

Contents

Introduction <i>Šárka Blažková</i>	5
Phytoplankton dynamics in the Jizera River in relation to nutrients and hydrological conditions <i>Blanka Desortová</i>	7
Evaluation of the environmental status of the Jizera River based on macrozoobenthos sampled within the framework of national monitoring <i>Jiří Kokeš</i>	20
Fishways on the Jizera River <i>Ondřej Slavík, Zdeněk Vančura, Marcel Lauerman</i>	32
Reconstruction of nitrate pollution of riverbank filtration Káraný using ^{15}N and ^{18}O isotopes <i>František Buzek, Renata Kadlecová, Miroslav Kněžek</i>	36
Assessment of the Jizera water bodies <i>Ladislav Merta, Simona Havlíčková</i>	55
Assessment of the groundwater bodies <i>Hana Prchalová</i>	70
Survey of point sources of pollution over 500 PE in the basin of the Jizera River <i>Ludvík Koumar</i>	92
Modelling of groundwater flow in the Jizera Basin <i>Martin Milický et al.</i>	114
Modeling of the water flow and the contaminant transport in the soil profile of the Předměřice region <i>Milena Císlarová, Tomáš Vogel, Jaromír Dušek</i>	126
Modeling acidification in the Jizera Mountains: reconstructed and predicted long-term changes in the Uhlířská catchment <i>David Motl</i>	139

Experimental basins of the Czech Hydrometeorological Institute in the Jizera mountains <i>Alena Kulasová, Libuše Bubeníčková</i>	154
Quality of Water in the Experimental River Basins <i>Petr Lochovský et al.</i>	182
Subsurface hydrology at Uhlířská Watershed <i>Martin Šanda et al.</i>	203
Precipitation - runoff modelling in the Jizera Mountains <i>Šárka Blažková et al.</i>	218
