

CONTENT

1. INTRODUCTION	6
1.1. Taxonomy and biological characteristic	6
1.2. Rearing methods	10
2. AIM	20
3. FACILITIES FOR AUTHENTICATION OF TECHNOLOGY	20
4. DESCRIPTION OF TECHNOLOGY	22
4.1. Description of technology	22
4.1.1. Technological procedure	22
4.1.2. Results	23
4.2. Hormonally induced artificial reproduction	24
4.2.1. Technological procedure	24
4.2.2. Results	32
4.3. Temperature effect on storage of artificially spawned eggs before fertilization	34
4.3.1. Technological procedure	34
4.3.2. Results	36
4.4. Effect of length of water contamination of eggs on rate of micropyle closure	38
4.4.1. Technological procedure	38
4.4.2. Results	38
4.5. Effect of temperature and egg incubation on hatching and early development	40
4.5.1. Technological procedure	40
4.5.2. Results	40
4.6. Testing of feed for breeding fish in market size	44
4.6.1. Technological procedure	44
4.6.2. Results	51
4.7. Fillet yield and product quality	52
4.7.1. Technological procedure	52
4.7.2. Results	54
5. ECONOMICAL BENEFIT OF TECHNOLOGY FOR BUSINESS SUBJECT	57
6. APPLICATION OF TECHNOLOGY IN PRODUCTION OF BUSINESS SUBJECT	57
7. REFERENCES	58
