Contents

CAREER SKILLS AN	ND KNOWLEDGE		LANG	UAGE SKILLS		LANGUAGE KNOWLEDGE			
ťs my job	Number talk	Listening	Reading	Speaking	Writing	Language spot	Vocabulary	Pronunciation	
Engineering p.4									
Hassan Abdul Mosaad, nachinist		Choosing a career in engineering	Scanning		A class enrolment form	Present Simple and Past Simple	Subjects within engineering		
Design and modellin	g p.10	1 50 8/							
Hari Sivagnaman, structural design engineer	Calculations	Discussing a prototype	Computers in design and modelling	Talking about design considerations		Permission and necessity	Nouns ending in -tion		
Measurement p.16	- Maran. 35								
ony Macari, inspector	Weights and measures	Inspection and quality control	Quality control in welding		A short inspection report	Possibility and probability	Units and measurement	Word stress	
Strength and stiffne	ss p.22								
oaquin Calvo Iernandez, test engineer	Numbers Talking about forces and stress	Test processes	The Millau Viaduct	Testing strength and stiffness		The Passive	Forces and strain		
Movement p.28									
Pete Normington, hircraft propulsion engineer	Thrust, speed, velocity, and acceleration	Maglev trains	The JetLev-Flyer	Explaining a speed—time graph	Explaining technical specifications	Prepositions of location	Forces and motion		
5 Electricity p.34									
nna Panikowsky, rainee electrical ngineer	Resistance	Electrical safety	Powering the ISS		Giving instructions and warnings	Warnings and instructions	Circuit essentials		
Electronics p.40									
liver Kerr, electronics esearch engineer	Capacitor ratings: small numbers	Diodes, LEDs, and transistors	Engineering for the future		A short report	Past Simple and Present Perfect	Semiconductor basics	/p/ and /b/	
Computing and logic	: p.46								
onny Merali, omputer systems nanager	Decimal and binary systems	Logic gates			Describing a network	Connecting words	Logic gate basics	Sentence stress	

CAREER SKILLS AN	ND KNOWLEDGE		LANGU	JAGE SKILLS	LANGUAGE KNOWLEDGE

Engineering p.4								
Hassan Abdul Mosaad, machinist		Choosing a career in engineering	Scanning		A class enrolment form	Present Simple and Past Simple	Subjects within engineering	
2 Design and modellin	g p.10	1 50 8/						
Hari Sivagnaman, structural design engineer	Calculations	Discussing a prototype	Computers in design and modelling	Talking about design considerations		Permission and necessity	Nouns ending in -tion	
8 Measurement p.16	Quer. 36							
Tony Macari, inspector	Weights and measures	Inspection and quality control	Quality control in welding		A short inspection report	Possibility and probability	Units and measurement	Word stress
Strength and stiffnes	ss p.22							
loaquin Calvo Hernandez, test engineer	Numbers Talking about forces and stress	Test processes	The Millau Viaduct	Testing strength and stiffness		The Passive	Forces and strain	
5 Movement p.28								
Pete Normington, aircraft propulsion engineer	Thrust, speed, velocity, and acceleration	Maglev trains	The JetLev-Flyer	Explaining a speed—time graph	Explaining technical specifications	Prepositions of location	Forces and motion	
6 Electricity p.34						P3		
Anna Panikowsky, trainee electrical engineer	Resistance	Electrical safety	Powering the ISS		Giving instructions and warnings	Warnings and instructions	Circuit essentials	
7 Electronics p.40								
Oliver Kerr, electronics research engineer	Capacitor ratings: small numbers	Diodes, LEDs, and transistors	Engineering for the future		A short report	Past Simple and Present Perfect	Semiconductor basics	/p/ and /b/
B Computing and logic	p.46							
Sonny Merali, computer systems nanager	Decimal and binary systems	Logic gates			Describing a network	Connecting words	Logic gate basics	Sentence stress

CAREER SKILLS	AND KNOWLEDGE		LANGU	AGE SKILLS		LANGUAGE KNOWLEDGE			
ťs my job	Number talk	Listening	Reading	Speaking	Writing	Language spot	Vocabulary	Pronunciatio	
Materials p.64									
im Dong-sung, naterials specialist	Strength, stiffness, and toughness	An aircraft wing spar problem	Aluminium	Discussing a stress—strain curve		Comparatives and superlatives	Properties and processes		
0 Air and water p.7	0	3							
osé Martinez, diving nanager	Units of pressure	Building under the sea	Hydrofoils	Describing pumps and compressors		too and enough	Forces in air and water		
Heat p.76									
drian Ianescu, chief ngineer	Saying temperatures	A tour of a power station	Dealing with heat	Describing heat engine cycles		Cause and result	Heat production and transfer	Word stress	
2 Light and sound	p.82								
ernadette Ravaux, coustics engineer	Frequency and wavelength	The Hubble Space Telescope	Lasers		A short explanation of parabolic technology	Phrasal verbs	Describing sound and light		
3 Manufacturing p	.88	6. 2. 325							
örg Bergmann, nanufacturing esearch engineer	Cost engineering	A manufacturing process	Lean manufacturing	Explaining a manufacturing process		Linking sentences: because, however, although	Some manufacturing processes		
4 Codes and stand	ards p.94								
olin Robertson, uality engineer	ISO strength rating	Comparing codes	A certification case study		A short report about a problem	Relative clauses	Codes and standards	Saying relative pronouns	
5 Helping to save t	he planet p.100								
ave Carr, process ngineer	Explaining trends	The greenhouse effect and geo-engineering			Carbon storage	Time expressions	The carbon cycle		
airwork p.106	Irregular verbs p.116	Symbols and	abbreviations p.117	Grammar ref	erence • p.118 Li	istening scripts • p.1	25 Glossary •	p.132
