

# Contents

INTRODUCTION .....	5
EROSION CONTROL MEASURES IN GENERAL .....	6
AGROTECHNICAL EROSION CONTROL MEASURES .....	11
REGIONALISATION OF EROSION CONTROL MEASURES .....	12
VERY EFFICIENT AGROTECHNICAL EROSION CONTROL MEASURES .....	14
Direct drilling of winter grain crop after rape, grain crop or legume crop .....	15
Sowing of winter grain crop after grain crop or rape making use of shallow stubble-breaking .....	17
Increase in efficiency of erosion control measures .....	24
Direct drilling of spring barley after grain crop or rape and the use of stubble catch crop .....	25
Other applications of very efficient agrotechnical erosion control measures ....	29
LESS EFFICIENT AGROTECHNICAL EROSION CONTROL MEASURES .....	30
Establishment of silage maize stand into mulch of freezing-out catch crop (after grain crop) .....	32
Sowing of cover undercrop in strips and alternate rows .....	37
Establishment of grain crop stands after maize and root crops .....	37
Establishment of sugar beet stand into the mulch of freezing-out catch crop .....	38
Potato planting into mulch .....	42
MEASURES OF PROTECTION AGAINST WIND EROSION .....	45
CONCLUSION .....	47
REFERENCES .....	47
