

CONTENTS

Preface (K. Bouzek)	7
General information	8
Part I	
FINAL PROGRAMME	
Final Programme	12
Part II	
INVITED LECTURES	
Fuel Cells and Hydrogen – What can they contribute to our energy future? Robert Steinberger-Wilckens (University of Birmingham, United Kingdom)	18
The Fuel Cells and Hydrogen Joint Undertaking: Towards the deployment of fuel cells and hydrogen Bert de Colvenaer (Executive Director, Fuel Cells and Hydrogen Joint Undertaking, Belgium)	19
Examples of national/local network building around FCEV and HRS roll out in the EU Marieke Reijalt (Executive Director, European Hydrogen Association, Belgium)	20
German energy revolution – recent development and major challenges Henry Bergmann (Anhalt University of Applied Sciences, Köthen, Germany)	21
Towards sustainable mobility – Why hydrogen is the most promising option Thomas von Unwerth (Technische Universität Chemnitz, Germany)	22
PEM fuel cells and electrolyzers: potential and routes for improvement of the technology Francois Lapique (CNRS, Nancy, France)	23
Composite membranes for high temperature PEM fuel cells: from single cells to stack M. A. Rodrigo, J. Lobato, P. Cañizares, F. J. Pinar, H. Zamora and D. Úbeda (University of Castilla-La Mancha, Ciudad Real, Spain)	24
Carbon and sulfur tolerant anodes for SOFCs M. Athanasiou, D. K. Niakolas, S. G. Neophytides (FORTH/ICE-HT, Patras, Greece)	25

Part III

ORAL PRESENTATIONS

The Laboratory of Hydrogen Technology: A new key part of Technological centre for research of renewable sources and accumulation of electric power. D. Minarik (VSB– Technical university of Ostrava, ENET – Centre of Energy Units for Utilization of non Traditional Energy Sources, Czech Republic)	28
Fifteen years of research and development in the field of hydrogen technologies at the Institute of Chemical Technology Prague K. Bouzek, M. Paidar, R. Kodým, J. Hnát (Department of Inorganic Technology, Institute of Chemical Technology Prague, Czech Republic)	29
The history of the Fuel Cell drive Technology at Daimler AG E. Haner, A. Talke (Daimler AG, Germany)	30
Hydrogen Technologies for Energy Storage Applications A. Doucek, J. Čermáková, L. Polák (ÚJV Řež, plc., Department of Hydrogen Technologies, Czech Republic)	31
Influence of PBI membrane type and doping time on the high temperature PEM fuel cell performance M. Paidar, A. Giurg, P. Mazúr, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic)	32
Low Pt thin film catalysts for PEM fuel cell technology V. Matolín, R. Fiala, M. Václavů, J. Lavková, I. Matolínová (Charles University in Prague, Faculty of Mathematics and Physics, Czech Republic)	33
Relation between activation losses and membrane efficiency in the fuel cell operation F. Maršík, P. Novotný (University of West Bohemia, New Technologies – Research Centre, Czech Republic)	34
Optimisation of an Anode for the PEM Water Electrolysers J. Polonský, M. Paidar, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic)	35
Alkaline water electrolysis with solid polymer electrolyte J. Hnát, J. Schauer, J. Žitka, M. Paidar, K. Bouzek (Institute of Chemical Technology, Prague, Dept. of Inorganic Technology, Czech Republic)	36
Hydrogen production from lignite liquefaction applying nuclear co-generation K. Stehlík, F. Wertz, L. Karásková-Nenadállová, J. Vít, K. Vonková (Research Center Rez, Czech Republic)	37

Fluidized bed gasification of biomass: the yield of hydrogen under different operating conditions.	
M. Jeremiáš, M. Pohořelý, K. Svoboda, S. Skobliá, Z. Beňo, P. Kameníková, T. Durda (Institute of Chemical Process Fundamentals, Academy of Science of the Czech Republic)	38
The effect of power cycles architectures at hydrogen production plants	
P. Hajek (ÚJV Řež, a. s., Czech Republic)	39
Power Flow Problem in a Smart Grid with Hydrogen Storage Systems	
M. Morte (ÚJV Řež, a. s., Czech Republic)	40
Solid Oxide Steam Electrolysis – activities recently going on at ICT Prague	
F. Karas, M. Paidar, K. Bouzek (Institute of Chemical Technology, Prague, Dept. of Inorganic Technology, Czech Republic)	41
Development of mathematical modelling tool for analysis and optimization of the High Temperature Solid Oxide Steam Electrolysis process	
R. Kodým, F. Karas, M. Paidar, K. Bouzek (Institute of Chemical Technology, Prague, Dep. Of Inorganic Technology, Czech Republic)	42
 Part IV POSTER PRESENTATIONS	
Mathematical modelling – powerful tool for understanding of degradation mechanisms in PEM type fuel cell	
M. Drakselová, R. Kodým, S. Sunde, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic)	44
Phosphorus electrochemistry on Pt electrode: a key to better understanding of high temperature PEM fuel cells containing H₃PO₄	
T. Bystroň, M. Prokop, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic)	45
Preparation of Pt based catalytic layer on the rotating electrode surface for catalyst characterisation in H₃PO₄ at elevated temperatures	
M. Prokop, M. Paidar, T. Bystroň, K. Bouzek (Institute of Chemical Technology Prague, Dept. of Inorganic Technology, Czech Republic)	46
Stability of Nafion® membrane at elevated temperature and pressure	
J. Mališ, M. Paidar, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Technická 5, Czech Republic)	47

Alkaline water electrolysis with cation-selective membrane K. Vazač, M. Paidar, M. Roubalík, K. Bouzek (Institute of Chemical Technology, Prague, Dept. of Inorganic Technology, Czech Republic)	48
Concept of zero-gap of alkaline water electrolysis J. Čermáková, A. Doucek, P. Hájek (ÚJV Rež, a. s., Hydrogen Technologies Department, Czech Republic)	49
Synthesis and characterization of NiFe₂O₄ electrocatalyst and preparation of MEA (membrane electrode assembly) using different binders in gas diffusion electrodes for the hydrogen evolution in alkaline water electrolysis D. Chanda, J. Hnát, M. Paidar, K. Bouzek (Department of Inorganic Technology, Institute of Chemical Technology Prague, Czech Republic)	50
Hydrogen production via HTSE based on electrolyte-supported solid oxide electrolysis cells L. Polák, A. Doucek, J. Čermáková (ÚJV Řež, plc., Department of Hydrogen Technologies, Czech Republic)	51
Thin films of WO₃ prepared by magnetron sputtering deposition M. Brunclíková, M. Zlámal, P. Kšířová, Š. Kment, Z. Hubička, J. Krýsa (Institute of Chemical Technology, Prague, Dep. Of Inorganic Technology, Czech Republic)	52
Membrane separation of hydrogen V. Martin-Gil, V. Fíla (Institute of Chemical Technology, Prague, Dep. of Inorganic Technology, Czech Republic)	53
Part V	
LIST OF PARTICIPANTS	
List of participants	56
Part VI
