	Foreword	vii
	List of figures	xii
	List of tables	xiv
	Preface	xv
	Introduction – Natural hazards and us	1
	What is a natural hazard?	1
	Natural hazards in history	3
	The psychological impact of natural disaster	7
	Coping with natural hazards	9
1	Biohazards — All creatures great and small	11
	Bacterial, viral, or protozoan hazards	12
	Microflora	13
	Macroflora	14
	Microfauna	16
	Macrofauna	17
	Conclusion	26

2	<i>Bushfire or wildfire — Apocalypse in our time</i>	28
	The phenomenon of wildfire	29
	Wildfire fuel	31
	<i>Fuel size</i>	31
	<i>Fuel arrangement</i>	31
	<i>Fuel quantity</i>	32
	<i>Fuel moisture content</i>	32
	<i>Fuel energy content</i>	33
	Fire behaviour	33
	Impacts of bushfires	35
	Fire management	41
	Conclusion	44
3	<i>Storms and their outcomes —</i>	
	<i>The restless atmosphere</i>	47
	Wind	48
	<i>Wind shear and microbursts</i>	50
	Tropical cyclones	51
	<i>Storm surge</i>	59
	<i>Storm waves and coastal erosion</i>	61
	Thunderstorms	64
	<i>Lightning</i>	67
	<i>Hail</i>	70
	Tornadoes	70
	Temperature extremes	72
	<i>High temperatures</i>	73
	<i>Low temperatures</i>	75
	<i>Blizzards, freezing rain, fog and frost</i>	76
	Conclusion	79
4	<i>Earthquakes, volcanoes and mass movement —</i>	
	<i>Terra non firma</i>	81
	Earthquakes	82
	<i>Measurement of earthquakes</i>	84
	<i>The impact of earthquakes</i>	84
	<i>Management of the earthquake hazard</i>	89
	Volcanoes	92
	<i>The management of volcanic hazards</i>	97
	Tsunami	98
	<i>The management of the tsunami hazard</i>	100

Mass movement phenomena	101
<i>Landslides</i>	101
<i>Avalanches</i>	101
Conclusion	103
5 <i>Floods — Water, water, everywhere ...</i>	105
Flood flows and their measurement	107
<i>Statistical methods</i>	110
<i>Empirical methods</i>	111
<i>Digital simulation methods</i>	112
Flood impacts and their assessment	112
Management of the flood hazard	115
<i>Modification of the flood hazard</i>	115
<i>Avoiding the flood hazard</i>	116
<i>Prevention or minimisation of loss from flood</i>	116
<i>Sharing of losses</i>	117
Conclusion	118
6 <i>Drought — ... and not a drop to drink</i>	120
The identification of drought	121
Impacts of drought	124
<i>Dust storms</i>	127
Management of drought	128
Conclusion	133
7 <i>A management model for natural hazards</i>	135
Extreme event analysis	136
Vulnerability analysis	138
Risk analysis	140
Response analysis	142
Decision analysis	143
An example application	144
<i>How cost–benefit analysis works</i>	148
<i>How multi-criteria analysis works</i>	149
Conclusion	151
Conclusion — <i>The outlook</i>	152
References	159
Index	172
