
Contents

1	Motivation and Background	1
1.1	Mathematical Modeling and Applications	1
1.2	Applied Scientific Computing	3
1.3	Python Programming	5
1.4	Background	6
1.4.1	Series Expansions	6
1.5	Modeling Errors Versus Errors	10
1.6	Conclusions and Connections: Motivation and Background	11
2	Number Representations and Errors	15
2.1	Introduction	15
2.2	Floating-Point Numbers	16
2.2.1	Python Number Representation	19
2.3	Sources of Errors	21
2.3.1	Rounding Errors	21
2.3.2	Truncation Error	22
2.3.3	Ill-Conditioning	24
2.4	Measures of Error and Precision	24
2.5	Floating-Point Arithmetic	27
2.6	Conclusions and Connections: Number Representation and Errors	31
3	Numerical Calculus	35
3.1	Introduction	35
3.2	Numerical Differentiation	38
3.3	Numerical Integration	48
3.4	Composite Formulas	58
3.5	Practical Numerical Integration	68
3.6	Conclusions and Connections: Numerical Calculus	78
3.7	Python Functions for Numerical Calculus	79
4	Linear Equations	81
4.1	Introduction	81
4.2	Gauss Elimination	84

4.2.1	Pivoting in Gauss Elimination	88
4.2.2	Tridiagonal Systems	93
4.3	LU Factorization and Applications	98
4.4	Iterative Methods	106
4.5	Linear Least Squares Approximation	115
4.6	Eigenvalues	127
4.7	Conclusions and Connections: Linear Equations.	140
4.8	Python's Linear Algebra Functions.	141
4.8.1	Linear Equations	141
4.8.2	Linear Least Squares	142
4.8.3	Eigenvalues	143
4.8.4	Basic Linear Algebra Functions	144
5	Iterative Solution of Nonlinear Equations	145
5.1	Introduction	145
5.1.1	Summary of Convergence of Sequences	146
5.2	The Bisection Method	147
5.3	Fixed Point Iteration	153
5.4	Newton's Method	160
5.5	The Secant Method	167
5.6	Newton's Method in Higher Dimensions	173
5.6.1	Newton's Method: Two Equations in Two Unknowns	176
5.7	Conclusions and Connections: Iterative Solution of Nonlinear Equations	185
5.8	Python Functions for Equation Solving	187
6	Interpolation	189
6.1	Introduction	189
6.2	Lagrange Interpolation	192
6.3	Difference Representations	199
6.3.1	Divided Difference Interpolation	199
6.4	Splines	208
6.5	Conclusions and Connections: Interpolation	225
6.6	Python Interpolation Functions	226
7	Differential Equations	229
7.1	Introduction and Euler's Method	229
7.2	Runge-Kutta Methods	237
7.3	Multistep Methods	245
7.4	Systems of Differential Equations	252
7.5	Boundary Value Problems: Shooting Methods	258
7.6	Conclusions and Connections: Differential Equations	264
7.7	Python Functions for Ordinary Differential Equations	265
	Further Reading and Bibliography	267
