

Contents

Summary	2
Souhrn	3
1 Introduction	6
2 Combustion Systems and Models of Internal Combustion Engines	6
3 Reaction mechanisms.....	7
4 The Simulation Model Background.....	8
4.1 Basic System of Governing Equations	8
4.2 Combustion Description – Chemical Kinetics.....	11
4.3 Numerical Solution	12
5 Application of the Methodology to an Unconventional Cycle Simulation – Porous Media Engine.....	14
6 Conclusion	18
References.....	19
