

Staphylococcus aureus influenced by heavy metal ions .....	5
Lead ions in the environment and water .....	13
Microfluidic chip with electrochemical detection: Design and manufacturing .....	16
CdTe quantum dots and their electrochemical properties .....	22
Quantum dots and their photoluminescent properties .....	29
Graphene-modified carbon nanoparticles for heavy metal binding .....	35
CdS, PbS and CuS quantum dots analyzed by flow injection with electrochemical detection .....	40
Removal of heavy metals from the environment by iron nanoparticles .....	44
Determination of heavy metals in patients with malignant tumors.....	49
Encapsulation of lead ions in nanotechnology structures .....	54
Mercury content in muscle of carp from non-contaminated ponds .....	62
Electrochemical detection of influenza virus using CdS quantum dots and 3D printed chip .....	65
Influenza oligonucleotide labeled with Cd QDs separated by magnetic particles .....	71
Influenza viral protein isolation and detection using quantum dots .....	77
Prion protein electrochemical study and its interaction with quantum dots .....	82
Microwave irradiation as a tool for quantum dots synthesis .....	88
CdTe quantum dots as a imaging agent applied into the muscle tissue.....	93
Immunoconjugation of quantum dots mediated by synthetic peptide .....	98
Visualization of proteins separated by sds-page electrophoresis utilizing protein-quantum dots interactions.....	104
CdTe quantum dots modified by Glutathione as a label for monitoring of DNA interactions with platinum-based cytostatics .....	107
CdTe quantum dots modified by biotin-glutathione conjugate as a coating for bioconjugation .....	113
Sanger sequencing as a tool for investigation of interactions between platinum-based cytostatic drugs and DNA .....	118
Streptavidin-modified quantum dots and their Interactions with biotinylated viral oligonucleotides investigated by capillary electrophoresis .....	123
Cisplatin, oxaliplatin, a carboplatin, a jejich rychlá detekce pomocí FIA-ED .....	126
Rapid, simultaneous determination of platinum group elements in high risk water by hydrodynamic voltammograms measured by flow injection analysis with electrochemical detection .....	131
Interaction of quantum dots with metallothionein analyzed by electrochemical methods.....	136
Rejstřík .....	141
