Preface	xiii
Author Biographies	xv
1 Introduction to Python	1
1.1 What is the Python Programming Language	1
1.2 The Python Programming Language	1
1.2.1 Downloading Python	2
1.2.2 The Python's Integrated Development and Learning Environment	2
1.3 Book Organization	3
1.4 Algorithms	3
1.5 Variables	4
1.5.1 Types of Variables	5
1.5.2 Variable Assignment	6
1.5.3 Basic Operations	7
1.6 Input and Output in Python	7
1.6.1 Escape Sequences	9
1.7 Programs in Python	10
1.8 Comments in a Program	11
1.8.1 Operations with Integer and Floating-point Numbers	13
1.9 Functions in Python	13
1.10 Modules and Libraries	14
1.11 Operators	16
1.11.1 Arithmetic Operators	16
1.11.2 Relational Operators	16
1.11.3 Logical Operators	17
1.11.4 Assignment Operators	18
1.12 Alphanumeric Variables	19
1.13 Lists	20
1.14 Dictionaries	21
1.15 Tuples	22
1.16 Examples	22
1.17 Python Instructions for Chapter 1	26
1.18 Conclusions	26
1.19 Exercises	27

2 Conditionals and Loops

2.1	Introduction	
2.2	Conditionals	
2.3	The Conditional <code>if-else</code>	
2.4	Nested Conditionals	
2.5	Exceptions and Errors	
2.6	Loops	
2.7	The <code>while</code> Loop	
2.8	The <code>for</code> Loop	
2.8.1	The Function <code>range</code>	
2.9	Nested Loops	
2.10	The Instruction <code>break</code>	
2.11	The Instruction <code>continue</code>	
2.12	Additional Examples	
2.13	Python Instructions for Chapter 2	
2.14	Conclusions	
2.15	Exercises	
2.16	Bibliography	

3 Data Structures: Strings, Lists, Tuples, and Dictionaries

3.1	Introduction	
3.2	Strings	
3.2.1	Concatenation or Sum and Multiplication of Strings	
3.3	Functions on Strings	
3.3.1	Length of a String	
3.3.2	Split of a String	
3.4	Immutability of Strings	
3.4.1	Functions on Strings	
3.4.2	Conditions and Loops	
3.5	Lists	
3.5.1	Operations on Lists	
3.5.2	Mutability	
3.5.3	Conversion from a List of Strings to a Single String	
3.6	Tuples	
3.6.1	Tuple Assignment	
3.6.2	Functions on Tuples	
3.7	Dictionaries	
3.7.1	Functions for Dictionaries	
3.8	Sets	
3.8.1	Sets by Comprehension	
3.8.2	Frozen Sets	
3.9	Python Instructions for Chapter 3	
3.10	Conclusions	
3.11	Exercises	

4	Arrays	88
4.1	Introduction	88
4.2	Introduction to Arrays	88
4.3	Vectors	89
4.3.1	Access to Vectors	93
4.3.2	Vectors by Comprehension	93
4.3.3	The Instruction <code>append</code>	94
4.4	Examples with Vectors in Python	94
4.4.1	Vector Sorting	102
4.5	Matrices	104
4.6	Arrays in Python	105
4.6.1	Array Generation by Indexing	106
4.6.2	Array Generation by Comprehension	108
4.7	Matrix Operations using Linear Algebra with <code>numpy</code>	110
4.7.1	Sum, Difference, and Multiplication of Matrices	110
4.7.2	Sum of Matrices	110
4.7.3	Product of a Matrix by a Matrix	111
4.7.4	Product of Matrices in Python	113
4.7.4.1	Matrix Multiplication Using <code>np.dot</code>	113
4.7.4.2	Matrix Multiplication Using <code>np.matrix</code>	113
4.8	Special Matrices	116
4.8.1	The Identity Matrix	116
4.8.2	The Transpose Matrix	116
4.8.3	Transpose by Comprehension	118
4.9	Examples	119
4.10	Arrays in Pandas	125
4.10.1	Data Frames	129
4.10.2	Generation of Data Frames	132
4.10.3	Functions for Series and Data Frames	133
4.11	Python Instructions for Chapter 4	136
4.12	Conclusions	137
4.13	Selected Bibliography	137
4.14	Exercises	137
5	Functions	142
5.1	Introduction	142
5.2	Subprograms	142
5.3	Functions in Python	143
5.4	Recursion	148
5.5	Anonymous Functions or <code>lambda</code> Functions	149
5.6	Pass by Reference	150
5.7	Local and Global Variables	151
5.8	Keyword and Default Arguments	152
5.9	Variable-length Arguments	154
5.10	Additional Examples	155

5.11	Python Instructions in Chapter 5	162	8.5.2	Stem Plots	233
5.12	Conclusions	162	8.5.3	Scatter Plots	235
5.13	Exercises	162	8.6	Multiple Figures	237
6	Object-Oriented Programming	165	8.6.1	Plots in Separate Figures	237
6.1	Introduction	165	8.6.2	Subplots	239
6.2	The Object-Oriented Programming Paradigm	165	8.7	Three-Dimensional Plots	242
6.3	Classes in Python	167	8.8	Python Instructions for Chapter 8	254
6.3.1	Creation and Use of a Class	168	8.9	Conclusions	255
6.3.2	Declaration and Use of Setters and Getters	169	8.10	Exercises	255
6.3.3	Static Methods	171	8.11	Selected Bibliography	257
6.3.4	Encapsulation	174	9	Optimization	258
6.3.5	Inheritance	176	9.1	Introduction	258
6.3.6	Overloading	178	9.2	Optimization Concepts	258
6.4	Example	182	9.2.1	Parameters, Variables, and Functions	259
6.5	Python Instructions for Chapter 6	185	9.3	General Format of the Optimization Process	260
6.6	Conclusions	185	9.4	Optimization with Python	261
6.7	Exercises	185	9.5	The <code>minimize</code> Function	262
6.8	Selected Bibliography	186	9.6	Linear Programming	271
7	Reading and Writing to Files	187	9.7	Quadratic Programming	280
7.1	Introduction	187	9.8	Python Instructions for Chapter 9	283
7.2	Writing Data to a File	187	9.9	Conclusions	284
7.2.1	Writing Alphanumeric Data to a File	188	9.10	Selected Bibliography	284
7.2.2	The Instruction <code>with</code>	190	10	Image Processing with OpenCV	285
7.3	Writing Numerical Data to a File	190	10.1	Introduction	285
7.4	Data Reading from a File	194	10.2	Reading and Writing Images and Videos	287
7.4.1	Reading Data from a File	194	10.2.1	Image Representation in Python	290
7.4.2	The Instruction <code>readline</code>	197	10.3	Video Capture and Display	293
7.4.3	The Instruction <code>readlines</code>	198	10.3.1	Saving a Video File	294
7.5	Reading and Writing Data from and To Excel	199	10.4	Binary Images	295
7.6	Reading and Writing Binary Files	204	10.5	Histogram	300
7.7	Python Instructions in Chapter 7	209	10.5.1	Histogram Equalization	301
7.8	Conclusions	209	10.6	Draw Geometric Shapes and Text on an Image	303
7.9	Exercises	210	10.7	Contour Detection	305
8	Plotting in Python	211	10.8	Frequency Domain Processing	309
8.1	Introduction	211	10.9	Noise Addition to Images	317
8.2	Plots in Two Dimensions	211	10.9.1	Denoising	318
8.2.1	Color and Marker Options	218	10.10	Morphological Image Processing	321
8.3	The Package <code>seaborn</code>	221	10.10.1	Erosion and Dilation	321
8.4	Other Two-dimensional Plots	223	10.10.2	Dilation and Erosion	322
8.4.1	Polar Plots	224	10.11	Python Instructions in Chapter 10	327
8.5	Pie Charts	227	10.12	Conclusions	328
8.5.1	Histogram Plots	229	10.13	Selected Bibliography	328

11 Machine Learning

11.1	Types of Machine Learning Systems	
11.1.1	Supervised Machine Learning	
11.1.2	Multiple Features	
11.1.3	Feature Scaling	
11.2	Gradient Descent Algorithm	
11.3	Multivariate Regression	
11.3.1	Feature Scaling for the Multivariate Case	
11.4	The Normal Equation	
11.5	The Package <code>scikit-learn</code>	
11.6	Polynomial Regression	
11.7	Classification with Logistic Regression	
11.7.1	Logistic regression	
11.8	Unsupervised Learning	
11.9	Clustering Using k-means	
11.9.1	Cost Function	
11.10	Python Instructions in Chapter 11	
11.11	Conclusions	

12 Neural Networks

12.1	Introduction	
12.2	A Model for a Neuron	
12.3	Activation Functions	
12.4	Cost Function	
12.5	Tensor Flow	
12.6	Convolutional Neural Networks	
12.6.1	Padding	
12.6.2	Strided convolution	
12.6.3	Pooling	
12.7	A Layer of a Convolutional Filter	
12.8	Python Instructions in Chapter 12	
12.9	Conclusions	

A Installation of Libraries and Packages and Running the Scripts

A.1	Introduction	
A.2	Running a Script using Google Colab	
A.3	Installation of Python	
A.4	Modules and Libraries Installation with pip	
A.5	Installation of Modules or Libraries	
A.6	Installation of OpenCV	
A.6.1	Installation in Windows for the IDLE	
A.6.2	Installation in the Mac for the IDLE
