9 Introduction to regional freshwater Zoogeography: The Holarctic region	524
9.1 Accepted zoogeographical regions for the freshwater fauna	524
9.2 The Holarctic region: General features and interrelationships of the freshwater fauna	527
10 North America	532
10.1 Composition of the fauna	532
10.1.1 Primary and vicarious freshwater fishes	532
10.1.2 Primary freshwater higher Crustacea	541
10.1.3 Primary freshwater Mollusca	546
10.1.4 Primary freshwater lower Invertebrata	551
10.1.5 Secondary division freshwater fishes and crabs	554
10.1.6 Peripheral freshwater fishes and invertebrates	556
10.1.7 Groups of Entomostraca with passive dispersal means	559
10.1.8 Freshwater insects and water mites	561
10.2 Regional distribution of the riverine-net fauna	567
10.2.1 Eastern North America	567
10.2.1.1 General faunistic features	567
10.2.1.2 The Mississippi River basin: General faunistic characterization	569
10.2.1.3 The Ohio River drainage	571
10.2.1.4 The Missouri River and the other western tributaries of the Mississippi	580
10.2.1.5 The Great Lakes and the Atlantic slope	584
10.2.1.6 The Alabama-Tombigbee (Mobile Bay) basin	592
10.2.1.7 The Gulf of Mexico slope east of the Mississippi (except the Alabama-Tombigbee basin)	597
10.2.1.8 The Gulf of Mexico slope west of the Mississippi (except the Rio Grande del Norte)	601
10.2.1.9 The Rio Grande del Norte basin	603
10.2.2 Western North America	606
10.2.3 Arctic North America	615
10.2.4 Central Mexico south of the Rio Grande and the San Pedro River	618
10.3 Regional distribution of the hypogean aquatic fauna	623
10.4 Regional distribution of aquatic insects and of epigeal water mites	630
10.4.1 General distribution pattern	630
10.4.2 Western North America	632
10.4.3 Eastern North America	638
10.5 Biogeographical relationships and history of the North American freshwater fauna	645
10.5.1 Relationships with other faunas	645
10.5.2 Interrelationships of the North American faunas	650
10.5.3 Disjunctions in the freshwater fauna of North America	652
10.5.4 Vicariant relationships in the aquatic fauna of North America	654
10.5.5 Sympatric occurrence of close relatives in North America	657
10.5.6 The fossil record of North American freshwater animals	658

10.5.7	Palaeogeographical evolution of North America and dispersal history of its aquatic fauna	661
10.5.7.1	General Palaeogeography of North America	661
10.5.7.2	Tertiary evolution of the eastern North American aquatic fauna	663
10.5.7.3	Tertiary evolution of the western North American and Central Mexican aquatic faunas	667
10.5.7.4	Evolution of the freshwater fauna of North America during glacial and post-glacial times	670
11	The Euro-Mediterranean subregion	677
11.1	Composition of the aquatic fauna	677
11.1.1	Primary and vicarious freshwater fishes	677
11.1.2	Primary freshwater higher Crustacea	689
11.1.3	Primary freshwater Mollusca	694
11.1.4	Primary freshwater lower Invertebrata	697
11.1.5	Secondary division and peripheral freshwater fishes and Invertebrata	701
11.1.5.1	With a probable Tethyan origin and age	701
11.1.5.2	With a Ponto-Caspian range and origin	709
11.1.5.3	Northern and Atlantic species	713
11.1.5.4	Mediterranean species	714
11.1.6	Entomostraca groups with passive dispersal means	715
11.1.7	Aquatic insects and water mites	717
11.2	Regional distribution of the riverine-net fauna	728
11.2.1	Central Europe	728
11.2.2	Subdivisions of Central Europe	734
11.2.2.1	The Danube River basin	734
11.2.2.2	Baltic Sea, Atlantic and Arctic Ocean basins	742
11.2.2.3	The Ponto-Caspian basin east of the Danube	743
11.2.3	The southern Euro-Mediterranean areas	744
11.2.3.1	General distribution pattern	744
11.2.3.2	The Iberian Peninsula	747
11.2.3.3	Northwestern Africa	747
11.2.3.4	Italy and satellite islands	748
11.2.3.5	The western Balkans	749
11.2.3.6	Lake Ohrid	751
11.2.3.7	The Aegean Sea slope of the East Balkans	754
11.2.3.8	The southern Balkans	756
11.2.3.9	The northern slope of the Caucasus	759
11.2.3.10	Northern Anatolia and western Transcaucasia	760
11.2.3.11	Central Anatolia	762
11.2.3.12	Eastern Transcaucasia and northern Iran	763
11.2.3.13	The Aral Sea basin	765
11.3	Regional distribution of the hypogean fauna	766
11.3.1	General distribution pattern	766
11.3.2	The Iberian Peninsula	768
11.3.3	Northwestern Africa	769
11.3.4	Italy and satellite islands	770

11.3.5	France, western and northcentral Europe	771
11.3.6	The western Balkans	773
11.3.7	The Danube River basin	774
11.3.8	The eastern and southern Balkans	776
11.3.9	Anatolia	778
11.3.10	The Caucasus	778
11.3.11	The Aral Sea basin and neighbouring areas	779
11.4	Regional distribution of the Entomostraca with passive dispersal means	779
11.5	Regional distribution of aquatic insects and of epigeal water mites	784
11.5.1	General distribution pattern	785
11.5.2	Northeastern Europe	785
11.5.3	The British Isles	787
11.5.4	France and Central Europe	788
11.5.5	The Alps	790
11.5.6	Species displaying a disjunct boreo-Alpine distribution	791
11.5.7	The Carpathians and adjacent Danube basin lowlands	792
11.5.8	The southern Euro-Mediterranean areas: General characterization of the limnetic insect fauna	796
11.5.9	The Iberian Peninsula and northwestern Africa	797
11.5.10	Italy and satellite islands	798
11.5.11	The western Balkan highlands	799
11.5.12	The eastern Balkans	801
11.5.13	The southern Balkans and the Aegean Islands	802
11.5.14	Anatolia	804
11.5.15	The Caucasus	805
11.6	Biogeographical relationships and history of the Euro-Mediterranean freshwater fauna	806
11.6.1	Relations with other faunas	806
11.6.2	Interrelationships of the Euro-Mediterranean faunas	811
11.6.3	Disjunctions in the Euro-Mediterranean freshwater fauna	813
11.6.4	Vicariant relationships within the Euro-Mediterranean freshwater fauna	819
11.6.5	Sympatric occurrence of close relatives	823
11.6.6	The fossil record	824
11.6.7	Palaeogeographical evolution of Europe, northwestern Africa and Anatolia, and the dispersal history of the aquatic fauna	829
11.6.7.1	General Palaeogeography of the area and history of the fauna	829
11.6.7.2	Neogene history of southeastern Europe/Anatolia and of its aquatic fauna	838
11.6.7.3	History of the Ponto-Caspian fauna of marine origin	845
11.6.7.4	History of the aquatic fauna during the Ice Age and in post-glacial times	847
11.6.7.5	History of the glacial marine relicts in northern Europe	857
12	Siberia and adjacent areas	860
12.1	Siberia proper	860
12.1.1	Composition of the aquatic fauna	860
12.1.1.1	Primary and vicarious freshwater fishes	860

12.1.1.2	Primary freshwater invertebrates	863
12.1.1.3	Peripheral freshwater fishes and invertebrates	866
12.1.1.4	Groups of Entomostraca with passive dispersal means	867
12.1.1.5	Aquatic insects	868
12.1.2	Regional distribution of the aquatic fauna	872
12.2	Lake Baikal	874
12.3	The refugial areas south of the Altai and Sayan Mountains	878
12.4	Affinities and history of the Siberian freshwater fauna	880
12.4.1	Affinities and general history of the Siberian freshwater fauna	880
12.4.2	History of Lake Baikal and of its fauna	885
13	The Sino-Indian region	888
14	The East Asian subregion	896
14.1	Composition of the freshwater fauna	896
14.1.1	Primary and vicarious freshwater fishes	896
14.1.2	Continental freshwater higher Crustacea	909
14.1.3	Continental freshwater Mollusca	912
14.1.4	Primary freshwater lower invertebrates	915
14.1.5	Secondary division and peripheral freshwater fishes and invertebrates	916
14.1.6	Entomostraca with passive dispersal means	918
14.1.7	Aquatic insects and water mites	922
14.2	Regional distribution of the riverine-net fauna	928
14.2.1	General distribution pattern	928
14.2.2	The north of East Asia	929
14.2.2.1	The Amur River basin	932
14.2.2.2	Korea	934
14.2.2.3	Japan	936
14.2.2.4	The Liaoho River basin	939
14.2.3	The Paiho, Luangho and Huanghoe River basins	940
14.2.4	The Changjiang (Yangtze) River basin	941
14.2.5	The south of East Asia	945
14.2.5.1	General faunistic features	945
14.2.5.2	Zhejiang Province, the Minjiang River basin and Taiwan Island	948
14.2.5.3	The Xijiang River basin	950
14.2.5.4	The Song Koi River basin, Hainan Island and Central Vietnam	951
14.3	Regional distribution of the aquatic insects	953
14.4	Biogeographical relationships and history of the East Asian fauna	959
14.4.1	Relations with other faunas	959
14.4.2	Interrelationships between East Asian faunistic areas	963
14.4.3	Disjunctions in the East Asian freshwater fauna	964
14.4.4	Vicariant relationships within the East Asian freshwater fauna	966
14.4.5	Sympatric occurrence of close relatives	969
14.4.6	Palaeogeography of East Asia and probable history of its freshwater fauna	969

15 The High Asian subregion	974
15.1 Composition of the aquatic fauna	974
15.1.1 Fishes and primary aquatic invertebrates	974
15.1.2 Aquatic insects	980
15.2 Regional distribution of the aquatic fauna	983
15.3 Probable origin and history of the High Asian aquatic fauna	985
16 The South Asian subregion	988
16.1 Composition of the freshwater fauna	988
16.1.1 Primary freshwater fishes	988
16.1.2 Primary freshwater higher Crustacea and Mollusca	997
16.1.3 Primary freshwater lower invertebrates and Entomostraca with passive dispersal means	1004
16.1.4 Secondary division and peripheral freshwater fishes and invertebrates	1005
16.1.5 Freshwater insects and water mites	1011
16.2 Regional distribution of the riverine-net fauna	1016
16.2.1 General distribution pattern	1016
16.2.2 The basins of the Mekong and Chao Phraya Rivers	1018
16.2.3 The Malay Peninsula	1021
16.2.4 The islands of western Indonesia (except Kalimantan)	1023
16.2.5 Kalimantan Island	1025
16.2.6 The southern Philippines	1027
16.2.7 Burma and the western slope of the Malay Peninsula	1030
16.2.8 The Indian subcontinent and Ceylon Island: General faunistic features; Ganges-Bramaputra and Indus	1031
16.2.9 Peninsular India and Ceylon Island	1035
16.3 Distribution of aquatic insects	1044
16.4 Biogeographical relationships and history of the South Asian freshwater fauna	1046
16.4.1 Relations with other faunas	1046
16.4.2 Interrelationships of the South Asian freshwater faunas	1049
16.4.3 Disjunctions in the South Asian freshwater fauna	1050
16.4.4 Vicariant relationships in the freshwater fauna of southern Asia	1051
16.4.5 Sympatric occurrence of close relatives	1052
16.4.6 Palaeogeography of South Asia and probable history of its freshwater fauna	1052
17 The western Asian intermediary area	1065
17.1 Composition of the aquatic fauna	1065
17.1.1 Primary, secondary and vicarious division freshwater fishes	1065
17.1.2 Continental primary freshwater invertebrates	1074
17.1.3 Peripheral freshwater fishes and invertebrates	1078
17.1.4 Freshwater insects	1080
17.2 Distribution of the aquatic fauna	1082
17.3 Affinities and history of the aquatic fauna	1087
