

Table of Contents

Preface	3
1. Introduction	5
2. Physical Characteristics of Light	12
3. Plasma – the State of Solar Matter	19
4. Sun – Our Nearest Star	25
5. Solar Power Plants	32
6. The Physical Principles of Photovoltaic Energy Conversion	39
7. The Design and Manufacture of Photovoltaic Cells and Panels	50
8. Photovoltaic Solar Systems with Fixed Stand	59
9. Photovoltaic Solar Systems with Tracking Stand	62
10. Other Possibilities for Enhancement of Power Production	73
11. Testing the Lifespan of Photovoltaic Systems	81
12. Accumulation of Solar Energy	84
13. Application of Solar Photovoltaic Systems	90
14. The Economics of Solar Photovoltaic Systems	95
15. Solar Energy Conferences and Exhibitions	99
16. Supplements	103
References	151
