

Contents

1. SPECIFICATIONS AND DEFINITION OF THE PROBLEM, GOAL OF THE WORK.....	4
2. CHARACTERIZATION OF 3D ELECTRONIC SYSTEMS AND THEIR RELIABILITY	4
3. TEMPERATURE AND FAILURE MECHANISM AND FATIGUE LIFE PREDICTION MODELS FOR SOLDER JOINT	7
3.1 Coffin – Manson’s Law	8
3.2 Engelmaier’s Model.....	9
4. SOLDER JOINT RELIABILITY ANALYSIS WITH 3D FEA MODELS	10
5. DESIGN OF 3D SYSTEM WITH MINIBOARDS.....	11
5.1 The Terminals on the Edge SMVPH.....	11
5.2 Connection with FR4-FR4 Stacked Layers and Connection Between FR4 and Ceramic Stacked Layer.....	12
6. FEM SIMULATIONS AND CALCULATION OF STRESS AND FATIGUE LIFE PREDICTION.....	13
6.1 Results FEM Simulation of Mechanical Properties	15
6.2 Simulation of Plastic Work.....	17
6.3 Calculating of Characteristic Fatigue of the FR4-FR4 frame - Ceramic Layer Structure.....	18
7. MEASURING OF THE RELIABILITY OF THE SYSTEM	20
7.1 Mechanic Construction of The Measuring System.....	21
8. THE RESULTS OF THE MEASURING AND VERIFICATION OF RESULTS	22
9. CONTRIBUTION OF THE WORK, PRACTICAL APPLICATIONS, CONCLUSIONS	24
9.1 Scientific Contribution of the Work.....	24
9.2 Practical Applications.....	25
9.3 Conclusions	25
10. BIBLIOGRAPHY	27
11. SELECTED PUBLICATIONS OF THE AUTHOR	30
12. BIOGRAPHY	31
13. ABSTRAKT	32
