

## CONTENTS:

- Josef Elster: Welcome address \_\_\_\_ 5
- Balarinová, K.: Cultivation of Antarctic alga *trebouxia* sp. in a bioreactor: chlorophyll fluorescence-based study of temperature-dependent growth \_\_\_\_ 6
- Bechberger, O.: The role of mosses for ecosystem development in a proglacial area of se-Iceland 8
- Berg, L.: CH<sub>4</sub> and CO<sub>2</sub> flux measurements at four contrasting vegetation types at Disko, west Greenland \_\_\_\_ 10
- Blahůt, J.: New techniques for analysing the evolution and dynamics of landforms on Svalbard \_\_\_\_ 12
- Buchwal, A.: Dendrochronological analyses of high and low Arctic tundra shrubs (Spitsbergen, western Greenland) \_\_\_\_ 13
- Čepová, D.: Lakes of the Billefjorden region, central Svalbard \_\_\_\_ 15
- Černý, J.: Search for arboviruses on Svalbard \_\_\_\_ 17
- Chládková, Z.: Preliminary analysis of surface wind conditions around the Petuniabukta (Billefjorden, Svalbard) \_\_\_\_ 18
- Devetter, M.: Effects of life form and substrate differences on vertical distribution of soil hydrobionts (rotifera, tardigrada, nematoda) in soil crusts of central Svalbard (Petuniabukta bay, Billefjorden) \_\_\_\_ 20
- Ditrich, O.: Trematodes (digenea) from molluscs and fish in Petuniabukta (Svalbard) \_\_\_\_ 21
- Doleželová, M.: Evaluation of weather conditions and cloud types in Petuniabukta (Billefjorden, Spitsbergen) in July 2012 \_\_\_\_ 22
- Elster, J.: Impact of warming on nostoc colonies (cyanobacteria) in a wet hummock meadow, Svalbard \_\_\_\_ 24
- Ertl, S.: Characterization of small-scale vegetation patterns by topography-soil-vegetation-transects in high-Arctic Greenland \_\_\_\_ 25
- Golovatin, M.: Nenets in tundra ecosystems of the Yamal: effect of reindeer overgrazing \_\_\_\_ 27
- Golovatin, M.: Long-term changes of an avifauna in the North of Western Siberia \_\_\_\_ 29
- Hanáček, M.: Modification of sedimentary rock clasts in high Arctic polythermal valley glacier environment: case study from the Bertilbreen, central Svalbard \_\_\_\_ 31
- Helgadóttir, A.: The role of mosses in icelandic subarctic tundra \_\_\_\_ 34
- Hodson, A.: The biogeochemistry of Arctic glacial ecosystems: examples from Svalbard \_\_\_\_ 35
- Holmén, K.: Climate change research in Ny-Alesund \_\_\_\_ 36
- Huiskes, A.: Passive warming studies in Arctic and Antarctic: differences and similarities in the effects of open top chambers on the microclimate \_\_\_\_ 37
- Huiskes, A.: Aliens in Antarctica, quantifying seeds inadvertently carried into the Antarctic \_\_\_\_ 39
- Inoue, T.: Effects of life form and substrate differences on water availability for Arctic lichens during snow-free summers in the high Arctic glacier foreland \_\_\_\_ 41
- Ivanov, B.: Svalbard's climate system (past, present and future) \_\_\_\_ 42
- Janatková, K.: Phototrophs in subnival soil \_\_\_\_ 43
- Jupa, R.: Dehydration-dependent inhibition of photosynthetic processes in two lichen species from Svalbard: A fluorometric study \_\_\_\_ 45
- Juras, R.: Investigation of runoff sources due to changes in water isotopic composition – Elsa river, central Svalbard \_\_\_\_ 47
- Kadlčková, E.: The effect of topography and landcover on surface temperatures in Svalbard \_\_\_\_ 48
- Kapler, P.: The Antarctic part of the czech polar project introduction: Johann Gregor Mendel Czech Antarctic station, James Ross Island, Antarctica \_\_\_\_ 50
- Kašparová, E.: Is the life history the main constraint shaping the population structure of species being repetitively affected by climate change? \_\_\_\_ 52
- Keslinka-Nawrot, L.: Patterns of little auks colony distribution on the west coast of Spitsbergen \_\_\_\_ 54
- Kodádková, A.: Fish parasites beyond the Arctic circle: myxozoa \_\_\_\_ 55

- Komárek, J.: The geographic distribution of polar cyanobacteria and their relation to microflora of high mountain habitats \_\_\_ 57
- Kopalová, K.: Diversity and biogeography of freshwater diatoms from two contrasting Antarctic localities \_\_\_ 59
- Kopalová, K.: Four new small-celled naviculoid taxa from the maritime Antarctic region \_\_\_ 60
- Kotas, P.: The changes in geochemical properties of soils and differences in the soil microbial community structure along altitudinal gradients in Arctic mountains surrounding Petuniabukta, Svalbard \_\_\_ 61
- Kryukova, I.: Ecological and geographical characteristics of phytoplankton in the eastern Laptev sea (autumnal season 2008) \_\_\_ 62
- Kudoh, S.: Massive, simultaneous floatation of phytobenthic microbial assemblages under the lower ice surface of a frozen Antarctic lake \_\_\_ 64
- Láska, K.: Measurements of solar UV radiation at the Mendel Station, James Ross Island, Antarctica \_\_\_ 65
- Lesniak, V.: Diversity and ecophysiological performance of cyanobacteria in wet meadow, Petunia bay, central Svalbard \_\_\_ 67
- Lettner, C.: CSI: Svalbard\* – exploring relations between ploidy, growth form and habitat in *Saxifraga oppositifolia* (\*Current *Saxifraga* Investigations in high-Arctic Svalbard) \_\_\_ 68
- Liebig, E.: Role of bryophytes in structuring plant community diversity in Iceland \_\_\_ 71
- Lisowska, M.: Vegetation development in glacier forelands of Spitsbergen \_\_\_ 72
- Małeck, J.: Recent progress in glaciological investigations in Petuniabukta area, Svalbard \_\_\_ 74
- Malygina, N.: Wild reindeer (*rangifer tarandus* L.) resources use in an aspect of the principle of ecological justice \_\_\_ 76
- Markovskaya, E.: Eco-physiological characteristics of the coastal plants in the conditions of the tidal zone on the coasts of Svalbard \_\_\_ 78
- Mašová, Š.: *Corynosoma acanthocephalans* from paratenic hosts in the Weddell sea, James Ross Island, Antarctica \_\_\_ 80
- Mikova, J.: Strontium isotopic signatures of the Torrent Valley streams and Phormidium lake on James Ross Island, Antarctica \_\_\_ 83
- Mörsdorf, M.: How does disturbance by sheep grazing affect plant diversity in subArctic Iceland? – an approach on different spatial scales \_\_\_ 86
- Morozova, L.: Shoreline vegetation of the coast of Baydaratskaya Bay (Yamal -Nenets Autonomous District, Russia) in the southern tundra subzone \_\_\_ 88
- Morozova, L.: Recovery of lichen tundra vegetation after overgrazing in the North of Western Siberia \_\_\_ 90
- Myšková, E.: Parasites of terrestrial vertebrates in Svalbard \_\_\_ 92
- Nakatsubo, T.: Sensitivity of ecosystem carbon cycle to climate change in a high Arctic glacier foreland \_\_\_ 93
- Nawrot, A.: The present and the past rate of the mechanical denudation in the small glaciated Arie catchment \_\_\_ 95
- Owczarek, P.: Which environmental factors control dwarf shrubs growth in the high Arctic area? \_\_\_ 98
- Pažoutová, M.: Diversity and distribution of prasiola (*prasiolales*, *chlorophyta*) in Spitsbergen (Svalbard islands) \_\_\_ 100
- Pichrtová, M.: Desiccation tolerance and osmotic potential of *Zygnema* on Svalbard \_\_\_ 102
- Pushkareva, e.: Ecological typification of soil crust ecosystem in Petuniabukta, Svalbard \_\_\_ 103
- Raabová, L.: Cyanobacteria and algae colonizing mammalian bones remains in Svalbard, Arctic \_\_\_ 104
- Rachlewicz, G.: High Arctic landsystem changes in various time scales – examples from Billefjorden, Svalbard \_\_\_ 106
- Rymer, K.: Permafrost active layer temperature variations in Ebba valley (central Spitsbergen) in the years 2009–2012 \_\_\_ 108
- Šabacká, M.: Productivity and biogeochemistry of terrestrial ice-bound ecosystems of maritime Antarctic \_\_\_ 109
- Sattler, B.: Microbial Life in Alpine and Polar Ice Caves \_\_\_ 110

- Sattler, B.: L.I.F.E. (Laser Induced Fluorescence Emission) as Non-Invasive Tool to Assess Photosynthetic Pigments in Ice Ecosystems \_\_\_\_ 111
- Sergienko, L.: Salt marsh flora and vegetation of the Russian Arctic coasts \_\_\_\_ 112
- Schober, M.: Functional and Structural Communities in the Snow Pack \_\_\_\_ 114
- Šichová, J.: A closer view on molecular diversity in amphipods of Svalbard \_\_\_\_ 115
- Singh, S.H.: Chemical constituents and antioxidant potential of Arctic vascular plants, lichens and a mushroom from Svalbard \_\_\_\_ 116
- Singh, P.: Evaluation of genetic diversity, phylogeny and evolution of Arctic cyanobacteria using structural and functional gene as a marker \_\_\_\_ 118
- Skácelová, O.: Czech polar research in museum exhibitions and collections \_\_\_\_ 119
- Słaby, A.: Epibryophytic and epigeic lichens as components of the Arctic tundra in the Bellsund region (SW Spitsbergen, Svalbard) – pilot \_\_\_\_ 120
- Smykla, J.: Diversity and distribution patterns of soil microfauna in Edmonson Point (Northern Victoria Land, Continental Antarctica) \_\_\_\_ 121
- Sonina, A.: Epilithic lichens and their adaptations in the conditions of the coasts of White and Barentz Seas (Russian Arctic) \_\_\_\_ 124
- Stacke, V.: Recent landscape changes in terminoglacial area of the Nordenskiöldbreen, central Svalbard \_\_\_\_ 126
- Stibal, M.: The role of subglacial microbes in carbon cycling and methane release in the past and present \_\_\_\_ 127
- Strunecký, O.: Biogeography of *Phormidium autumnale* (Oscillatoriales, Cyanobacteria) in western and central parts of Spitsbergen \_\_\_\_ 128
- Svyashchennikov, P.: The impact of the coal combustion on the atmosphere and the snow cover characteristics at Barentsburg settlement, Spitsbergen archipelago \_\_\_\_ 129
- Svoboda, J.: Evolution of cold hardiness in plants and their colonization of the post-glacial Arctic realm \_\_\_\_ 131
- Tanabe, Y.: Nutrient in sediments as driving force behind Antarctic lake ecosystems \_\_\_\_ 132
- Tashyreva, D.: In situ monitoring of seasonal changes in development of *Phormidium* populations (Svalbard, West Spitsbergen) \_\_\_\_ 134
- Těšitel, J.: Brave pioneers: growth and flowering of plants colonizing glacier forelands in Petuniabukta, Svalbard \_\_\_\_ 135
- Tyml, T.: Free living amoebae of Svalbard \_\_\_\_ 137
- Uchida, M.: Succession and carbon cycle in a high Arctic tundra ecosystem \_\_\_\_ 138
- Verleyen, E.: Diatom distributions in space and time – a case study from the polar regions \_\_\_\_ 140
- Veselý, L.: Cyanobacteria/ microalgae and invertebrate diversity and abundance on artificial substratum (fiberglass nets) installed in freshwater lotic habitats in central Svalbard \_\_\_\_ 142
- Vosolobě, S.: Life of anthers and pollination in Arctic \_\_\_\_ 143
- Węgrzyn, M.: Contemporary changes in vegetation of tundra in Spitsbergen \_\_\_\_ 144
- Witoszová, D.: Influence of the synoptic situations on spatial distribution of air temperature in central part of Svalbard in the period of 2008–2010 \_\_\_\_ 146
- Zaika, Y.: Association of Polar Early Career Scientists (APECS): shaping the future of polar research \_\_\_\_ 148
- Žárský, J.: Snapshot of spatio-temporal constraints in microbial activity in melting high Arctic snow \_\_\_\_ 150
- Ziaja, W.: Landscape ecology of Sorkapp land, Svalbard \_\_\_\_ 153
- Participants list \_\_\_\_ 153
