Preface	1
<i>W.F. Caspary</i>	
Chapter 1: Functional morphology of the small intestine	
Functional morphology of the small intestine	7
<i>M. Eberlein-Gonska, A. von Herbay and H.F. Otto</i>	
Chapter 2: Functions of the small intestine	
Absorption: general aspects and transport mechanisms in the small intestine	63
<i>W.F. Caspary</i>	
Secretion	89
<i>G.J. Krejs</i>	
Motility	95
<i>H. Ruppin</i>	
Hormone production: the small intestine and regulatory peptides	106
<i>R. Ebert and W. Creutzfeldt</i>	
The small intestine — its role in lipid metabolism	126
<i>E. Windler, F.U. Beil and H. Greten</i>	
Chapter 3: Nutrient absorption	
Absorption of carbohydrates	139
<i>B. Elsenhans and W.F. Caspary</i>	
Absorption of proteins	160
<i>H.J. Steinhardt</i>	

Contents

Absorption of fat and fat-soluble vitamins <i>W. Stremmel</i>	175
Absorption of water-soluble vitamins <i>B. Elsenhans</i>	185
Absorption of minerals <i>U. Karbach</i>	197
Absorption of macromolecules <i>J. Seifert and W. Saß</i>	207
Chapter 4: Disorders and modulation of intestinal absorption	
Pathophysiology and clinical aspects of the malabsorption syndrome <i>W.F. Caspary</i>	217
Role of the colon in carbohydrate absorption and malabsorption <i>W.F. Caspary</i>	248
Control of absorption: delaying absorption as a therapeutic principle <i>B. Lembcke</i>	263
Pharmacology of α -glucosidase inhibitors <i>L. Müller and W. Puls</i>	281
The clinical use of α -glucosidase inhibitors <i>U.R. Fölsch and B. Lembcke</i>	301
Chapter 5: Treatment of diabetes mellitus	
Dietary therapy <i>K. Schöffling and C. Rosak</i>	321
Drug therapy of type-2 diabetes mellitus <i>C. Rosak and K. Schöffling</i>	331
The insulin therapy of type-1 diabetes mellitus <i>C. Rosak and K. Schöffling</i>	345
Author index	360
Subject index	361
