

# How Each Chapter Begins

Each chapter in this workbook begins with a brief general topic point of interest. The topics are thought to be important considerations in Gynecologic/Urogynecologic imaging but are not presented in any specific order. No questions are asked of the reader, but the information may be helpful in subsequent cases.

## LIST OF TOPICS

- Chapter 1: Semantics in the context of pelvic imaging
- Chapter 2: How Doppler is used in this workbook
- Chapter 3: Approach to exam assessment
- Chapter 4: Basic 3D instrumentation

- Chapter 5: Normal endoanal 3D image of the distal internal and external anal sphincter
- Chapter 6: Tomographic ultrasound imaging of the normal transperineal anal sphincter complex 3D volume set
- Chapter 7: Tomographic ultrasound imaging of the abnormal transperineal anal sphincter complex 3D volume set
- Chapter 8: "Read" zoom versus "Write" zoom
- Chapter 9: Information on the 3D volume set screen is abundant
- Chapter 10: Anal sphincter complex Color Power Doppler pulse repetition frequency setting changes
