

Chapter 1

INTRODUCTION 1

- General Rules for the Microscale Laboratory 3
- The Organic Chemistry Laboratory 5

Chapter 2

SAFETY 6

- Making the Laboratory a Safer Place 6
- Nature of Hazards 6
- Reduction of Risks 7
- Precautionary Measures 8
- Thinking About the Risks in Using Chemicals 9
- Disposal of Chemicals 10
- (Material) Safety Data Sheets 10
- Alternate Sources of Information 14
- Estimating Risks from Vapors 14
- Microwave Safety 16
- Concluding Thoughts 17
- General Safety References 18

Chapter 3

INTRODUCTION TO MICROSCALE ORGANIC LABORATORY EQUIPMENT AND TECHNIQUES 20

- Microglassware Equipment 21
 - Standard Taper Joints 21
 - Reaction Flasks 22
 - Condensers 22
 - Distillation Heads 22
 - Recrystallization Tubes 22
 - Miscellaneous Items 22
 - Gas Chromatographic Fraction Collection Items 23
- Standard Experimental Apparatus 23
 - Heating and Stirring Arrangements 23
 - Sand Bath Technique—Hot-Plate Calibration 23
 - Metal Heat-Transfer Devices 24
 - Stirring 24
 - Reflux Apparatus 25

- Distillation Apparatus 26
- Moisture-Protected Reaction Apparatus 27
- Specialized Pieces of Equipment 28

Microwave Heating as a Tool for Organic Chemistry 29

- Introduction 29
- Applications 34
- Equipment Available 36
- Experimental Protocols 37

Microscale Laws 37

- Rules of the Trade for Handling Organic Materials at the Microscale Level 37
- Rules for Working with Liquids at the Microscale Level 38
- Rules for Working with Solids at the Microscale Level 41

The Laboratory Notebook 42

- Example of a Laboratory Notebook Entry 43
- Calculating Yields 44

Chapter 4

DETERMINATION OF PHYSICAL PROPERTIES 47

- Liquids 48
 - Ultramicro Boiling Point 48
- Density 52
- Solids 53
 - Melting Points 53

Chapter 5

MICROSCALE LABORATORY TECHNIQUES 59

- TECHNIQUE 1 *Gas Chromatography* 59
 - GC Instrumentation 60
- TECHNIQUE 2 *Simple Distillation* 65

- TECHNIQUE 3 Fractional Distillation** 68
- TECHNIQUE 4 Solvent Extraction** 71
 Intermolecular Properties: Solubility 71
 Partition (or Distribution) Coefficient 74
 Extraction 76
 Solid-Liquid Extraction 83
 Drying Agents 84
 Solid-Phase Extraction 87
- TECHNIQUE 5 Crystallization** 89
 General Crystallization Procedure 89
 Simple Crystallization 91
 Filtration Techniques 92
- TECHNIQUE 6 Chromatography** 96
 Column, Flash, High-Performance Liquid, and Thin-Layer Chromatography 96
 Column Chromatography 96
 Flash Chromatography 99
 Thin-Layer Chromatography 101
 Paper Chromatography 103
 High-Performance Liquid Chromatography 104
- TECHNIQUE 6B Concentration of Solutions** 105
 Distillation 106
 Evaporation with Nitrogen Gas 106
 Removal of Solvent Under Reduced Pressure 106
- TECHNIQUE 7 Collection or Control of Gaseous Products** 109
 Water-Insoluble Gases 109
 Trapping By-product Gases 110
- TECHNIQUE 8 Measurement of Specific Rotation** 112
 Theory 112
 The Polarimeter 113
- TECHNIQUE 9 Sublimation** 115
 Sublimation Theory 116
 Experimental Setup 117
 Precautions 117
- EXPERIMENT 2 The Separation of a 25- μ L Mixture of Heptanal (bp 153 °C) and Cyclohexanol (bp 160 °C) by Gas Chromatography** 127
 Discussion 127
 Collection Yield 128
 Collection Yield 129
 Components 130
 Experimental Procedure 130
- EXPERIMENT 3 Distillation** 133
Experiment 3A Simple Distillation at the Semi-microscale Level: Separation of Ethyl Acetate from *trans*-1,2-Dibenzoyl ethylene 134
 Discussion 134
 Components 134
 Experimental Procedure 135
Experiment 3B Fractional Semi-microscale Distillation: Separation of Hexane and Toluene 136
 Discussion 137
 Components 137
 Experimental Procedure 137
Experiment 3C Fractional Semi-microscale Distillation: Separation of 2-Methylpentane and Cyclohexane Using a Spinning-Band Column 139
 Discussion 139
 Components 140
 Experimental Procedure 140
Experiment 3D Fractional Semi-microscale Distillation: The Separation of 2-Methylpentane and Cyclohexane Using a Spinning Band in a Hickman-Hinkle Still 142
 Discussion 143
 Components 143
 Experimental Procedure 143
- EXPERIMENT 4 Solvent Extraction** 145
Experiment 4A Determination of Partition Coefficient for the System Benzoic Acid, Methylene Chloride, and Water 145
 Discussion 145
 Components 148
 Experimental Procedure 148
Experiment 4B Solvent Extraction I: The System; Benzoic Acid, Methylene Chloride, and 10% Sodium Bicarbonate Solution; An Example of Acid-Base Extraction Techniques 150
 Reaction 150
 Discussion 150
 Experimental Procedure 150

Chapter 6

MICROSCALE ORGANIC LABORATORY EXPERIMENTS 119

- EXPERIMENT 1 Getting to Know You: Measurement of Physical Properties** 120
 Discussion 121
 Experimental Procedure 122

- Experiment 4C Solvent Extraction II: A Three-Component Mixture; an Example of the Separation of an Acid, a Base, and a Neutral Substance 151
- Discussion 151
- Components 152
- Experimental Procedure 152
- EXPERIMENT 5 Reduction of Ketones Using a Metal Hydride Reagent: Cyclohexanol and cis- and trans-4-tert-Butylcyclohexanol 155**
- Reaction (Experiment [5A]) 155
- Discussion 156
- Experiment 5A Cyclohexanol 157
- Experimental Procedure 157
- Experiment 5B cis- and trans-4-tert-Butylcyclohexanol 162
- Reaction 162
- Experimental Procedure 162
- EXPERIMENT 6 Photochemical Isomerization of an Alkene: cis-1,2-Dibenzoyl ethylene 167**
- Biologically Important Photochemical Reactions 168
- Reaction 169
- Discussion 170
- Experiment 6A Purification of trans-1,2-Dibenzoyl ethylene 170
- Experimental Procedure 170
- Experiment 6B Isomerization of an Alkene: Thin-Layer Chromatographic Analysis 171
- Experimental Procedure 171
- Experiment 6C Isomerization of an Alkene: Nuclear Magnetic Resonance Analysis 177
- Experimental Procedure 177
- EXPERIMENT 7 The Cannizzaro Reaction with 4-Chlorobenzaldehyde: 4-Chlorobenzoic Acid and 4-Chlorobenzyl Alcohol 178**
- Reaction 180
- Discussion 180
- Experimental Procedure 181
- Experiment 7-1 4-Chlorobenzoic Acid and 4-Chlorobenzyl Alcohol: Preparation Using a Monomode Microwave Apparatus 188
- Experimental Procedure 188
- Experiment 7-2 4-Chlorobenzoic Acid and 4-Chlorobenzyl Alcohol: Preparation Using a Multimode Microwave Apparatus 189
- Experimental Procedure 189
- EXPERIMENT 8 The Esterification Reaction: Ethyl Laurate, Isopentyl Acetate, and the Use of Acidic Resins 192**
- Discussion 193
- Lipids 194
- Experiment 8A Ethyl Laurate 203
- Reaction 203
- Experimental Procedure 203
- Experiment 8B Isopentyl Acetate: Semi-microscale Preparation 205
- Reaction 205
- Experimental Procedure 205
- Experiment 8B-1 Isopentyl Acetate: Preparation Using a Monomode Microwave Apparatus 207
- Experimental Procedure 207
- Experiment 8B-2 Isopentyl Acetate: Preparation Using a Multimode Microwave Apparatus 209
- Experimental Procedure 209
- Experiment 8C Esterification by Use of Acidic Resins: Semi-microscale Preparations 210
- Reaction 211
- Experimental Procedure 211
- EXPERIMENT 9 The E1 Elimination Reaction: Dehydration of 2-Butanol, 2-Methylcyclohexanol, and 4-Methylcyclohexanol 213**
- The Development of Carbocation Theory 214
- Experiment 9A Dehydration of 2-Butanol 216
- Reaction 216
- Discussion 216
- Experimental Procedure 219
- Experiment 9B Dehydration of 2-Methylcyclohexanol 221
- Reaction 221
- Experimental Procedure 221
- Experiment 9C Dehydration of 4-Methylcyclohexanol 223
- Reaction 223
- Experimental Procedure 223
- EXPERIMENT 10 The E2 Elimination Reaction: Dehydrohalogenation of 2-Bromobutane to Yield 1-Butene, trans-2-Butene, and cis-2-Butene 226**
- Reaction 227
- Discussion 227
- Experimental Procedure 229
- EXPERIMENT 11 The Isolation of Natural Products 233**
- Experiment 11A Isolation and Characterization of an Optically Active Natural Product: Usnic Acid 233
- Lichens and Natural Products 234
- Discussion 236
- Experimental Procedure 236

- Experiment 11B Isolation and Characterization of a Natural Product: Caffeine and Caffeine 5-Nitrosalicylate** 238
 Alkaloids 239
 The Classification of Alkaloids 239
 Discussion 240
 Experimental Procedure 242
 Derivative: Caffeine 5-Nitrosalicylate 244
 Experimental Procedure 245
Experiment 11C Isolation of a Natural Product by Steam Distillation: Cinnamaldehyde from Cinnamon 247
 Essential Oils 248
 Discussion 250
 Component 251
 Experimental Procedure 251
EXPERIMENT 12 Reductive Catalytic Hydrogenation of an Alkene: Octane 253
 Reaction 254
 Discussion 254
 Experimental Procedure 256
EXPERIMENT 13 Hydroboration–Oxidation of an Alkene: Octanol 259
 Reaction 260
 Discussion 260
 Experimental Procedure 263
EXPERIMENT 14 Diels–Alder Reaction: 4-Cyclohexene-*cis*-1,2-dicarboxylic Acid Anhydride 266
 Reaction 267
 Discussion 268
 Experimental Procedure 270
 Optional Semi-Microscale Preparation 275
EXPERIMENT 15 Diels–Alder Reaction: 9,10-Dihydroanthracene-9,10- α,β -succinic Acid Anhydride 278
 Reaction 278
 Discussion 279
 Experimental Procedure 280
 Optional Semi-Microscale Preparations 281
Experiment 15-1 9,10-Dihydroanthracene-9,10- α,β -succinic Acid Anhydride: Preparation Using a Monomode Microwave Apparatus 282
 Experimental Procedure 282
Experiment 15-2 9,10-Dihydroanthracene-9,10- α,β -succinic Acid Anhydride: Preparation Using a Multimode Microwave Apparatus 283
 Experimental Procedure 283
EXPERIMENT 16 Grignard Reaction with a Ketone: Triphenylmethanol 284
 Reaction 285
 Discussion 286
 Experimental Procedure 288
EXPERIMENT 17 Grignard Reaction with an Aldehyde: 4-Methyl-3-heptanol 293
 Reaction 293
 Discussion 293
 Experimental Procedure 294
 Optional Analysis Using NMR Band Deconvolution 295
 Reaction 297
 Discussion 298
EXPERIMENT 18 The Perkin Reaction: Condensation of Rhodanine with an Aromatic Aldehyde to Yield *o*-Chlorobenzylidene Rhodanine 300
 Reaction 300
 Discussion 301
 Experimental Procedure 303
 Optional Semi-Microscale Preparation 304
EXPERIMENT 19 Alkene Preparation by the Wittig Reaction: (*E*)-Stilbene; Methylene-4-*tert*-butylcyclohexane; and *trans*-9-(2-Phenylethenyl)anthracene 305
 Reaction 307
 Discussion 307
Experiment 19A (*E*)-Stilbene by the “Instant Ylide” Method 310
 Reaction 310
 Experimental Procedure 311
Experiment 19B (*E*)-Stilbene by the Horner–Wadsworth–Emmons Reaction 313
 Reaction 313
 Experimental Procedure 313
Experiment 19C Methylene-4-*tert*-butylcyclohexane 314
 Reaction 314
 Experimental Procedure 315
Experiment 19D *trans*-9-(2-Phenylethenyl)anthracene 317
 Reaction 317
 Experimental Procedure 317
EXPERIMENT 20 The Aldol Reaction: *trans*-4-Nitrochalcone and Dibenzalacetone 320
 Discussion 321
Experiment 20A *trans*-4-Nitrochalcone 322
 Reaction 322
 Experimental Procedure 322
Experiment 20B Dibenzalacetone 323
 Reaction 323

- Experimental Procedure 323
 Optional Semi-Microscale Preparation 328
EXPERIMENT 21 Quantitative Analysis of Grignard Reagents: 1-Methylbutylmagnesium Bromide and Phenylmagnesium Bromide 330
 Reaction 330
 Discussion 331
 Experimental Procedure 331
Experiment 22 Williamson Synthesis of Ethers 334
 Reaction 334
 Discussion 334
Experiment 22A Propyl *p*-Tolyl Ether 335
 Experimental Procedure 335
 Optional Macroscale Preparation 337
Experiment 22B Methyl *p*-Ethylphenyl Ether 340
 Reaction 340
 Experimental Procedure 340
 Optional Semi-Microscale and Macroscale Preparations 342
Experiment 22C Butyl *p*-Nitrophenyl Ether: Preparation Using a Monomode Microwave Apparatus 345
 Reaction 345
 Experimental Procedure 345
Experiment 22D Butyl *p*-Nitrophenyl Ether: Preparation Using a Multimode Microwave Apparatus 347
 Reaction 347
 Experimental Procedure 347
Experiment 23 Amide Synthesis: Acetanilide and *N,N*-Diacetyl-1,4-phenylenediamine 351
 Reaction 351
 Discussion 352
Experiment 23A Acetanilide 354
 Experimental Procedure 354
 Optional Semi-Microscale Preparation 355
Experiment 23B *N,N*'-Diacetyl-1,4-phenylenediamine 356
 Reaction 356
 Experimental Procedure 356
Experiment 24 Imide Synthesis: *N*-Phenylmaleimide 359
 Reaction 359
 Discussion 360
Experiment 24A Maleanilic Acid 361
 Experimental Procedure 361
 Reaction 361
Experiment 24B *N*-Phenylmaleimide 362
 Reaction 362
 Experimental Procedure 363
Experiment 25 Synthesis of Cyclic Carboxylic Acid Anhydrides: Succinic Anhydride and Phthalic Anhydride 365
 Reaction 365
 Discussion 365
Experiment 25A Succinic Anhydride 367
 Experimental Procedure 367
Experiment 25B Phthalic Anhydride 368
 Reaction 368
 Experimental Procedure 368
Experiment 26 Diazonium Coupling Reaction: Methyl Red 369
 Reaction 370
 Discussion 370
 Experimental Procedure 372
Experiment 27 Friedel-Crafts Acylation: Acetylferrocene and Diacetylferrocene 374
 Reaction 375
 Discussion 375
 Experimental Procedure 377
Experiment 28 Halogenation: Electrophilic Aromatic Substitution to Yield 4-Bromoacetanilide 381
 Reaction 381
 Discussion 381
 Experimental Procedure 382
Experiment 29 Nitration: 2,5-Dichloronitrobenzene; *N,N*'-Diacetyl-2,3-dinitro-1,4-phenylenediamine; 5-Nitrosalicylic Acid; and 2- and 4-Nitrophenol 386
 General Reaction 387
 Discussion 387
 Semi-Microscale Preparation of Anhydrous Nitric Acid 388
 Experimental Procedure 389
Experiment 29A 2,5-Dichloronitrobenzene 389
 Reaction 389
 Experimental Procedure 390
Experiment 29B *N,N*'-Diacetyl-2,3-dinitro-1,4-phenylenediamine 391
 Reaction 391
 Experimental Procedure 391
Experiment 29C 5-Nitrosalicylic Acid 392
 Reaction 392
 Experimental Procedure 393
Experiment 29D 2- and 4-Nitrophenol 394
 Reaction 394
 Experimental Procedure 394

- Experiment 30 Nucleophilic Aromatic Substitution: 2,4-Dinitrophenylthiocyanate** 397
 Reaction 398
 Discussion 398
 Experimental Procedure 399
- Experiment 30-1 2,4-Dinitrophenylthiocyanate: Preparation Using a Monomode Microwave Apparatus** 400
 Experimental Procedure 400
- Experiment 30-2 2,4-Dinitrophenylthiocyanate: Preparation Using a Multimode Microwave Apparatus** 401
 Experimental Procedure 401
- Experiment 31 Halogenation Using N-Bromosuccinimide: 9-Bromoanthracene** 403
 Reaction 404
 Discussion 404
 Experimental Procedure 405
- Experiment 32 Hypochlorite Oxidation of an Alcohol: Cyclohexanone** 407
 Reaction 407
 Discussion 407
 Experimental Procedure 408
- Experiment 33 Chromium Trioxide–Resin or Hypochlorite Oxidation of an Alcohol: 9-Fluorenone** 411
- Experiment 33A 9-Fluorenone: CrO₃ Oxidation of 9-Fluorenol** 411
 Reaction 411
 Discussion 411
 Experimental Procedure 412
- Experiment 33B 9-Fluorenone: NaOCl Oxidation of 9-Fluorenol** 414
 Reaction 414
 Discussion 414
 Experimental Procedure 414
- Experiment 34 Hypochlorite Oxidation of Methyl Ketones by the Haloform Reaction: Benzoic Acid and p-Methoxybenzoic Acid** 416
 Reaction 417
 Discussion 417
- Experiment 34A Benzoic Acid** 418
 Experimental Procedure 418
- Experiment 34B p-Methoxybenzoic Acid** 419
 Reaction 419
 Experimental Procedure 419
 Optional Semi-Microscale Preparation 420
- Experiment 35 Conversion of Cyclohexyl Bromide to Cyclohexene—An E2 Elimination Reaction: Factors Affecting the Rate of a Chemical Reaction** 422
 Reaction 422
 Discussion 422
 Experimental Procedure 426
 Data Analysis 429
 Variation of Parameters 429
- Experiment 36 Aqueous Suzuki Synthesis of 4-Phenylphenol** 434
 Reaction 434
 Discussion 434
 Experimental Procedure 438
- Chapter 7**
- SEQUENTIAL SYNTHESSES: THE TRANSITION FROM MACRO TO MICRO** 440
- SEQUENCE A The Synthesis of Hexaphenylbenzene** 443
- EXPERIMENTS A1_{ar}, A2_{ar}, A3_{ar}, A1_{br}, A2_{br}, A3_{br}, and A4_{ab} The Synthesis of Hexaphenylbenzene from Benzaldehyde** 446
- Experiment A1_a The Benzoin Condensation of Benzaldehyde to Benzoin** 448
 Reaction 448
 Discussion 449
 Semi-Microscale Experimental Procedure 450
 Optional Scales 451
 Microscale Reaction Procedure 451
- Experiment A2_a Copper(II) Ion Oxidation of Benzoin to Benzil** 452
 Reaction 453
 Discussion 453
 Semi-Microscale Experimental Procedure 454
 Optional Microscale Preparation 456
- Experiment A3_a Tetraphenylcyclopentadienone** 457
 Reaction 457
 Discussion 458
 Microscale Reaction Procedure (1) 458
 Microscale Reaction Procedure (2) 459
- Experiment A1_b (E)-Stilbene** 460

- Reaction 461
 Discussion 461
 Experimental Procedure 462
 Experiment A2_b Bromination of (*E*)-Stilbene:
meso-Stilbene Dibromide 463
 Reaction 464
 Discussion 464
 Semi-Microscale Experimental Procedure 466
 Optional Macroscale And Microscale Preparations 467
 Experiment A3_b Dehydrohalogenation of *meso*-Stilbene
 Dibromide: Diphenylacetylene 469
 Reaction 469
 Discussion 469
 Semi-Microscale Experimental Procedure 470
 Optional Macroscale And Microscale Preparations 471
 Experiment A4_{ab} Hexaphenylbenzene 472
 Reaction 473
 Discussion 473
 Experimental Procedure 474
SEQUENCE B *The Stepwise Synthesis of Nylon-6,6* 476
 Experiment B1 Oxidation of Cyclohexanol: Adipic
 Acid 477
 Reaction 477
 Discussion 477
 Experimental Procedure 479
 Experiment B2 Preparation of an Acid Chloride: Adipoyl
 Chloride 480
 Reaction 480
 Discussion 481
 Experimental Procedure 481
 Experiment B3 Preparation of a Polyamide: Nylon-6,6 483
 Reaction 483
 Discussion 483
 Experimental Procedure 484
SEQUENCE C *The Synthesis of Sulfanilamide* 485
 The Sulfa Drugs 485
 Experiment C1 Acetylation of Aniline:
 2,2,2-Trifluoroacetanilide 486
 Reaction 487
 Discussion 487
 Experimental Procedure 488
 Experiment C2 Chlorosulfonation of 2,2,2-Trifluoroacetanilide:
p-(Trifluoroacetamido)benzenesulfonyl Chloride 490
 Reaction 490
 Discussion 490
 Experimental Procedure 491
 Experiment C3 Preparation of an Arene Sulfonamide:
 Sulfanilamide 493
 Discussion 493
 Experimental Procedure 494
- ## Chapter 7 Appendix
- ### ADVANCED LABORATORY EXPERIMENTATION: SEQUENCES D, E, AND F 497
- SEQUENCE D** *The Synthesis of 2'-Bromostyrene* 497
The Synthesis of a Fragrance 497
 Experiment D1 The Verley–Doebner Modification of the
 Knoevenagel Reaction: *trans*-Cinnamic Acid 500
 Reaction 500
 Discussion 500
 Experimental Procedure 503
 Experiment D2 Bromination of *trans*-Cinnamic Acid:
erythro-2,3-Dibromo-3-phenylpropanoic Acid 504
 Reaction 505
 Discussion 505
 Experimental Procedure 507
 Experiment D3 An Elimination Reaction with
erythro-2,3-Dibromo-3-phenylpropanoic Acid:
 2'-Bromostyrene 509
 Reaction 509
 Discussion 509
 Experimental Procedure 510
 Part A Conditions: Water Solvent 511
 Part B Conditions: Acetone Solvent 512
SEQUENCE E *The Synthesis of Piperonylnitrile
 from Piperonyl Alcohol* 514
 Synthetic Perfumes 515
 Experiment E1 Piperonal 516
 Reaction 516
 Discussion 517
 Experimental Procedure 518
 Optional Microscale Preparation 520
 Experiment E2 Piperonal *O*-(2,4-Dinitrophenyl)oxime 522
 Reaction 522
 Discussion 522
 Experimental Procedure 523
 Optional Microscale Preparation 525

- Experiment E3 Piperonylnitrile 526
 Reaction 526
 Discussion 526
 Experimental Procedure 528
- SEQUENCE F Introduction to Photochromism: The Synthesis of a Photochromic Imine 530**
- Classes of Photochromic Reactions 530
 Applications of Photochromism 532
 The Reactions Of Sequence F 533
- Experiment F1 An Aldol Reaction: *trans*-4-Nitrochalcone 534
 Reaction 535
 Discussion 535
 Experimental Procedure 536
- Experiment F2 *erythro*-2,3-Dibromo-3-(4-nitrophenyl) propiophenone 539
 Reaction 539
 Discussion 539
 Experimental Procedure 541
- Experiment F3 *trans*-2-(4-Nitrophenyl)-3-benzoylaziridine 545
 Reaction 545
 Discussion 545
 Experimental Procedure 548
- Part A 549
 Part B 549
- Experiment F4 A Photochromic Imine: 2-*exo*-6-*exo*-2,4-Diphenyl-6-(4-nitrophenyl)-1,3-diazabicyclo[3.1.0]hex-3-ene 552
 Reactions 552
 Discussion 553
 Experimental Procedure 556
- Chapter 8**
- SPECTROSCOPIC IDENTIFICATION OF ORGANIC COMPOUNDS 560**
- Infrared Spectroscopy 560
 Introduction to Group Frequencies: Interpretation of Infrared Spectra 561
 A Survey of Group Frequencies Identified in Organic Molecules 564
- Group Frequencies of the Hydrocarbons 565

Sample Introduction	636
Gas Chromatography/Mass Spectrometry (GC/MS)	636
Capillary Columns	636
Split Injection	637
Split/Splitless Injection	637
Features of the Mass Spectrum	638
Terms	639
Isotope Peaks	639
Recognizing the Molecular Ion	641
Mass Spectral Interpretation	642
Case Study: Synthesis of Methyl Benzoate	643

Chapter 9

QUALITATIVE IDENTIFICATION OF ORGANIC COMPOUNDS 649

Organic Qualitative Analysis	649
Preliminary Tests	651
Nonchemical Tests	651
Ignition Test	652
Separation of Impurities	653
Detection of Elements Other than Carbon, Hydrogen, or Oxygen	654
Sodium Fusion	654
Sulfur	655
Nitrogen	656
The Halogens (Except Fluorine)	656
Solubility Characteristics	658
The Classification Tests	660
Alcohols	660
Periodic Acid: Vicinal Diols	662
Aldehydes and Ketones	662
Alkanes and Cycloalkanes: Saturated Hydrocarbons	664
Alkenes and Alkynes: Unsaturated Hydrocarbons	665
Alkyl Halides	665
Amides, Ammonium Salts, and Nitriles	667
Amines	668
Aromatic Hydrocarbons with NO Functional Groups	669
Carboxylic Acids	670
Esters	670
Ethers	671
Methyl Ketones and Methyl Carbinols	671

Nitro Compounds	672
Phenols and Enols	673
Preparation of Derivatives	674
Carboxylic Acids	675
Preparation of Acid Chlorides	675
Amides	675
Anilides	676
Toluidides	676
Alcohols	676
Phenyl- and α -Naphthylurethanes (Phenyl- and α -Naphthylcarbamates)	676
3,5-Dinitrobenzoates	677
Aldehydes and Ketones	678
2,4-Dinitrophenylhydrazones	678
Semicarbazones	678
Amines	678
Primary and Secondary Amines: Acetamides	678
Primary and Secondary Amines: Benzamides	679
Primary, Secondary, and Tertiary Amines: Picrates	679
Acid Chlorides and Anhydrides	680
Amides	680
Aromatic Hydrocarbons	680
Picrates	680
Nitriles	680
Hydrolysis to Amides	680
Phenols	681
α -Naphthylurethanes (α -Naphthylcarbamates)	681
Bromo Derivatives	681
Aliphatic Hydrocarbons, Halogenated Hydrocarbons, Amides, Nitro Compounds, Ethers, and Esters	682

ADVANCED MICROSCALE ORGANIC LABORATORY EXPERIMENTS 685

EXPERIMENT [1 _{adv}] Diborane Reductions: Thioxanthene and Xanthene	686
Discussion	687
Experiment [1A _{adv}] Thioxanthene	689
Reaction	689
Experimental Procedure	689
Experiment [1B _{adv}] Xanthene	690
Reaction	690
Experimental Procedure	690

EXPERIMENT [2_{adv}] Heterocyclic Ring Synthesis:*Benzimidazole* 695

Reaction 695

Discussion 695

Experimental Procedure 696**Experiment [3_{adv}] Heterocyclic Ring Synthesis:***4-Hydroxycoumarin and Dicoumarol* 698

Reaction 698

Discussion 699

Experiment [3A_{adv}] 4-Hydroxycoumarin 701

Experimental Procedure 701

Experiment [3B_{adv}] Dicoumarol 702

Reaction 702

Experimental Procedure 703

EXPERIMENT [4_{adv}] Grignard and Aryl Halide*Cross-Coupling Reaction: 1-Methyl-2-(methyl-d₃)-benzene* 704

Reactions 705

Discussion 705

Experimental Procedure 707

EXPERIMENT [5_{adv}] Oxidative Coupling of 2-Na*1,1'-Bi-2-Naphthol* 711

Reaction 711

Discussion 712

Experimental Procedure 713

EXPERIMENT [6_{adv}] Beckmann Rearrangement:*Benzanilide* 715

Reaction 716

Discussion 716

Experimental Procedure 717

EXPERIMENT [7_{adv}] Preparation of an Enol Acetate*Cholesta-3,5-dien-3-ol Acetate* 722

Reaction 723

Discussion 723

Experimental Procedure 724
