

CONTENTS

Acknowledgments	xiv
Preface	xv
Why a resource for users of social research methods in applied settings?	xvii
Ways of using the book	xviii
The main steps in carrying out a project	xx
The readership for this book	xxi
About the companion website	xxiv
PART I SETTING THE SCENE	1
Keeping a project diary	2
Chapter 1 What is real-world research?	5
What is real-world research?	5
Leaving the laboratory	7
Research evidence and real-world experience	8
Evaluation and change	8
Participation and collaboration	9
Ethical and political issues	10
Returning to the real world	10
Why do research in the real world?	12
Website examples	13
Beginning the journey	14
Chapter 2 Approaches to social research	18
What is science?	20
Postmodernism and extreme relativist approaches	22
The two traditions: Quantitative and qualitative social research	23
The quantitative paradigm	26

The qualitative paradigm	29
Paradigms and research questions	31
A pragmatic approach	33
Mixed research designs	35
Realism and real-world research	35
Working in open systems	42
The purposes of research	44
Practical value of the theoretical material covered in the chapter	46
PART II PLANNING: SELECTING A STRATEGY	55
Chapter 3 Developing your ideas	57
Design matters	57
Deciding on the focus of a project	60
Searching and reviewing the literature	65
Research questions	73
Developing your research question(s)	78
The place of theory	81
Chapter 4 General design issues	92
A framework for research design	93
Getting a feel for design issues	96
Choosing a research design strategy	97
Establishing trustworthiness	103
Chapter 5 Desk-based research	106
Types of desk-based research	107
Doing a literature review as a desk-based project	116
The main steps to take in carrying out a literature review as a desk-based project	117

Doing a systematic review	121
Doing a realist review	126
In summary	129
Chapter 6 Fixed designs	135
General features of fixed designs	137
Establishing trustworthiness in fixed-design research	139
True experiments	158
Quasi-experiments	163
Single-case experiments	172
Non-experimental fixed designs	178
Sample size in fixed designs	183
Chapter 7 Flexible designs	190
General features of flexible designs	191
Research traditions in qualitative research	194
Case studies	195
Ethnographic studies	201
Grounded theory	206
Other approaches	210
Sampling in flexible designs	210
Establishing trustworthiness in flexible-design research	213
Chapter 8 Mixed designs	223
The quantitative–qualitative incompatibility thesis	224
The mixed-methods movement	225
Types of mixed designs	226
Designing and carrying out mixed-design research	229
Pragmatism, realism or ‘anything goes’?	232
Dealing with discrepancies in findings	233
Concluding comments	235

Chapter 9 Designs for particular purposes: Evaluation, action, participation and change	239
Evaluation	240
Action research	255
Intervention and change	259
Researchers and practitioners	260
Chapter 10 Ethical and political considerations	268
Ethical codes and guidelines	271
Ethical issues	273
Researcher safety and risk	285
Working with vulnerable groups	287
General ethical responsibilities	295
Ethical review boards and committees	298
Politics and real-world research	302
Sexism, racism, and social research	307
PART III TACTICS: THE METHODS OF DATA COLLECTION	319
Selecting the method(s)	320
Chapter 11 Surveys and questionnaires	323
The ubiquity of surveys	324
Designing surveys	325
Carrying out a sample survey	337
Designing and using a questionnaire	339
Diaries	355
Sampling in surveys and elsewhere	358
Probability samples	359
Non-probability samples	362
Chapter 12 Interviews and focus groups	371
Types and styles of interviews	372
General advice for interviewers	374

Content of the interview	376
Carrying out different types of interviews	378
Focus groups	387
Dealing with interview data	394
Skills in interviewing	395
Chapter 13 Tests and scales	400
Measurement scales	401
Other scaling techniques	409
Using the existing tests and scales	410
Developing your own test	411
Chapter 14 Observational methods	415
The advantages of observation	416
The disadvantages of observation	417
Observation in real-world research	417
Approaches to observation	418
Participant observation	420
Getting started as a participant observer	423
Structured observation	429
Deciding on a coding scheme	432
The use of existing coding schemes	432
Developing your own scheme	434
Reliability and structured observation	435
Chapter 15 Additional methods of data collection	443
Unobtrusive measures	444
Content analysis of documents	446
Secondary data analysis	456
Introduction to a range of more specialist techniques	459
Internet-based research	460
Feminist research methods	465
Using multiple methods	466

PART IV CARRYING OUT THE PROJECT	471
Arranging the practicalities	471
PART V DEALING WITH THE DATA	481
Collecting the data	481
Analysing and interpreting data	483
Realist analysis and interpretation	484
Preparing for analysis	485
Analysis or interpretation?	486
Quantitative and qualitative data and their integration into mixed designs	487
Chapter 16 Writing a project proposal	489
How to recognize a good proposal	490
The content of a research proposal	491
The problem of pre-specifying flexible design studies	496
Shortcomings of unsuccessful proposals	497
Sources of funding	498
Chapter 17 The analysis and interpretation of quantitative data	502
Some assumptions	503
Organization of the chapter	504
Creating a dataset	504
Starting data analysis	507
Exploring the dataset	510
Summary or descriptive statistics	512
Exploring relationships between two variables	520
Exploring relationships among three or more variables	527
Analysing differences	533
Quantitative analysis and different fixed-design research strategies	548
The 'new statistics'	554

Chapter 18 The analysis and interpretation of qualitative data	564
Two assumptions	565
Types of qualitative analysis	565
Using the computer for qualitative data analysis	569
Dealing with the quantity of qualitative data	572
Thematic coding analysis	573
Data analysis in grounded theory studies	587
Alternative approaches to qualitative analysis	591
Integrating qualitative and quantitative data in mixed designs	591
Chapter 19 Reporting, disseminating, and moving forward	598
Ethics and reporting	600
Reporting on fixed-design research	602
The scientific journal format	603
Reporting on flexible-design studies	604
Reporting on mixed-design studies	607
Reporting on case studies	607
Reporting on literature reviews	608
Writing for non-academic audiences: The technical report	608
Alternative forms of presentation	612
Writing skills	614
Where next?	618
Appendix A: Using specialist software for quantitative analysis	623
Using Excel with Analyse-it	623
SOFA statistics	623
Using SPSS	625
Acquiring skills in using SPSS	625
Other statistical packages	625
Appendix B: Using specialist software for qualitative analysis	627
Name index	628
Subject index	648
