Preface	V	Types of Infarction	21
Contributors	VI	Imaging Studies	21
Abbreviations	VIII	Computed Tomography and CT Angiography	21
		CT Angiography	23
		CT Perfusion Imaging	24
		Magnetic Resonance Imaging and	
		MR Angiography	25
		Extracranial and Transcranial Doppler and	
		Color Duplex Sonography	26
		Digital Subtraction Angiography and Patient	
		Selection for Interventional Treatment	28
		References	29
I Neuroimaging of Stroke	1		
1 Internal Carotid Artery Occlusion	2	4 Dissections ...	30
<i>O. Jansen</i>		<i>T. Boeckh-Behrens</i>	
Introduction	2	Introduction	30
Segmental Anatomy of the Internal		Imaging Studies	31
Carotid Artery	2	Digital Subtraction Angiography	32
Definition of Carotid Artery Occlusion	2	CT Angiography	32
Frequency of Carotid Artery Occlusions	2	Ultrasound	32
Imaging Studies	2	Magnetic Resonance Imaging and	
Computed Tomography	2	MR Angiography	33
CT Angiography	3	Summary	37
Angiography	4	References	37
Pseudo-occlusion of the Internal Carotid Artery ...	5		
References	7	5 Cerebral Venous and Sinus Thrombosis	38
2 Middle Cerebral Artery Occlusion	8	<i>J. Linn</i>	
<i>C. Reidel</i>		Introduction	38
Introduction	8	Epidemiology	38
Segmental Anatomy of the Middle		Risk Factors	38
Cerebral Artery	8	Subtypes	38
Etiology and Clinical Manifestations		Clinical Signs and Symptoms	38
of Middle Cerebral Artery Occlusion	9	Laboratory Findings	41
Imaging Studies	9	Prognosis and Outcome	41
Noncontrast Computed Tomography	9	Imaging Studies	41
CT Perfusion Imaging	13	Direct and Indirect Signs of Cerebral Venous	
CT Angiography and Digital Subtraction		and Sinus Thrombosis	41
Angiography	14	Digital Subtraction Angiography	42
References	16	Magnetic Resonance Imaging	42
3 Vertebrobasilar Occlusion	18	Computed Tomography	45
<i>D. Morhard and G. Schulte-Altdorneburg</i>		Summary	47
Introduction	18	References	47
Definition, Etiology, and Incidence	18		
Symptoms of Brainstem and Cerebellar		Neuroimaging of Stroke:	
Syndromes	19	Summary and Recommendations	49

■ Treatment of Acute Ischemic Stroke	51		
6 Thrombolysis	52	Temporary Stenting in Stroke Patients	92
Intravenous Thrombolysis	52	J. Klisch	
G. F. Hamann		Introduction	92
Introduction	52	Patient Preparation	93
Basic Principles of Coagulation Physiology	52	Access	93
Experimental Studies of Thrombolysis in		Crossing and Extracting the Thrombus	93
Acute Stroke	54	Retrievers and Other Thrombectomy Systems	96
Clinical Studies of Thrombolysis in		T. Struffert and A. Doerfler	
Acute Stroke	54	Introduction	96
Everyday Practice of Intravenous Thrombolysis		Technique	96
in Acute Stroke	60	Classification of Systems	97
Guidelines	60	Summary	99
Practical Recommendations	61	References	100
Special Cases	62		
Side Effects and Hemorrhages	65	8 Treatment Concepts and Results	103
Best Practice	66	Carotid-T Occlusion	103
Outlook	66	G. Fesl	
Intra-arterial Thrombolysis	66	Introduction	103
B. Eckert		Treatment	103
Introduction	66	Study Results	108
Technique	67	Conclusion	109
Pharmacology	67	Occlusion of the Middle Cerebral Artery	109
Indication	73	T. Liebig	
Efficacy	73	Introduction	109
Bridging Therapy	76	Anatomy	109
Complications	78	Imaging Tests	110
Demand for Local Intra-arterial Thrombolysis	78	Concepts: Intravenous or Intra-arterial	
Summary	79	Thrombolysis or Mechanical Extraction?	111
References	79	Is General Anesthesia Necessary?	115
		Summary	115
7 Mechanical Recanalization Materials	84	Basilar Artery Thrombosis	116
Aspiration Thrombectomy	84	G. Schulte-Altdorneburg and H. Brueckmann	
A. Kreusch and M. Knauth		Introduction	116
Introduction	84	Indications for Endovascular Therapy	116
Penumbra System	84	Treatment Concepts and Results	117
Indications and Contraindications	87	Cervical Artery Dissections	124
Technique	87	A. Rohr and H. Goerike	
Complications	88	Introduction	124
Recanalization Rate and Neurologic Outcome	89	Study Results and Guidelines	124
Combination Therapies	90	Treatment	124
Case Report	90	Interventional Therapy	126
Summary	91	References	134
		Treatment of Acute Ischemic Stroke:	
		Summary and Recommendations	139

III Treatment of Acute Cerebral Venous Occlusions	141
9 Treatment of Acute Cerebral Venous Occlusions	142
<i>T. E. Mayer</i>	
Epidemiology	142
Etiology, Pathogenesis, and Symptoms	142
Imaging Studies	142
Treatment	142
Endovascular Procedures	142
Pharmacologic Thrombectomy	143
Mechanical Thrombectomy	143
AngioJet	143
Penumbra System	143
Retrievers	143
Angioplasty	144
References	145
Treatment of Acute Cerebral Venous Occlusions: Summary and Recommendations	146
IV Treatment of Supra-aortic Extra- and Intracranial Stenoses	147
10 Equipment: Stents, Filters, and Balloon Systems	148
<i>M. Holtmannspoetter</i>	
Introduction	148
Materials for the Treatment of Extracranial Stenoses	148
Stents	149
Dilatation Catheters	151
Protection Systems	151
Materials for the Treatment of Intracranial Stenoses	152
Stents	153
Dilatation Catheters	153
References	154
11 Extracranial Carotid Stenoses	155
<i>M. Tietke and O. Jansen</i>	
Introduction	155
Indications	155
Study Results	155
Clear Indications for Stenting	157
Materials	158
Protection Systems	158
Carotid Stents	158
Technical Approach	158
Diagnostic Studies, Informed Consent, and Medication	158
Patient Preparations and Technique	159
Postprocedure Care	161
Special Case of an ICA Pseudo-occlusion	162
Authors' Results	164
Summary	165
References	165
12 Intracranial Stenoses	167
<i>W. Kurre</i>	
Introduction	167
Patient Selection	167
Informed Consent	168
Planning, Preparations, and Techniques	168
Scheduling the Procedure	168
Antiplatelet and Anticoagulant Therapy	169
Anesthesia	169
Arterial Access and Guide Catheter	169
Tips on Material Selection	170
Balloon Angioplasty	171
Stent Angioplasty	171
Management of Complications	172
Postinterventional Management	174
Causes of Postinterventional Bleeding	175
Causes of Postinterventional Ischemia	175
Follow-Up Care	175
Summary	176
References	176

13 Subclavian Steal Syndrome	178	Treatment	185
<i>A. Berlis</i>		Indications	185
Introduction	178	Endovascular Therapy	185
Etiology and Clinical Presentation	178	Complications	187
Indications	179	References	188
Treatment	179		
Operative Treatment	179	15 Proximal Stenosis of Supra-aortic Vessels	189
Endovascular Treatment	179	<i>J. Berkefeld</i>	
Follow-up Care	182	Epidemiology and Risk of Stroke	189
References	182	Clinical Presentation and Diagnosis	189
		Interventional Treatment Options	191
14 Proximal Vertebral Artery Stenosis	183	Results of Interventional Therapy	192
<i>N. Lummel and H. Brueckmann</i>		Indications for Interventional Treatment	193
Anatomy	183	Summary	193
Etiology of Stenosis	183	References	193
Diagnosis	184		
Invasive Studies	184	Treatment of Supra-aortic Extra- and Intracranial	
Noninvasive Studies	184	Stenoses: Summary and Recommendations	195
		Index	197
