PREFACE	IX
<i>Chapter 1. CLIMATE OF THE SOUTH ATLANTIC OCEAN</i>	
by O. HÖFLICH	
Basic principles	1
Historical review	1
Climatology, 2—Synoptic meteorology, 3	
Problems of the data	5
Origin of data, 5—Problems inherent in the data, 6—Inhomogeneities, 6—Selected ocean areas, 8	
Fundamentals of climate	8
Climate-producing processes, 9—Planetary circulation, 10—Characteristics of marine climate, 11—Climate classification of the South Atlantic, 12	
Climatic elements	13
Air pressure	14
Mean pressure field, 14—Annual variation, 15—Variability, 16	
Wind	17
Wind speed, 17—Wind direction, 19—Wind roses, 21—Strong winds and gales, 22	
Oceanic elements	22
Sea and swell, 23— Ocean currents, 25—Subsurface conditions, 27	
Temperature	30
Sea surface temperature, 30—Air temperature over the ocean, 34—Air-sea temperature difference, 36	
Humidity	37
Vapour pressure, 38—Equivalent temperature, 39—Relative humidity, 40	
Visible weather phenomena	42
Cloudiness, 42—Visibility, 46—Precipitation frequencies, 47—Thunderstorms, 48	
Water and heat balance	48
Water balance	49
Precipitation amounts, 49—Evaporation, 51—Water balance, 53	
Vertical heat flux at the sea surface	56
Latent heat flux, 57—Sensible heat flux, 57—Total heat flux, 59	
Radiation balance	60
Insolation at sea level, 60—Terrestrial radiation, 62 Atmospheric counter radiation, 62—Net long-wave radiation at the sea surface, 63—Radiation balance at the sea surface, 64—Radiation balance in the atmosphere, 65	

Heat balance	66
Heat balance at the sea surface, 66—Heat balance of the earth-atmosphere system, 68	
Climatic stations	70
Sao Tomé	71
Fernando de Noronha	73
Ascension Island	75
St. Helena	77
Tristan da Cunha	78
Gough Island	80
Falkland Islands	81
South Georgia	83
Off-shore climates	86
South American off-shore areas	86
North coast of Brazil, 87—Northeast coast of Brazil, 88—Southeast coast of Brazil, 89—Rio de la Plata, 91—Patagonian Shelf, 93	
African off-shore areas	94
Coast of Gabon, 94—Coast of Angola, 95—Coast of Southwest Africa, 96—Coast of the Cape Province, 98	
Aerology	100
Geopotential heights	101
Absolute topographies, 101—Meridional profiles, 102—Zonal profiles, 103	
Wind	105
Zonal winds, 105—Meridional winds, 107	
Temperature	107
Relative topographies, 107—Meridional profiles, 107—Zonal profiles, 109	
Humidity	110
Vapour pressure, 110—Relative humidity, 111—Several humidity elements, 112	
Synoptic climatology	113
Tropics	113
Intertropical Convergence Zone, 114—Trade winds, 114—Disturbances, 114	
Anticyclones	116
High-pressure centres, 116—High-pressure tracks, 116	
Cyclones of the westwind zone	117
Frontal zone, 118—Low-pressure centres, 118—Low-pressure tracks, 119—Weather systems, 121	
References	123
Appendix—Climatic tables and charts	132

Chapter 2. CLIMATE OF THE NORTH ATLANTIC OCEAN

by G. B. TUCKER AND R. G. BARRY

Introduction	193
Main climatic features	193

Main oceanic features	194
History of observations	196
Climatic change	199
Representative data	201
Use of January and July maps	202
Mean circulation patterns	203
Surface pressure field	203
Winds	206
Synoptic climatology	210
Annual cycle of synoptic events	210
Winter, 210—Spring, 211—Summer, 212—Autumn, 213	
Circulation patterns and synoptic events in the westerlies	213
Climatology of blocking action, 215—Coastal storms of eastern United States, 217—Thermal troughs over the northeastern Atlantic, 218	
Trade-wind region	218
Intertropical Convergence Zone, 220—Tropical storms, 224	
Air-sea interactions	225
Air temperature	227
Air-sea temperature difference	231
Interactions between the ocean and atmospheric circulation	233
Moisture conditions	234
Humidity	234
Cloudiness	237
Visibility	238
Precipitation	238
Evaporation	241
Heat balance	243
General remarks	243
Solar radiation	244
Terms in the heat balance equation	245
Climatic zones	248
Equatorial zone, 249—Tropical and subtropical zone, 252—Temperate zone, 252—Subpolar zone, 252	
References	253
Appendix—Climatic tables	258

Chapter 3. CLIMATE OF THE SOUTH PACIFIC OCEAN
by N. A. STRETON AND J. W. ZILLMAN

Introduction	263
History of climatic description	263
Data sources	266
Surface climatic data, 266—Upper-air data, 266—Satellite data, 267—Synoptic analyses, 267—Tabulated data, 267	
Treatment	267

The ocean	268
Circulation	269
Temperature	273
Salinity	274
Ocean fronts	275
Sea ice	277
Icebergs	280
Synoptic climatology	281
The data base	281
Synoptic regimes of the South Pacific	284
The tropical easterlies	285
Tropical cyclones	288
The tropical anticyclone belt	292
The westerlies	296
The Antarctic trough	307
The Pacific cloud band	308
Main climatic elements	310
Surface air temperatures	310
Surface dew point	312
Surface pressure	312
Surface wind	314
Cloudiness and fog	317
Precipitation	319
Climate of the upper air	323
Geopotential height and temperature	323
Moisture distribution	329
Wind	329
Jet streams and tropopause	329
Meridional cross-sections	331
The heat budget	332
Surface heat budget	335
Surface radiation balance, 335—Latent heat flux, 338—Sensible heat flux, 339—Heat available for storage and transport by the ocean, 341—Influence of ocean fronts, 342—Diurnal variation of the surface heat budget, 343	
Atmospheric heat budget	344
Radiation budget, 345—Condensation heating, 346—Net diabatic heating, 348	
Large-scale circulations	348
The Southern Oscillation	349
Walker Circulation	355
El Niño	358
Conclusion	361
Acknowledgements	361
References	362
Appendix—Climatic tables	375

Chapter 4. CLIMATE OF THE NORTH PACIFIC OCEAN

by K. TERADA AND M. HANZAWA

Introduction	431
Geographic features	431
Early data summaries	431
Ocean currents	432
Mean pressure field	434
High pressure	434
Low pressure	437
Wind and depression tracks	438
Major wind systems	438
Monsoons	441
Gale statistics and cyclogenesis	444
Extratropical depression tracks	445
Tropical and subtropical cyclones	447
Temperature and humidity	453
Temperature distribution	453
Difference between air and sea surface temperature	457
Humidity	458
Cloudiness, visibility, fog, and precipitation	459
Cloudiness	459
Visibility	463
Fog	464
Precipitation	465
Snow and ice	467
Large-scale energy exchange between ocean and atmosphere	470
Evaporation	470
Marine climate studies	471
Acknowledgements	475
References	475
Appendix—Climatic tables for ocean weather ships and land or island stations	478

Chapter 5. CLIMATE OF THE INDIAN OCEAN SOUTH OF 35°S

by J. J. TALJAARD AND H. VAN LOON

Introduction	505
General	505
Geographical setting and bottom topography	505
Currents, convergences, and pack ice	507
Historical survey and data used	511
Temperature	514
Sea surface temperature	514
March–September range of sea temperature, 517—Anomalies of sea temperature	

in March and September, 518—The annual variation of sea temperature along 43°S, 519—Sea temperature extremes, 520	
Surface air temperature	521
Surface air temperature in January and July, 521—The annual variation of air temperature, 523—Difference between air and sea temperature, 526—Summer to winter air temperature range, 527—January and July air temperature anomalies, 528—Air temperature extremes, 529—Temperature variability at Marion, New Amsterdam, and Kerguelen, 531	
Upper-air temperature	531
General, 531—Mean monthly, seasonal, and annual upper-air temperatures and standard deviations at Marion, New Amsterdam, Kerguelen, and Heard islands, 532—The temperature distribution at 500 mbar in January and July, 533—Temperature change from January to July at 500 mbar, 533—Temperature deviations from the hemispheric zonal means at 500 mbar, 534—Annual variation of upper-air temperature, 535—Meridional temperature gradient at 500 mbar, 537—Zonal temperature anomaly profiles along 35° and 55°S in January and July, 539	
Pressure	539
Sea-level pressure	539
Mean sea-level pressure in January and July, 539—The subtropical ridge, 539—The circumpolar trough, 541—Annual course of pressure at the islands and at Mawson, 542—Mid-seasonal fluctuations of pressure, 543—Variability of daily, monthly, seasonal, and annual mean sea-level pressures, 546	
Upper-air pressure	547
General, 547—Mean monthly, seasonal, and annual heights of constant-pressure surfaces and standard deviations, 547—Contour charts for 500 mbar in January and July, 547—January–July height change and zonal anomalies at 200 mbar, 549—Variability of pressure heights, 549	
Wind	551
Surface wind	551
Wind in the troposphere	556
Precipitation and clouds	560
Synoptic climatology	563
General	563
Anticyclones	564
Anticyclogenesis, 564—Anticyclone movement, 565—Anticyclone frequency, 566	
Cyclones	570
Cyclogenesis, 570—Cyclone movement, 573—Cyclone frequency, 573—Speeds of cyclones, 575—Fronts, 575—Movement of deep cold and warm air masses, 577	
Heat balance	578
Data	578
The equations used, 579—Results and discussion, 581	
Acknowledgements	588
References	588
Appendix—Climatic tables	592

Chapter 6. CLIMATE OF THE INDIAN OCEAN NORTH OF 35°S

by C. S. RAMAGE

Introduction	603
Sea surface currents	605
Monsoon region, 606—Non-monsoon region, 606	
Data	607
Typical synoptic situations	608
Subtropical cyclone	608
Subtropical cyclone of 12 and 13 August 1964, 609	
Near-equatorial troughs	610
Near-equatorial troughs of April–May 1964, 612	
Air-sea interaction over the western Arabian Sea	617
Weather off Somalia in August 1964, 618	
Conditions during January and July	627
January	627
Monsoon region, 627—Australian summer monsoon, 628—Non-monsoon region	
628	
July	630
Monsoon region, 630—Non-monsoon region, 638	
Winter–summer differences	640
Heat balance, 640—Trough and ridge shifts, 641—Trans-equatorial flow, 641	
Tropical cyclones	641
Tropical cyclones over the northern Indian Ocean	644
Tropical cyclones over the southern Indian Ocean	644
Tropical cyclone movement	644
March of climate through the year	645
Northern Hemisphere monsoon region	649
November to April, 649—May to mid-September, 649—Mid-September to October, 650	
Equatorial region	651
Southern Hemisphere monsoon region	652
Western Indian Ocean, 652—Eastern Indian Ocean, 653—Central Indian Ocean, 653	
Southern Hemisphere non-monsoon region	653
Trade winds, 653	
Acknowledgements	654
References	654
Appendix—Climatic tables	659

Chapter 7. CLIMATE OF ICELAND

by MARKÚS Á. EINARSSON

Introduction	673
Climatic factors	674

Contents

Weather types	676
Southeastern	676
Southwestern or western	677
Southern with warm air mass	677
Warm air mass originating in Europe	677
Eastern	677
Northeastern	677
Northern	678
A high over Iceland	678
Climatic variations	678
Temperature	680
Precipitation	684
Snow	686
Wind	687
Humidity	689
Cloudiness	689
Visibility and fog	691
Sunshine and radiation	691
Potential evapotranspiration	692
Acknowledgements	693
References	693
Appendix—Climatic tables	695
 REFERENCE INDEX	699
 GEOGRAPHICAL INDEX	709
 SUBJECT INDEX	713
