

## Content

|   |    |
|---|----|
| 1. Introduction, motivation                                   | 6  |
| 2. Concepts   | 7  |
| 2.1. Reliability  | 7  |
| 2.2. Homogenization   | 8  |
| 2.3. Information Power  | 11 |
| 3. Basic Concepts of IP Reliability                           | 16 |
| 3.1 Interface as a fictitious system element                  | 16 |
| 3.2. System Uncertainty                                       | 17 |
| 3.3. Geometric re-interpretation of the model                 | 21 |
| 3.4. Reliability in Information Systems                       | 24 |
| 3.5. Reliability of Complex Heterogeneous Systems             | 25 |
| 4. Reliability of IP – system abstraction                     | 25 |
| 4.1. Identity   | 26 |
| 4.2. Architecture   | 27 |
| 4.3. Interoperability   | 27 |
| 5. Construction of Systems .Approach to The Reliability of IP | 28 |
| 6. Discussion   | 30 |
| 7. References   | 30 |
| 8. CV of the Author   | 31 |
