutorial 3-1 Accessing map document elements	129
Tutorial 3-2 Controlling the map extent	144
Tutorial 3-3 Creating a map series	158
Chapter 4 Python toolboxes	171
Tutorial 4-1 Creating a Python toolbox	171
Tutorial 4-2 Setting up value validation	184
Tutorial 4-3 Setting up dependencies	193

VI Contents

Chapter 5 Python add-ins	203
Special introduction: Python add-ins	204
Tutorial 5-1 Creating a Python add-in application	222
Tutorial 5-2 Using buttons and combo boxes	229
Tutorial 5-3 Using tools to interact with the map	242
Appendix A: Using an IDE for Python scripting	257
Appendix B: Tool index	263
Appendix C: Data source credits	269

Preface

Introduction

Chapter 1 Using Python in labeling and field calculations

Tutorial 1-1 Python introduction and formatting labels

Tutorial 1-2 Decision making in the label expression dialog box

Tutorial 1-3 Using Python in the Field Calculator

Tutorial 1-4 Decision making in the Field Calculator

Tutorial 1-5 Working with Python date formats

Chapter 2 Writing stand-alone Python scripts

Special introduction: Working with Python

Tutorial 2-1 Creating desktop objects

Tutorial 2-2 Scripting geoprocessing tasks

Tutorial 2-3 Coding for multiple geoprocessing tasks

Tutorial 2-4 Using while statements

Tutorial 2-5 Using for and for statements

Tutorial 2-6 Building script tools

Tutorial 2-7 Using cursors

Tutorial 2-8 Combining loops

Tutorial 2-9 Creating custom toolbars

Chapter 3 The ArcPy mapping module

Tutorial 3-1 Accessing map document elements

Tutorial 3-2 Controlling the map extent

Tutorial 3-3 Creating a map series

Chapter 4 Python toolbars

Tutorial 4-1 Creating a Python toolbar

Tutorial 4-2 Setting up value validation

Tutorial 4-3 Setting up dependencies
