Introduction 7

Chapter I. ON NONLOCAL EXTENDABILITY AND BOUNDEDNESS OF SOLUTIONS

§ 1. Sufficient conditions for solutions to be nonlocally extendable and proper 11

§ 2. Sufficient conditions for the boundedness of at least one component of the solution 15

§ 3. Sufficient conditions for at least one component of the solution not to be tending to zero 18

Chapter II. OSCILLATORY PROPERTIES OF PROPER SOLUTIONS

§ 4. Theorems on the existence of weakly nonoscillatory solutions 21

§ 5. Systems with property O_k 27

5.1. Sufficient conditions for systems to have property O_k 27
5.2. Necessary and sufficient conditions for systems to have property O_k 33

§ 6. Conditions for the oscillation 36

6.1. Sufficient conditions for the oscillation 36
6.2. Necessary and sufficient conditions for the oscillation 42

§ 7. Conditions for the nonoscillation of all proper solutions 47

§ 8. Estimates for the distance between zeros 52

Chapter III. OSCILLATORY PROPERTIES OF SOLUTIONS OF THE EMDEN–FOWLER TYPE SYSTEMS

§ 9. On proper and bounded solutions 63

§ 10. Comparison theorems and some applications 66

10.1. Comparison theorems 66
10.2. Some applications of the comparison theorem 75

§ 11. Necessary and sufficient conditions for the oscillation of all proper solutions 84

11.1. Conditions for the oscillation in the case, where $\lambda_1\lambda_2 = 1$ 85
11.2. Conditions for the oscillation in the case, where $\lambda_1\lambda_2 \neq 1$ 87

§ 12. Sufficient conditions for the oscillation of all proper solutions 89

12.1. Sufficient conditions for the oscillation in the case, where $\lambda_1\lambda_2 = 1$ 89
12.2. Sufficient conditions for the oscillation in the case, where $\lambda_1\lambda_2 \neq 1$ 100

§ 13. Sufficient conditions for the existence of at least one oscillatory solution 113

§ 14. Sufficient conditions for the nonoscillation of all proper solutions 119

14.1. Analogues of the F. V. Atkinson and I. W. Heidel theorems .. 119
14.2. Analogue of the I. T. Kiguradze theorem 122

Chapter IV. ASYMPTOTIC BEHAVIOUR OF PROPER SOLUTIONS OF THE EMDEN–FOWLER TYPE SYSTEMS

§ 15. Principal and nonprincipal solutions of systems with $\lambda_1\lambda_2 = 1$ 127

§ 16. Existence theorems for proper and singular solutions 143

§ 17. Asymptotics of proper solutions 153

17.1. Asymptotic representations for nonoscillatory solutions 153
17.2. Asymptotic representations for oscillatory solutions 161

Conclusion 170
