

CONTENTS

| | |
|---------------------------|-----|
| LIST OF CONTRIBUTORS | ix |
| PREFACE | xi |
| NOTE ON TAXONOMY | xv |
| CONTENTS OF OTHER VOLUMES | xix |
| OBITUARY | xxi |

Chapter 1. The Peripheral and Autonomic Nervous Systems

Terence Bennett

| | |
|-------------------------------|----|
| I. Introduction | 1 |
| II. Peripheral Nervous System | 2 |
| III. Autonomic Nervous System | 15 |
| References | 46 |

Chapter 2. The Avian Pineal Organ

M. Menaker and A. Oksche

| | |
|--------------------------|-----|
| I. Function | 80 |
| II. Structure | 89 |
| III. General Conclusions | 109 |
| References | 114 |

Chapter 3. The Avian Skeletomuscular System

Walter J. Bock

| | |
|----------------------------|-----|
| I. Introduction | 120 |
| II. Descriptive Morphology | 124 |
| III. Functional Morphology | 137 |

| | |
|--|-----|
| IV. Physiological Adaptation | 223 |
| V. Ecological Morphology and Adaptation | 226 |
| VI. Comparative Morphology and Systematics | 228 |
| VII. Epilogue | 250 |
| References | 250 |

Chapter 4. Thermal and Caloric Relations of Birds

William A. Calder and James R. King

| | |
|---|-----|
| I. Introduction | 260 |
| II. A Simplified Heat Exchange Model | 263 |
| III. Basic Principles of Heat Transfer | 287 |
| IV. Physiological Responses to Heat and Cold | 309 |
| V. Hypothermia | 343 |
| VI. Integration of Thermal and Caloric Responses | 354 |
| VII. Evolutionary Aspects of Thermoregulation and Energy Metabolism | 386 |
| References | 393 |

Chapter 5. Physiology and Energetics of Flight

M. Berger and J. S. Hart

| | |
|---|-----|
| I. Introduction | 416 |
| II. Respiratory Mechanics | 416 |
| III. Respiratory Gas Exchange | 426 |
| IV. Circulation | 434 |
| V. Temperature Regulation | 443 |
| VI. Water Loss | 455 |
| VII. Energy Turnover in Migratory Flights | 459 |
| References | 467 |

| | |
