

# CONTENTS

1 INTRODUCTION .....	5
2 PLASMA – THE FOURTH STATE OF MATTER .....	6
3 EXPERIMENTAL REALISATION OF THE SHORT WAVELENGTH RADIATION SOURCES .....	9
3.1 Conditions for realization of short-wavelength lasers .....	9
3.2 Lasing in the X-ray region .....	10
3.2.1 Laser plasma based sources .....	11
3.2.2 Capillary-discharge based sources .....	13
3.2.3 Hybrid X-ray lasers .....	16
3.3 Incoherent capillary-discharge based radiation sources .....	17
3.3.1 Sources for EUV lithography .....	17
3.3.2 Plasma waveguides .....	18
4 THEORETICAL INVESTIGATION OF THE CAPILLARY-DISCHARGE BASED RADIATION SOURCES .....	20
4.1 Description of the plasma dynamics in capillary z-pinch .....	20
4.2 Radiative and thermodynamics plasma properties .....	21
5 STUDY OF PLASMA – BASED SHORT WAVELENGTH RADIATION SOURCES .....	22
5.1 Investigation of ablative and non-ablative capillary-discharge based radiation sources .....	22
5.2 Construction of a capillary-discharge based laser .....	23
5.3 Application of short-wavelength radiation sources .....	25
SUMMARY .....	26
LITERATURE .....	28
SHRUTÍ .....	34
