Introduction 1
MICHAEL ARTIS, ANINDYA BANERJEE AND MASSIMILIANO MARCELLINO

1 New Member States: macroeconomic outlook and forecasts 9
EMILIO ROSSI AND ZBYSZKO TABERNACKI
1.1 The recent economic recovery in the new Member States 9
1.2 Inflation's temporary resurgence not yet a concern 12
1.3 The rush to the euro: a dose of realism 13
1.4 Fiscal challenges and interest rate convergence 16
1.5 Country overviews 17
1.5.1 Poland's expansion to continue beyond 2005 17
1.5.2 The Czech Republic to rely on external demand and investment 20
1.5.3 Hungary's manufacturing sector and investment are driving accelerated growth 23
1.5.4 Fiscal reforms place Slovakia as the most progressive country in Central Europe 26
1.5.5 Slovenia looks to net exports to boost growth 29
1.5.6 The Baltic again to set the pace for economic growth among the new Member States 32
1.5.7 Cyprus and Malta 40

2 The asymmetric impact of enlargement on old and new Member States: a general equilibrium approach 45
MOHAMED HEDI BCHIR, LIONEL FONTAGNÉ AND PAOLO ZANGHIERI
2.1 Introduction 45
2.2 The pre-enlargement situation 50

2.3 General equilibrium dimensions of enlargement 52
2.4 From trade liberalization to deep economic integration 56
2.4.1 'Trade liberalization' 58
2.4.2 'Market integration' 60
2.4.3 'Accession' 61
2.4.4 Comparison of dynamics across scenarios 65
2.5 Comparison with other studies using a similar methodology 68
2.6 Conclusions 71
References 73

3 Changes in the spatial distribution patterns of European regional activity: the enlargements of the mid-1980s and 2004 75
TONI MORA, ESTHER VAYÁ AND JORDI SURIÑACH
3.1 Introduction 75
3.2 Spatial agglomeration models: theoretical aspects and empirical evidence 77
3.2.1 What have we learned from spatial models? 77
3.2.2 What does the previous evidence of empirical spatial specialisation suggest? 79
3.3 Defining data and indices 81
3.4 Analysis of the distribution of the evolution of spatial activity, 1985–95 82
3.5 The effects of the new enlargement on the distribution of activity: from EU-15 to EU-27 91
3.6 Conclusions 103
References 105

4 Forecasting macroeconomic variables for the new Member States 108
ANINDYA BANERJEE, MASSIMILIANO MARCELLINO AND IGOR MASTEN
4.1 Introduction 108
4.2 Methodology 109
4.2.1 Forecasting models 110
4.2.2 Forecast comparison 113
4.3 The data 113
4.4 Forecasting results 115
4.4.1 The Czech Republic 115
4.4.2 Hungary 119
4.4.3 Poland 122
4.4.4 Slovakia 125
4.4.5 Slovenia 125
4.4.6 The role of Euro area information 130
4.4.7 I(2) prices, wages and money 132
4.5 Conclusions 132
References 133

5 The cyclical experience of the new Member States 135
MICHAEL ARTIS, MASSIMILIANO MARCELLINO AND TOMMASO PROIETTI
5.1 Introduction 135
5.2 The salience of the topic 135
5.3 Our approach 137
5.4 Application and results 140
5.4.1 Classical cycles 140
5.4.2 Growth rate cycles 143
5.4.3 Deviation cycles 145
5.4.4 Comparison with recent studies 149
5.5 Conclusions 151
References 152
Appendix: The dating algorithm 154

6 Demand and supply shocks in the new Member States 159
RAÚL RAMOS AND JORDI SURIÑACH
6.1 Introduction 159
6.2 Asymmetric shocks and the Optimum Currency Areas approach 161
6.3 Empirical analysis 162
6.3.1 Some descriptive statistics 162
6.3.2 Demand and supply shocks: the Bayoumi and Eichengreen (1992) model 167
6.3.3 A dynamic analysis of the degree of shock symmetry in the new Member States 175
6.4 Conclusions 182
References 183

7 Monetary transmission in the new Member States 185
RAÚL RAMOS AND JORDI SURIÑACH
7.1 Introduction 185
7.2 Review of the empirical literature on monetary transmission in the new Member States 187
7.3 Empirical evidence 191
7.3.1 Methodology and data 191
7.3.2 Monetary transmission in the Euro area 192
7.3.3 Monetary transmission in the new Member States 198
7.4 Conclusions 214
References 216

8 Promoting fiscal restraint in three Central European Member States 219
EMILIO ROSSI AND ZBYSZKO TABERNACKI
8.1 Introduction 219
8.2 Background 220
8.3 The weak point of medium-term budgetary planning 221
8.4 Public finance in the pre-accession economic programmes 224
8.5 Scenarios 229

8.5.1 The 'official' scenario 230
8.5.2 The baseline scenario 231
8.5.3 The 'expansion/austerity' scenario 232
8.5.4 The 'fiscal prudence' scenario 232
Appendix A: The results of fiscal scenarios for the CE-3 economies 233
Appendix B: Country case studies 234

9 Current account dynamics in the new Member States 245
PAOLO ZANGHIERI
9.1 Introduction 245
9.2 Basic identities and some stylised facts 246
9.3 How important is the current account? 248
9.4 Methodologies for assessing sustainability 249
9.5 Modelling the current account 252
9.6 A simple econometric model 253
9.6.1 The model 253
9.6.2 Projections 256
9.7 Policy issues 262
9.7.1 Increasing the saving rate? 262
9.7.2 Early adoption of the euro: is it wise? 265
9.8 Conclusions 267
References 268
Appendix A: Data 271
Appendix B: Short-and long-term determinants of the current account 271

10 Challenges to banking sector stability in selected new Member States 274
CHARLES MOVIT
10.1 Introduction 274
10.2 Progress to date in restructuring the banking sectors 275
10.2.1 Privatisation of the banking sectors 275
10.2.2 Restructuring: the Czech case 277
10.2.3 Restructuring: the Polish case 278
10.2.4 Restructuring: the Romanian case 280
10.2.5 Easing the burden of non-performing loans 280
10.2.6 Restructuring and concentration in the banking sectors 284
10.3 Current indicators of operational efficiency and financial stability 286
10.4 Bank regulation and supervision 295
10.5 Challenges to the banking sectors in the run-up to accession and the euro, and policy implications 298
10.6 Conclusions 304
References 305

11 Infrastructure investments as a tool for regional development policy: lessons from the Spanish evidence 306
ROSINA MORENO, ENRIQUE LÓPEZ-BAZO AND MANUEL ARTÍS
11.1 Introduction 306

11.2 Model specification 309
11.3 Data and spatial exploratory analysis 313
11.4 Empirical analysis 321
11.5 Conclusions 327
References 330

12 TFP, costs and public infrastructure: an equivocal relationship 333
ELIANA LA FERRARA AND MASSIMILIANO MARCELLINO
12.1 Introduction 333
12.2 The theoretical framework 336
12.2.1 The Total Factor Productivity approach 337
12.2.2 The production function approach 338
12.2.3 The cost function approach 339
12.3 The data 340
12.3.1 Data sources and definitions 340
12.3.2 Output, private inputs and TFP 343
12.4 The role of public capital 345
12.4.1 Results from growth accounting 345
12.4.2 Results from the production function approach 347
12.4.3 Results from the cost function approach 350
12.4.4 Comparing the results 351
12.4.5 Causality and sensitivity analysis 352
12.5 Conclusions 355
References 357
Appendix A: The data 359
Appendix B: Cobb-Douglas cost function 361
Appendix C: Genelalised Leontief cost function 363

13 Regional policies after the EU enlargement 365
MICHELE BOLDRIN
13.1 Introduction 365
13.2 Initial conditions and simulations of the future 366
13.2.1 Per capita income and labour productivity 366
13.2.2 Saving and investment 366
13.2.3 Labour market 368
13.2.4 Growth accounting 369
13.2.5 Regional inequalities in the new Member States 373
13.2.6 A simulation exercise 374
13.3 Principles, instruments and jurisdiction 378
13.3.1 Which economic principles? 378
13.3.2 Which policy instruments? 380
13.3.3 Which policies? 381
13.3.4 Which jurisdiction? 382
13.4 Conclusions 383
References 385
