1.2.5	Clouds	36
1.3	Radiative Equilibrium of the Planet	41
1.4	The Global Energy Budget	44
1.4.1	Global-Mean Energy Balance	44
1.4.2	Horizontal Distribution of Radiative Transfer	46
1.5	The General Circulation	50
Suggested Reading	53	
Problems	53	
	2.1.1 Stability in Terms of Temperature	173
	2.1.2 Stability in Terms of Potential Temperature	173
	2.1.3 Instability Categories	173
	2.1.4 Critical Displacement	173
	2.1.5 Sounding Diagrams	173
	2.1.6 Convective Instability	173
	2.1.7 Convective Cells	173
	2.1.8 Stratiform Precipitation	173
	2.1.9 Orographic Precipitation	173
	2.1.10 Subsidence Precipitation	173
	2.1.11 Orographic Wind	173
	2.1.12 Orographic Lift	173
	2.1.13 Orographic Wind Shear	173
	2.1.14 Orographic Lift	173
	2.1.15 Orographic Wind Shear	173
	2.1.16 Orographic Lift	173
	2.1.17 Orographic Wind Shear	173
	2.1.18 Orographic Lift	173
	2.1.19 Orographic Wind Shear	173
	2.1.20 Orographic Lift	173
	2.1.21 Orographic Wind Shear	173
	2.1.22 Orographic Lift	173
	2.1.23 Orographic Wind Shear	173
	2.1.24 Orographic Lift	173
	2.1.25 Orographic Wind Shear	173
	2.1.26 Orographic Lift	173
	2.1.27 Orographic Wind Shear	173
	2.1.28 Orographic Lift	173
	2.1.29 Orographic Wind Shear	173
	2.1.30 Orographic Lift	173
	2.1.31 Orographic Wind Shear	173
	2.1.32 Orographic Lift	173
	2.1.33 Orographic Wind Shear	173
	2.1.34 Orographic Lift	173
	2.1.35 Orographic Wind Shear	173
	2.1.36 Orographic Lift	173
	2.1.37 Orographic Wind Shear	173
	2.1.38 Orographic Lift	173
	2.1.39 Orographic Wind Shear	173
	2.1.40 Orographic Lift	173
	2.1.41 Orographic Wind Shear	173
	2.1.42 Orographic Lift	173
	2.1.43 Orographic Wind Shear	173
	2.1.44 Orographic Lift	173
	2.1.45 Orographic Wind Shear	173
	2.1.46 Orographic Lift	173
	2.1.47 Orographic Wind Shear	173
	2.1.48 Orographic Lift	173
	2.1.49 Orographic Wind Shear	173
	2.1.50 Orographic Lift	173
	2.1.51 Orographic Wind Shear	173
	2.1.52 Orographic Lift	173
	2.1.53 Orographic Wind Shear	173
	2.1.54 Orographic Lift	173
	2.1.55 Orographic Wind Shear	173
	2.1.56 Orographic Lift	173
	2.1.57 Orographic Wind Shear	173
	2.1.58 Orographic Lift	173
	2.1.59 Orographic Wind Shear	173
	2.1.60 Orographic Lift	173
	2.1.61 Orographic Wind Shear	173
	2.1.62 Orographic Lift	173
	2.1.63 Orographic Wind Shear	173
	2.1.64 Orographic Lift	173
	2.1.65 Orographic Wind Shear	173
	2.1.66 Orographic Lift	173
	2.1.67 Orographic Wind Shear	173
	2.1.68 Orographic Lift	173
	2.1.69 Orographic Wind Shear	173
	2.1.70 Orographic Lift	173
	2.1.71 Orographic Wind Shear	173
	2.1.72 Orographic Lift	173
	2.1.73 Orographic Wind Shear	173
	2.1.74 Orographic Lift	173
	2.1.75 Orographic Wind Shear	173
	2.1.76 Orographic Lift	173
	2.1.77 Orographic Wind Shear	173
	2.1.78 Orographic Lift	173
	2.1.79 Orographic Wind Shear	173
	2.1.80 Orographic Lift	173
	2.1.81 Orographic Wind Shear	173
	2.1.82 Orographic Lift	173
	2.1.83 Orographic Wind Shear	173
	2.1.84 Orographic Lift	173
	2.1.85 Orographic Wind Shear	173
	2.1.86 Orographic Lift	173
	2.1.87 Orographic Wind Shear	173
	2.1.88 Orographic Lift	173
	2.1.89 Orographic Wind Shear	173
	2.1.90 Orographic Lift	173
	2.1.91 Orographic Wind Shear	173
	2.1.92 Orographic Lift	173
	2.1.93 Orographic Wind Shear	173
	2.1.94 Orographic Lift	173
	2.1.95 Orographic Wind Shear	173
	2.1.96 Orographic Lift	173
	2.1.97 Orographic Wind Shear	173
	2.1.98 Orographic Lift	173
	2.1.99 Orographic Wind Shear	173
	2.1.100 Orographic Lift	173
	2.1.101 Orographic Wind Shear	173
	2.1.102 Orographic Lift	173
	2.1.103 Orographic Wind Shear	173
	2.1.104 Orographic Lift	173
	2.1.105 Orographic Wind Shear	173
	2.1.106 Orographic Lift	173
	2.1.107 Orographic Wind Shear	173
	2.1.108 Orographic Lift	173
	2.1.109 Orographic Wind Shear	173
	2.1.110 Orographic Lift	173
	2.1.111 Orographic Wind Shear	173
	2.1.112 Orographic Lift	173
	2.1.113 Orographic Wind Shear	173
	2.1.114 Orographic Lift	173
	2.1.115 Orographic Wind Shear	173
	2.1.116 Orographic Lift	173
	2.1.117 Orographic Wind Shear	173
	2.1.118 Orographic Lift	173
	2.1.119 Orographic Wind Shear	173
	2.1.120 Orographic Lift	173
	2.1.121 Orographic Wind Shear	173
	2.1.122 Orographic Lift	173
	2.1.123 Orographic Wind Shear	173
	2.1.124 Orographic Lift	173
	2.1.125 Orographic Wind Shear	173
	2.1.126 Orographic Lift	173
	2.1.127 Orographic Wind Shear	173
	2.1.128 Orographic Lift	173
	2.1.129 Orographic Wind Shear	173
	2.1.130 Orographic Lift	173
	2.1.131 Orographic Wind Shear	173
	2.1.132 Orographic Lift	173
	2.1.133 Orographic Wind Shear	173
	2.1.134 Orographic Lift	173
	2.1.135 Orographic Wind Shear	173
	2.1.136 Orographic Lift	173
	2.1.137 Orographic Wind Shear	173
	2.1.138 Orographic Lift	173
	2.1.139 Orographic Wind Shear	173
	2.1.140 Orographic Lift	173
	2.1.141 Orographic Wind Shear	173
	2.1.142 Orographic Lift	173
	2.1.143 Orographic Wind Shear	173
	2.1.144 Orographic Lift	173
	2.1.145 Orographic Wind Shear	173
	2.1.146 Orographic Lift	173
	2.1.147 Orographic Wind Shear	173
	2.1.148 Orographic Lift	173
	2.1.149 Orographic Wind Shear	173
	2.1.150 Orographic Lift	173
	2.1.151 Orographic Wind Shear	173
	2.1.152 Orographic Lift	173
	2.1.153 Orographic Wind Shear	173
	2.1.154 Orographic Lift	173
	2.1.155 Orographic Wind Shear	173
	2.1.156 Orographic Lift	173
	2.1.157 Orographic Wind Shear	173
	2.1.158 Orographic Lift	173
	2.1.159 Orographic Wind Shear	173
	2.1.160 Orographic Lift	173
	2.1.161 Orographic Wind Shear	173
	2.1.162 Orographic Lift	173
	2.1.163 Orographic Wind Shear	173
	2.1.164 Orographic Lift	173
	2.1.165 Orographic Wind Shear	173
	2.1.166 Orographic Lift	173
	2.1.167 Orographic Wind Shear	173
	2.1.168 Orographic Lift	173
	2.1.169 Orographic Wind Shear	173
	2.1.170 Orographic Lift	173
	2.1.171 Orographic Wind Shear	173
	2.1.172 Orographic Lift	173
	2.1.173 Orographic Wind Shear	173
	2.1.174 Orographic Lift	173
	2.1.175 Orographic Wind Shear	173
	2.1.176 Orographic Lift	173
	2.1.177 Orographic Wind Shear	173
	2.1.178 Orographic Lift	173
	2.1.179 Orographic Wind Shear	173
	2.1.180 Orographic Lift	173
	2.1.181 Orographic Wind Shear	173
	2.1.182 Orographic Lift	173
	2.1.183 Orographic Wind Shear	173
	2.1.184 Orographic Lift	173
	2.1.185 Orographic Wind Shear	173
	2.1.186 Orographic Lift	173
	2.1.187 Orographic Wind Shear	173
	2.1.188 Orographic Lift	173
	2.1.189 Orographic Wind Shear	173
	2.1.190 Orographic Lift	173
	2.1.191 Orographic Wind Shear	173
	2.1.192 Orographic Lift	173
	2.1.193 Orographic Wind Shear	173
	2.1.194 Orographic Lift	173
	2.1.195 Orographic Wind Shear	173
	2.1.196 Orographic Lift	173
	2.1.197 Orographic Wind Shear	173
	2.1.198 Orographic Lift	173
	2.1.199 Orographic Wind Shear	173
	2.1.200 Orographic Lift	173
	2.1.201 Orographic Wind Shear	173
	2.1.202 Orographic Lift	173
	2.1.203 Orographic Wind Shear	173
	2.1.204 Orographic Lift	173
	2.1.205 Orographic Wind Shear	173
	2.1.206 Orographic Lift	173
	2.1.207 Orographic Wind Shear	173
	2.1.208 Orographic Lift	173
	2.1.209 Orographic Wind Shear	

2.2	The First Law	63
2.2.1	Internal Energy	63
2.2.2	Diabatic Changes of State	63
2.3	Heat Capacity	65
2.4	Adiabatic Processes	68
2.4.1	Potential Temperature	71
2.4.2	Thermodynamic Behavior Accompanying Vertical Motion	73
2.5	Diabatic Processes	75
2.5.1	Polytropic Processes	75
	Suggested Reading	76
	Problems	77

Chapter 3 The Second Law and Its Implications

3.1	Natural and Reversible Processes	79
3.1.1	The Carnot Cycle	82
3.2	Entropy and the Second Law	84
3.3	Restricted Forms of the Second Law	87
3.4	The Fundamental Relations	88
3.4.1	The Maxwell Relations	89
3.4.2	Noncompensated Heat Transfer	89
3.5	Conditions for Thermodynamic Equilibrium	90
3.6	Relationship of Entropy to Potential Temperature	91
3.6.1	Implications for Vertical Motion	93
	Suggested Reading	96
	Problems	96

Chapter 4 Heterogeneous Systems

4.1	Description of a Heterogeneous System	99
4.2	Chemical Equilibrium	102
4.3	Fundamental Relations for a Multicomponent System	104
4.4	Thermodynamic Degrees of Freedom	106
4.5	Thermodynamic Characteristics of Water	107
4.6	Equilibrium Phase Transformations	110
4.6.1	Latent Heat	110
4.6.2	Clausius–Clapeyron Equation	112
	Suggested Reading	114
	Problems	114

Chapter 5 Transformations of Moist Air

5.1	Description of Moist Air	117
5.1.1	Properties of the Gas Phase	117
5.1.2	Saturation Properties	120
5.2	Implications for the Distribution of Water Vapor	121

5.3	State Variables of the Two-Component System	123
5.3.1	Unsaturated Behavior	123
5.3.2	Saturated Behavior	124
5.4	Thermodynamic Behavior Accompanying Vertical Motion	126
5.4.1	Condensation and the Release of Latent Heat	126
5.4.2	The Pseudo-Adiabatic Process	130
5.4.3	The Saturated Adiabatic Lapse Rate	132
5.5	The Pseudo-Adiabatic Chart	134
	<i>Surface Relative Humidity</i>	135
	<i>Surface Potential Temperature</i>	135
	<i>Surface Dew Point</i>	135
	<i>Cumulus Cloud Base</i>	136
	<i>Equivalent Potential Temperature at the Surface</i>	136
	<i>Freezing Level of Surface Air</i>	136
	<i>Liquid Water Content at the Freezing Level</i>	137
	<i>Temperature inside Cloud at 650 mb</i>	137
	<i>Mixing Ratio inside Cloud at 650 mb</i>	137
	Suggested Reading	138
	Problems	138

Chapter 6 Hydrostatic Equilibrium

6.1	Effective Gravity	143
6.2	Geopotential Coordinates	145
6.3	Hydrostatic Balance	147
6.4	Stratification	151
6.4.1	Idealized Stratification	153
	<i>Layer of Constant Lapse Rate</i>	153
	<i>Isothermal Layer</i>	155
	<i>Adiabatic Layer</i>	155
6.5	Lagrangian Interpretation of Stratification	155
6.5.1	Adiabatic Stratification	156
6.5.2	Diabatic Stratification	160
	Suggested Reading	163
	Problems	163

Chapter 7 Hydrostatic Stability

7.1	Reaction to Vertical Displacement	166
7.2	Stability Categories	168
7.2.1	Stability in Terms of Temperature	169
7.2.2	Stability in Terms of Potential Temperature	171
7.2.3	Moisture Dependence	173
7.3	Implications for Vertical Motion	174
7.4	Finite Displacements	176
7.4.1	Conditional Instability	176
7.4.2	Entrainment	181
7.4.3	Potential Instability	184
7.4.4	Modification of Stability under Unsaturated Conditions	186
7.5	Stabilizing and Destabilizing Influences	188

7.6	Turbulent Dispersion	189
7.6.1	Convective Mixing	189
7.6.2	Inversions	191
7.6.3	Life Cycle of the Nocturnal Inversion	192
	Suggested Reading	194
	Problems	194

Chapter 8 Atmospheric Radiation

8.1	Shortwave and Longwave Radiation	198
8.1.1	Spectra of Observed SW and LW Radiation	200
8.2	Description of Radiative Transfer	203
8.2.1	Radiometric Quantities	203
8.2.2	Absorption <i>Lambert's Law</i>	207
8.2.3	Emission <i>Planck's Law</i> <i>Wien's Displacement Law</i> <i>The Stefan–Boltzmann Law</i> <i>Kirchhoff's Law</i>	209
8.2.4	Scattering	213
8.2.5	The Equation of Radiative Transfer	215
8.3	Absorption Characteristics of Gases	216
8.3.1	Interactions between Radiation and Molecules	216
8.3.2	Line Broadening	220
8.4	Radiative Transfer in a Plane Parallel Atmosphere	224
8.4.1	Transmission Function	228
8.4.2	Two-Stream Approximation	230
8.5	Thermal Equilibrium	233
8.5.1	Radiative Equilibrium in a Gray Atmosphere	233
8.5.2	Radiative–Convective Equilibrium	236
8.5.3	Radiative Heating	241
8.6	Thermal Relaxation	245
8.7	The Greenhouse Effect	248
	Suggested Reading	252
	Problems	253

Chapter 9 Aerosol and Clouds

9.1	Morphology of Atmospheric Aerosol	258
9.1.1	Continental Aerosol	258
9.1.2	Marine Aerosol	263
9.1.3	Stratospheric Aerosol	263
9.2	Microphysics of Clouds	264
9.2.1	Droplet Growth by Condensation	264
9.2.2	Droplet Growth by Collision	273
9.2.3	Growth of Ice Particles	275
9.3	Macroscopic Characteristics of Clouds	277
9.3.1	Formation and Classification of Clouds	277
9.3.2	Microphysical Properties of Clouds	285
9.3.3	Cloud Dissipation	286

9.4 Radiative Transfer in Aerosol and Cloud	287
9.4.1 Scattering by Molecules and Particles	287
<i>Rayleigh Scattering</i>	287
<i>Mie Scattering</i>	291
9.4.2 Radiative Transfer in a Cloudy Atmosphere	295
9.5 Roles of Clouds and Aerosol in Climate	305
9.5.1 Involvement in the Global Energy Budget	306
<i>Influence of Cloud Cover</i>	306
<i>Influence of Aerosol</i>	312
9.5.2 Involvement in Chemical Processes	314
Suggested Reading	315
Problems	315

Chapter 10 Atmospheric Motion

10.1 Descriptions of Atmospheric Motion	321
10.2 Kinematics of Fluid Motion	323
10.3 The Material Derivative	328
10.4 Reynolds' Transport Theorem	329
10.5 Conservation of Mass	330
10.6 The Momentum Budget	331
10.6.1 Cauchy's Equations of Motion	331
10.6.2 Momentum Equations in a Rotating Reference Frame	334
10.7 The First Law of Thermodynamics	336
Suggested Reading	338
Problems	338

Chapter 11 Atmospheric Equations of Motion

11.1 Curvilinear Coordinates	341
11.2 Spherical Coordinates	344
11.2.1 The Traditional Approximation	350
11.3 Special Forms of Motion	352
11.4 Prevailing Balances	353
11.4.1 Motion-Related Stratification	353
11.4.2 Scale Analysis	354
11.5 Thermodynamic Coordinates	357
11.5.1 Isobaric Coordinates	357
11.5.2 Log-Pressure Coordinates	362
11.5.3 Isentropic Coordinates	364
Suggested Reading	368
Problems	369

Chapter 12 Large-Scale Motion

12.1 Geostrophic Equilibrium	371
12.1.1 Motion on an <i>f</i> Plane	374
<i>The Helmholtz Theorem</i>	375

12.2	Vertical Shear of the Geostrophic Wind	377
12.2.1	Classes of Stratification	378
12.2.2	Thermal Wind Balance	378
12.3	Frictional Geostrophic Motion	381
12.4	Curvilinear Motion	382
12.4.1	Inertial Motion	385
12.4.2	Cyclostrophic Motion	385
12.4.3	Gradient Motion	386
12.5	Weakly Divergent Motion	387
12.5.1	Barotropic Nondivergent Motion	387
12.5.2	Vorticity Budget under Baroclinic Stratification	389
12.5.3	Quasi-Geostrophic Motion	394
	Suggested Reading	397
	Problems	398

Chapter 13 The Planetary Boundary Layer

13.1	Description of Turbulence	406
13.1.1	Reynolds Decomposition	408
13.1.2	Turbulent Diffusion	410
13.2	Structure of the Boundary Layer	412
13.2.1	The Ekman Layer	412
13.2.2	The Surface Layer	413
13.3	Influence of Stratification	415
13.4	Ekman Pumping	420
	Suggested Reading	423
	Problems	423

Chapter 14 Atmospheric Waves

14.1	Description of Wave Propagation	426
14.1.1	Surface Water Waves	426
14.1.2	Fourier Synthesis	429
14.1.3	Limiting Behavior	432
14.1.4	Wave Dispersion	434
14.2	Acoustic Waves	439
14.3	Buoyancy Waves	440
14.3.1	Shortwave Limit	447
14.3.2	Propagation of Gravity Waves in a Nonhomogeneous Medium	448
14.3.3	The WKB Approximation	450
14.3.4	Method of Geometric Optics	451
	<i>Turning Level</i>	451
	<i>Critical Level</i>	455
14.4	The Lamb Wave	456
14.5	Rossby Waves	459
14.5.1	Barotropic Nondivergent Rossby Waves	459
14.5.2	Rossby Wave Propagation in Three Dimensions	461
14.5.3	Planetary Wave Propagation in Sheared Mean Flow	465

14.6 Wave Absorption	468
14.7 Nonlinear Considerations	472
Suggested Reading	479
Problems	479

Chapter 15 The General Circulation

15.1 Forms of Atmospheric Energy	487
15.1.1 Moist Static Energy	487
15.1.2 Total Potential Energy	489
15.1.3 Available Potential Energy	491
<i>Adiabatic Adjustment</i>	493
15.2 Heat Transfer in an Axisymmetric Circulation	495
15.3 Heat Transfer in a Laboratory Analogue	503
15.4 Tropical Circulations	506
Suggested Reading	513
Problems	513

Chapter 16 Hydrodynamic Instability

16.1 Inertial Instability	517
16.2 Shear Instability	519
16.2.1 Necessary Conditions for Instability	519
16.2.2 Barotropic and Baroclinic Instability	521
16.3 The Eady Problem	523
16.4 Nonlinear Considerations	529
Suggested Reading	532
Problems	533

Chapter 17 The Middle Atmosphere

17.1 Ozone Photochemistry	536
17.1.1 The Chemical Family	537
17.1.2 Photochemical Equilibrium	538
17.2 Involvement of Other Species	540
17.2.1 Nitrous Oxide	541
17.2.2 Chlorofluorocarbons	542
17.2.3 Methane	544
17.3 Air Motion	546
17.3.1 The Brewer–Dobson Circulation	547
17.3.2 Wave Driving of the Mean Meridional Circulation	548
17.4 Sudden Stratospheric Warmings	553
17.5 The Quasi-Biennial Oscillation	557
17.6 Direct Interactions with the Troposphere	560
17.7 Heterogeneous Chemical Reactions	564
Suggested Reading	573
Problems	573
