Preface	7
1. Introduction to ultrasonography – Ultrasound diagnostics of peripheral nerves and blood vessels	9
1.1 History of ultrasonography	10
1.2 Physical principles of diagnostic ultrasonography	10
1.3 Ultrasound machine	11
1.4 The acquired ultrasound image	12
1.5 Fundamentals of the ultrasound imaging	13
2. Upper limb	17
2.1 Anatomical characteristics of the ultrasonographically examined areas of the upper limb	18
2.1.1 Area of the brachial plexus location	18
2.1.2 Scapular region	20
2.1.3 Deltoid region	21
2.1.4 Infraclavicular region	21
2.1.5 Axillary region (axillary fossa, axilla)	23
2.1.6 Brachial region	25
2.1.7 Cubital region (cubital fossa)	27
2.1.8 Antebrachial region	30
2.1.9 Carpal region	32
2.2 Ultrasound of clinically significant peripheral nerves of the upper limb	34
2.2.1 Ultrasound scanning technique	34
2.2.2 Brachial plexus in infraclavicular region	34
2.2.3 Suprascapular nerve	36
2.2.4 Axillary nerve	37
2.2.5 Radial nerve	38
2.2.6 Median nerve	40
2.2.7 Ulnar nerve	43
2.3 Ultrasound of clinically significant peripheral vessels of the upper limb	47
2.3.1 Ultrasound scanning technique	47
2.3.2 Axillary artery	47
2.3.3 Brachial artery	49

2.3.4	Radial artery	51
2.3.5	Ulnar artery	53
2.3.6	Cephalic vein	55
2.3.7	Basilic vein	58
2.3.8	Median cubital vein	60
2.3.9	Axillary vein	61
2.3.10	Other deep veins of the upper limb	62
3.	Lower limb	63
3.1	Anatomical characteristics of ultrasonographically examined areas of the lower limb	64
3.1.1	Area of the lumbar plexus location	64
3.1.2	Area of the sacral plexus location	65
3.1.3	Femoral region	67
3.1.4	Region of the knee	72
3.1.5	Crural region (region of the leg)	74
3.1.6	Medial and lateral malleolar and retromalleolar regions (ankle regions), dorsum of the foot	77
3.2	Ultrasound of clinically significant peripheral nerves of the lower limb	80
3.2.1	Ultrasound scanning technique	80
3.2.2	Lateral femoral cutaneous nerve (lateral cutaneous nerve of thigh)	80
3.2.3	Femoral nerve	82
3.2.4	Saphenous nerve	82
3.2.5	Obturator nerve	84
3.2.6	Sciatic nerve	84
3.2.7	Sensory nerves innervating the knee joint	87
3.2.8	Tibial nerve	89
3.2.9	Deep fibular nerve	90
3.2.10	Superficial fibular nerve	91
3.2.11	Sural nerve	92
3.3	Ultrasound of clinically significant peripheral vessels of the lower limb	102
3.3.1	Ultrasound scanning technique	102
3.3.2	Femoral artery	102
3.3.3	Deep femoral artery	104
3.3.4	Popliteal artery	105

3.3.5	Posterior tibial artery	106
3.3.6	Fibular (peroneal) artery	108
3.3.7	Anterior tibial artery	108
3.3.8	Dorsalis pedis artery	109
3.3.9	Small saphenous vein	110
3.3.10	Great saphenous vein	112
3.3.11	Deep veins of the lower limb	114
4.	Neck	127
4.1	Anatomical characteristics of ultrasonographically examined areas of the neck	128
4.1.1	Summary of the neck anatomy	128
4.1.2	Area of the common carotid artery and internal jugular vein location	128
4.1.3	Area of the subclavian artery and subclavian vein location	129
4.2	Ultrasound of clinically significant peripheral nerves of the neck	130
4.2.1	Ultrasound scanning technique	130
4.2.2	Brachial plexus in interscalene space (scalene fissure)	130
4.2.3	Brachial plexus located supraclavicularly	132
4.2.4	Brachial plexus more cranially to the supraclavicular region and more caudally to the scalene fissure	133
4.3	Ultrasound of clinically important peripheral vessels of the neck	134
4.3.1	Ultrasound scanning technique	134
4.3.2	Common carotid artery, internal jugular vein	134
4.3.3	Subclavian artery, subclavian vein	136
