Presentations

Synthesis, characterisation and energetic performance of a new copper complex based on 3,4,5-trinitro-1H-pyrazole <i>Ashfaq Afsar, Xiaojiao Liu, Carole A. Morrison, Colin R. Pulham, Patrick McMaster</i>	6
Detonation simulants of TATP as donor charges in a detonation train <i>Djamal Belmehdi, Moulay K. Boulkadid, Michel H. Lefebvre, Romuland van Riet</i>	12
Synthesis of graphene oxide/nano-silica composite and its application for decontamination of 2,4-dinitroaniline from water <i>Bharti, Rekha Mann, Pramod Kumar Rai</i>	26
Synthesis of new high energy molecules: Focus on one tetrazole derivative and generation of new structures <i>Lucas Blanck, Thibaud Alaime, Geneviève Eck, Rachid Baati</i>	36
Radiative and reactive coupling of lightning to electro-explosive devices in storage <i>Willem Q. Boon</i>	41
Experimental analysis of liquid jet propulsion systems effects on IEDs casing materials <i>Alexandru Casapu, Marin Lupoaie, Daniel Constantin, Dumitru C. Berechet</i>	50
A method for analysis of chiral molecules for the purpose of property prediction of EMs <i>Jack Davis, Frank Marrs, Marc Cawkwell, Virginia Manner</i>	57
Composition for cooling of pyrotechnically generated hot aerosols <i>Kavita Devi, Amit Saxena, Prem Chand, Braham Prakash, Rajesh Kumar Tanwar, Arvind Kumar</i>	62
Ballistic modifiers for nitrocellulose gunpowder <i>Stepan Frebort, Jakub Moravec, Zdenek Jalovy</i>	68
Dive into the thermal realms: Analyzing combustion and temperature characteristics in silicon-based compositions for time-delay detonators <i>Marcin Gerlich, Waldemar Trzciński, Marcin Hara</i>	73
Study of explosion-generated plasma, its velocity and effects upon collision <i>Stepan Jirman, Jindrich Kucera, Jakub Selesovsky, Jiri Pachman</i>	88
Tailoring the properties of ADN using co-crystallisation <i>Akachai Khumsri, Carole A. Morrison, Colin R. Pulham, Stuart R. Kennedy</i>	100

Synthesis and characterization of ^{13}C isotopically labeled $^{13}\text{C}_2\text{-FOX-7}$ (1,1-diamino-2,2-dinitroethylene)	
<i>Jasmin T. Lechner, Thomas M. Klapötke</i>	106
Amine oxidation under challenging conditions: Implementation of a flow-chemistry procedure for 3,4-dinitrofurazan synthesis	
<i>Patrick Lieber, Uwe Schaller, Thomas M. Klapötke</i>	111
Experimental investigation on door breaching using explosives and its effects on room occupants	
<i>Marin Lupoae, Catalin Baci, Anabella Cotovanu, Alexandru Casapu</i>	118
Characterizing the shock sensitivity of HMX using laser-driven flyers	
<i>Julie Morand, Philippe Hébert, Steven Kerampran, Michel Arrigoni</i>	125
Coagglomerated crystals of attractive nitramines in nitrocellulose gunpowder: A technological application	
<i>Miroslav Novak, Veerabhadragouda Patil, Ladislav Velehradsky, Karel Kubat, Svatopluk Zeman</i>	134
Toward estimating explosivity	
<i>Jimmie Oxley, Noah Scarpelli, James Smith</i>	144
Experimental characterization of emulsion explosives with inert additives	
<i>João Pimenta, Joana Quaresma, Ricardo Mendes</i>	152
A high-pressure structural study of potassium dinitramide	
<i>Chan Qi Feng, Craig L. Bull, Nicholas P. Funnell, Christopher J. Ridley, Carole A. Morrison, Cameron J. G. Wilson, Angela Fong, Colin R. Pulham</i>	161
Towards a machine learning method to rationalise the impact sensitivities of energetic materials	
<i>Heather M. Quayle, Jack M. Hemingway, Colin R. Pulham, Carole A. Morrison</i>	166
Crystallization agents for ADN melting droplets	
<i>Ligia Radulescu</i>	172
Laser-driven flyer experiments: analogy with Gurney high explosive plate acceleration model	
<i>Baptiste Reynier, Ondrej Zeman, Julien Le Clanche, Jiri Pachman, Jean Marc Chevalier, Lorenzo Taddei, David Hebert, Michel Arrigoni</i>	176
A picture of the scientific explosives community before artificial intelligence takes over everything	
<i>Tomasz Sałaciński</i>	186
Evaluating the comparative potential of two indigenous microbial strains for degradation of 2,4,6- trinitrotoluene (TNT) and their biotransformation mechanisms	
<i>Pritam Sangwan, Shruti Kaushik, Kapil Kumar, Pramod Kumar Rai</i>	195
Improving the precision of blast-induced seismic effect measurement results	
<i>Siniša Stanković, Ivana Dobrilović, Davorin Jurenić, Mario Dobrilović</i>	205

Evaluating the effect of structural reorientation to thermochemical and energetic properties of 1,4-Diamino-3,6-dinitropyrazolo[4,3-c]pyrazole <i>Lamla Thungatha, Conrad Mahlase, Lisa Ngcebesha</i>	211
Electrochemical synthesis of energetic materials and high-nitrogen compounds <i>Joseph Yount, Davin Piercey, Mathias Zeller</i>	224
Investigation of the ability of nonel shock tubes to generate high pressure shock waves <i>Ondrej Zeman, Petr Kuna, Vojtech Pelikan, Jiri Pachman</i>	231
Excitation instead of heat and impact: A photocatalytic viewpoint on the laser ignition of energetic materials <i>Anton Zverev</i>	237

Posters

Influence of particle size on the thermal-mechanical properties of composite propellants <i>Safea Alblooshi, Guillaume Kister, Peter Wilkinson</i>	248
The effect of graphene oxide (GO) on the bulk crystallization of ammonium nitrate <i>Fatema Alhosani, Ranko M. Vrcelj</i>	258
Investigating the effects of natural aging on PBXN-111 <i>Aeysha Alkatheeri, Nathalie Mai, Guillaume Kister, Samira Belghiche</i>	268
Stability of the extruded double base (NC/DEGDN) modified with graphene oxide (GO) <i>Maria Alnaqbi, Nathalie Mai, Jeff Pons</i>	277
Assesment of a new solid thermobaric composition used for warheads loading <i>Cosmina Maria Aonicesei, Liviu Cristian Matache, Adrian Nicolae Rotariu, Dana Andrea Alexandra Pîrvoi, Razvan Marian Mircioaga</i>	289
Rheology study of HTPB prepolymer suspensions with different metal micro- and nano-sized particles <i>Danica Bajić, Ivan Dimitrijević, Mirjana Krstović, Mladen Timotijević, Bojana Fidanovski, Jovica Bogdanov, Slavko Mijatov</i>	295
Study of the RDX photolysis degradation products <i>Zoran Bajić, Jovica Bogdanov</i>	304
Recent developments on energetic di- and trisubstituted cubanes <i>Andreas Bartonek, Thomas M. Klapötke, Burkhard Krumm</i>	309

Experimental research on TNT equivalent of different explosives based on air shock wave <i>Jovica Bogdanov, Zoran Bajić, Danica Bajić, Radoslav Sirovatka, Mirjana Krstović, Mladen Timotijević</i>	314
Assessing chemical inter-reactivity of high explosives. An outline for an adequate way <i>Manfred A. Bohn</i>	321
Exploring the mechanical characteristics of basebleed propellants: A comparative study <i>Bengi Ezgi Çelik Fidancı, Taner Atalar, Ali Fatih Zeybek, Halil Ipek</i>	342
Identification and assessment of potential thermostable and powerful explosives <i>Matthieu Daniel, Kevin Ruffray, Lydia Benkaidali, Clément Wespiser, Samia Aci-seche, Eric Pasquinet, Didier Mathieu, Pascal Bonnet</i>	348
Development and characterization of novel polyurethane formulations for composite rocket propellants <i>Florin-Marian Dîrloman, Traian Rotariu, Gabriela Toader, Ovidiu-George Iorga, Aurel Diacon</i>	352
Modeling and application of civil explosives in different types of soil <i>Ivana Dobrilović, Denis Težak, Mario Dobrilović, Muhamed Sućeska, Siniša Stanković, Vinko Skrlec, Vječislav Bohanek</i>	360
Influence of fillers on the mechanical and thermal characteristics of rocket motor liners based on HTPB <i>Emre Erten, Taner Atalar, Cevdet Kaynak</i>	366
Risks in ammunition clean-up of the Black sea aquatoria <i>Radi Ganev</i>	377
Influence of erosion-induced geometry changes on the flow vented vessel experiments <i>Thomas Heidebrecht, Philip Pietrek, Veronica Kuchenreuther-Hummel</i>	381
LOVA propellants based on RDX and GAP energetic plasticizers <i>Dorin Holeoleo, Traian Rotariu, Florin Marian Dirloman, Adrian Nicolae Rotariu, Ioana Barcan</i>	387
A theoretical exploration of hexazine anion $[N_6]^{4-}$ <i>Shuaijie Jiang, Pengcheng Wang, Ming Lu</i>	395
A comparison of the acoustic performance of flash compositions used in firecrackers <i>Petr Kuna, Ondrej Zeman, Vojtech Pelikan</i>	402
OPTIMEX: Detonation pressure measurement using stacked PTFE sheets <i>Martin Künzel, Jindrich Kucera, Stepan Jirman, Filip Sazeczek, Jiri Pachman</i>	406
Dynamic calibration and implementation of PVDF gauges for shockwave measurements <i>Julien Le Clanche, Martin Monloubou, Lorenzo Taddei, Steven Kerampran, Jeremie Tartiere, Louis Morge-Rollet, Michel Arrigoni</i>	412
Experimental evaluation of detonation parameters in a single test <i>Ricardo Mendes, João Pimenta, João Mota, Joana Quaresma</i>	418

Dynamic vapor sorption study of MTX-1 alkali metal salt hydrates <i>Jakub Mikulastik, Robert Matyas, Libor Cervenka, Martin Adam</i>	426
Study of the gun powders ignition by laser beam in closed vessels <i>Razvan Marian Mircioaga, Bogdan Pulpea, Adrian Nicolae Rotariu, Florin Marian Dirloman</i>	435
Towards finding lead-free ballistic modifiers in double-base propellants using computational modelling <i>Harvey J. Newman, Lisette R. Warren, Colin R. Pulham, Carole A. Morrison</i>	442
Innovative coagglomeration method for producing the energy-safety balanced cocrystals of attractive nitramines <i>Veerabhadragouda Patil, Svatopluk Zeman</i>	449
The influence of magnesium liner on artillery shell explosive disposal <i>Dana Andrea Alexandra Pîrvoi, Liviu Cristian Matache, Adrian Nicolae Rotariu, Cosmina Maria Aonicesei, Razvan Marian Mircioaga</i>	459
Energetic salts based on 5-(5-Amino-1H-1,2,4-triazole-3-yl)-1H-tetrazole with good thermal stability <i>Yaqi Qin, Pengcheng Wang</i>	470
Synthesis and energetic characterization of borane-amines on high-nitrogen heterocycles <i>Nicholas Scherschel, Davin Piercey</i>	475
Synthesis, thermal and spectroscopical properties of the cocrystal CL-20-MDNT <i>Peter Schultz, Michael Herrmann, Luisa Wartner</i>	483
Innovative perspective on measuring the sensitivity of boron potassium nitrate to different stimuli <i>Danillo Fernando Vianna Cantini, Jiri Pachman, Vojtech Pelikan</i>	487
60 mm thermobaric mortar round fragmentation effect <i>Jana Vlhova</i>	495
High stability N-rich energetic materials based on 5,5'-(1H-pyrazole-3,5-diyl)bis(4H- 1,2,4-triazole-3,4-diamine) <i>Guofeng Zhang, Zhiwen Ye</i>	504
