

# Contents

<b>Contributors</b>	<b>ix</b>
<b>1 Introduction</b>	<b>1</b>
<i>Karen Carr</i>	
1.1 Virtual reality: tool or concept?	1
1.2 Synthesizing perception	3
1.3 Themes	5
1.4 The human basis for virtual reality	7
<b>2 Virtual environments and environmental instruments</b>	<b>11</b>
<i>Stephen R. Ellis</i>	
2.1 Communication and environments	11
2.2 Virtualization	15
2.3 Origins of virtual environments	22
2.4 Virtual environments: performance and trade-offs	39
<b>3 Visual realism and virtual reality: a psychological perspective</b>	<b>53</b>
<i>Chris Christou and Andrew Parker</i>	
3.1 Introduction: what is visual realism?	53
3.2 Historical overview of visual psychology	55
3.3 Perceiving three dimensions	58
3.4 Natural images	59
3.5 Artificial images and requirements for optimal presentation	62
3.6 Computer graphics	67
3.7 Global illumination and virtual reality	73
3.8 Conclusion	80
<b>4 Vision and displays</b>	<b>85</b>
<i>Graham K. Edgar and Peter J. Bex</i>	
4.1 The 'real' and the 'virtual'	85
4.2 Temporal aliasing	86
4.3 The accommodation response and virtual reality displays	93
4.4 Conclusions	98

<b>5</b>	<b>Head-coupled virtual environment with display lag</b>	<b>103</b>
	<i>Richard H.Y. So and Michael J. Griffin</i>	
5.1	Introduction	103
5.2	Effects of lags on head-coupled virtual environments	105
5.3	Lag compensation	107
5.4	Summary	110
<b>6</b>	<b>Perceptual cues and object recognition</b>	<b>113</b>
	<i>John M. Findlay and Fiona N. Newell</i>	
6.1	Introduction	113
6.2	Approaches to recognition	116
6.3	Experimental studies of visual recognition	120
6.4	Conclusion	127
<b>7</b>	<b>Sensory-motor systems in virtual manipulation</b>	<b>131</b>
	<i>Rupert England</i>	
7.1	Introduction	131
7.2	Perceptuo-motor behaviour	133
7.3	Sensory neurophysiology	137
7.4	The nature of perceptual integration	154
7.5	The nature of response	158
7.6	The nature of manipulation—classification	163
7.7	Manipulating virtual objects	164
7.8	Conclusions and recommendations	167
<b>8</b>	<b>Auditory virtual environments</b>	<b>179</b>
	<i>Mark Williams</i>	
8.1	Introduction	179
8.2	Human auditory system	180
8.3	Virtual speech	182
8.4	Creating an auditory virtual environment	184
8.5	Auditory icons and virtual environments	185
<b>9</b>	<b>Designing in virtual reality: perception–action coupling and affordances</b>	<b>189</b>
	<i>Gerda J. F. Smets, Pieter Jan Stappers, Kees J. Overbeeke and Charles van der Mast</i>	
9.1	Introduction	189
9.2	Definitions	190
9.3	CAD in VR	193
9.4	Conclusions	203
<b>10</b>	<b>Social dimensions of virtual reality</b>	<b>209</b>
	<i>Deborah Foster and John F. Meech</i>	
10.1	Introduction	209
10.2	A technological disclaimer	210
10.3	Simulation and reality	211
10.4	Reality control and hyperrealism	211
10.5	How many realities are there?	212
10.6	Who controls the virtual reality?	214

10.7	Is virtual reality a 'neutral' technology?	214
10.8	How might technology (and virtual reality) influence society?	215
10.9	Images and ideology	216
10.10	The user's relationship with virtual reality technology	217
10.11	Who decides the content of virtual reality?	219
10.12	Ethics and application	219
10.13	Directions for future research	220
10.14	Concluding comments	221
<b>11</b>	<b>Summary and conclusions</b>	<b>225</b>
	<i>Karen Carr</i>	
	<b>First author index</b>	<b>229</b>
	<b>Subject index</b>	<b>235</b>
